1 Introduction

1.1.1.1 A fundamental requirement of undertaking the Cumulative Effects Assessment (CEA) is to identify those projects, plans and activities with which the Hornsea Project Four offshore wind farm (hereafter Hornsea Four) may interact to produce a cumulative impact. These interactions may arise within the construction, operation and maintenance or decommissioning phases of the project.

1.1.1.2 The objective of this annex is to provide the locations of other plans and projects included in the Onshore CEA, based on the methodology (and the long-list) presented in [Volume 4, Annex 5.5: Onshore Cumulative Effects](#). The Offshore CEA Screening Matrix is provided in [Volume 4, Annex 5.3: Offshore Cumulative Effects](#), with the locations of these offshore schemes illustrated in [Volume 4, Annex 5.4: Location of Offshore Cumulative Schemes](#).

2 Location of Onshore Cumulative Schemes

2.1.1.1 All onshore projects, plans and activities considered within the CEA, based on the search areas set out in [Volume 4, Annex 5.5: Onshore Cumulative Effects](#) are presented in [Figure 1](#) to [Figure 4](#) of this document.
