

Permits Project Manager to manage permits and consents for Taiwan development projects

Do you want to play a key role in the development of the offshore wind pipeline in Taiwan?

Join us and become Permits Project Manager in the Project Development team in Taiwan for our Taiwanese development projects. The Permits Project Manager is a key member of a development project's management team along with the Commercial Manager and Technical Project Manager, all operating under the direction of the Project Development Manager.

Your key tasks will be to

- be accountable for delivering and managing the environmental permits and consents for projects in development
- project manage tasks to ensure deliverables to external authorities
- lead discussions with organisations, groups and authorities
- coordinate internal specialist resources to support the projects
- manage environmental consultancy supplier relationships.

Furthermore, you'll be responsible for the project's permit strategy, programme, budget and internal approvals. You'll play a role in developing the Asia-Pacific Permits team's skills and knowledge as the team grows.

Your competences include that you

- have obtained a university degree or higher in environmental science, environmental engineering, law, policy or business.
- have extensive project management experience, e.g. from the wind industry, large scale infrastructure projects, consultancies or from working for authorities or related organisations
- have in-depth knowledge and experience of offshore and coastal permitting processes for offshore wind farms in Taiwan
- are willing to work flexibly across a range of tasks and deliverables, with a strong ability to balance competing priorities and work streams
- are fluent in Mandarin and English with advanced Taiwanese skills.

Working at Ørsted

To be the frontrunner in the green energy transformation, we invest significantly in innovation and empower our employees to help shape the renewable energy technologies of the future. We cultivate a collaborative, dynamic and diverse work environment and encourage career-long learning and development so our people can realise their full potential.

Would you like to help shape the renewable technologies of the future?

Send your application to us as soon as possible and no later than 20 May 2019, as we'll be conducting interviews on a continuous basis.

Please do not hesitate to contact Jane Liu, HR responsible, by email: twrecruitment@orsted.com if you want to know more about the position.

Please note that for your application to be taken into consideration, you must submit your application via our online career pages.

However, you should expect some travelling in relation to your work, both domestically and potentially occasionally to other parts of the Asia-Pacific region and to our offices in Europe.

About Ørsted

Headquartered in Denmark, Ørsted's 6,080 employees develop, construct and operate offshore and onshore wind farms, bioenergy plants and innovative waste-to-energy solutions and provide smart

energy products to its customers. Ørsted Offshore's 2,450 employees have developed and constructed the largest portfolio of offshore wind farms in Northern Europe, and we're expanding with international activities in the US and Asia-Pacific.

Ørsted has secured 1820MW of grid capacity for offshore wind in Taiwan, the first 900MW are preparing for construction with high level of activities and engagements with a large virality of stakeholders. The next 920MW of projects are in the planning phase where a lot of permits are required over the next couple of years, hopefully leading to a successful completed construction by 2025. You will be working on both projects and being able to influence directly the outcome of our future activities in Taiwan.

For more information on Ørsted, visit orsted.com.
