

# Mid-Atlantic Survey Activity

## Mariners Briefing

Date of Notice: January 2, 2019

Notice No. 039

### Overview

These briefings are intended to update mariners on marine operations for the Ocean Wind survey activities. Survey operations are planned for locations throughout the lease area (see chart) and are expected to last several months. These operations involve only the survey phase of the projects.

Mariners briefings are submitted as needed to the U.S. Coast Guard and distributed to the fishing community and interested mariners on our website at: [us.orsted.com/mariners](http://us.orsted.com/mariners) or via email upon request through Rodney Avila (RODAV@orsted.com).

**Vessels will designate a working channel on VHF 16 daily at 0600 and 1800**

### About the Wind Farm

Ocean Wind (OCW), with the support of PSEG, is a planned offshore wind farm located 15 miles off the New Jersey coast. OCW will contain an offshore substation and a subsea transmission system able to deliver clean energy to the New Jersey electrical grid.

The Skipjack Wind Farm (SJWF) is an offshore wind farm planned for federal waters off the coast of Delaware and Maryland. The SJWF will consist of wind turbines, an offshore substation, and subsea transmission system to shore. Marine survey activities began in Summer 2018. Marine construction is planned to start in 2022.

### Ongoing OCW Survey Activities

- Projected Beginning: April 2019
- Projected End: January 2020
