

Polish Vendor - White List

Last updated 24.01.2023

What is the Polish White List?

The electronic database of VAT-registered taxpayers in Poland

What does the Polish White List contain?

The electronic VAT database contains contractor's information such as business name, address, VAT number, VAT registration status, and date of registration. In addition, it contains bank account numbers reported to tax office by all taxpayers (through the submission of the NIP-8 or NIP-2 tax form).

What is the function of the register?

The e-register makes it possible for a vat payer registered in Poland to check their contractor's VAT status and bank account information.

-
- Yes I can confirm that my information is registered on the Polish White List
([The Polish White List](#))
- No I cannot confirm that my information is registered on the Polish White List, and therefore I have filled in the
Vendor Account Application Form and have attached bank documentation
