¹ All items in other comprehensive income may be reclassified to the income statement.

ACCOUNTING POLICIES

Business performance

The purpose of DONG Energy's risk management is to ensure greater value creation and certainty about the Group's finances. This is done by hedging, in part or in full, the value of the Group's production as well as its purchases and sales of energy to avoid any impacts from unfavourable market price developments.

As hedging instruments are not always available which precisely match the underlying commercial exposure (production or trading), or which are sufficiently liquid, the Group engages in some hedging in alternative markets or subject to alternative time horizons. For example, electricity generation in Denmark is to some extent hedged by financial contracts for EEX and the Nord Pool areas as these prices normally develop uniformly over time.

The above has resulted in that only some of the Group's financial hedging transactions comply with the IFRS provisions concerning cash flow hedge accounting even though they have been entered into for that specific purpose. In case of non-compliance, the hedging transactions must be subjected to regular market value adjustments, which may give rise to considerable fluctuations in the income statement despite the fact that these transactions have reduced the economic risk.

Consequently, an alternative measure – business performance – is used to ensure greater transparency in the financial reporting. The business performance result is adjusted for temporary fluctuations in the market value of contracts (including hedging transactions) in respect of other periods and therefore reflects the financial effect of the Group's activities during the financial year.

For further information about economic hedging in accordance with business performance, see note 2.5.

ADDITIONS OF PROPERTY, PLANT AND EQUIPMENT, 2014

DISPOSALS OF PROPERTY, PLANT AND EQUIPMENT, 2014

Additions and disposals, property, plant and equipment

In accordance with the adopted strategy, in 2014 DONG Energy made significant investments in property, plant and equipment.

The most important additions are the development of Hejre, Laggan-Tormore and Glenlivet-Edradour fields in E&P, as well as investments in offshore wind farms in the UK and Germany.

The most important disposals were made by Wind Power, which in 2014 divested shares in the London Array wind farm as well as the Westernmost Rough project in the UK and the Gode Wind 2 project in Germany.

OWNERS AT 31 December 2014

Ownership of DONG Energy

On 29 November 2013, an agreement was signed with Goldman Sachs, ATP and PFA concerning the injection of DKK 11 billion; in addition, four of DONG Energy's five existing minority shareholders decided to contribute an additional DKK 2 billion. The capital injection was implemented on 20 February 2014.

In 2014, DONG Energy's managers and employees were invited to subscribe for shares in the company. Managers and employees subscribed for shares at a total value of DKK 222 million.

ACCOUNTING POLICIES

The hedging reserve comprises the accumulated net change in the fair value of hedging transactions that qualify for designation as hedges of future cash flows, and where the hedged transaction has yet to be realised, less the related tax.

The translation reserve comprises exchange differences arising on translation of the financial statements of foreign entities with a currency that is not the Group's functional currency, foreign exchange rate adjustments

relating to assets and liabilities that form a part of the Group's net investment in such entities, and foreign exchange rate adjustments relating to hedging transactions that hedge the Group's net investment in such entities, less the related tax. On realisation or partial realisation of the net investment, the foreign exchange rate adjustments are recognised in profit (loss) for the year under the item in which the gain or loss is recognised.

Share premium represents the excess of the amount subscribed for share capital over the nominal value of these shares in connection with capital increases. The reserve is part of DONG Energy's distributable reserves.

Exchange rate adjustments of cash and cash equivalents		245	(28)
Cash and cash equivalents at 31 December		4,770	1,431

ACCOUNTING POLICIES

Cash flows from operating activities are determined using the indirect method as operating profit (loss) before depreciation, amortisation and impairment losses adjusted for changes in provisions, prepayments and deferred income, value adjustments of financial instruments, etc., change in net working capital, interest received and interest paid, and income tax paid. Trade payables relating to purchases of intangible assets and property, plant and equipment are not recognised in change in net working capital.

Other items primarily comprise reversal of gain on divestment of assets, reversal of share of profit (loss) of and dividends in associates and joint ventures, reversal of drilling expenses charged to the income statement, changes in bad debt provisions and changes in prepayments and deferred income.

Cash flows from investing activities comprise payments in connection with the purchase and sale of intangible assets, property, plant and equipment and other non-current assets, and purchase and sale/maturity of securities that are not recognised as cash and cash equivalents as well as payments in connection with the divestment of enterprises and activities.

Cash flows from financing activities comprise changes in the size or composition of the share capital and hybrid capital, expenses associated with such changes, and dividend payments to owners and coupon payments on hybrid capital. Cash flows from financing activities also include raising of and instalments on loans, transactions with non-controlling interests, and changes in other non-current payables.

Cash flows in currencies other than the functional currency are translated at the average exchange rates for the month in question, unless these differ significantly from the rates at the transaction date.

1 BASIS OF REPORTING

In preparing the annual report, emphasis has been placed on ensuring that the content is relevant to the reader and the presentation clear

IN THIS SECTION

- 1.1 Consolidated financial statements
- 1.2 Foreign currency translation
- 1.3 Implementation of new standards and interpretations
- 1.4 New standards and interpretations
- 1.5 Definitions of performance highlights

In preparing the consolidated financial statements, a number of accounting estimates and judgements have been made.

Management regularly reassesses these estimates and judgements, partly on the basis of historical experience and a number of other factors in the given circumstances.

Critical accounting estimates made in connection with the financial reporting are set out in the following notes:

- 2.2 Revenue
- 3.1 Impairment test, intangible assets and property, plant and equipment
- 3.1 Useful lives of production assets
- 3.2 Decommissioning obligations
- 3.2 Onerous contracts
- 3.2 Litigations
- 3.3 Investments in associates and joint ventures
- 3.6 Divestment of enterprises
- 5.2 Construction contracts
- 7.2 Deferred tax

ACCOUNTING POLICIES

The financial statements for the period 1 January – 31 December 2014 comprise the consolidated financial statements of DONG Energy A/S and its subsidiaries (the Group) as well as separate financial statements for the parent company, DONG Energy A/S. Reference is made to page 128 for the parent company's accounting policies.

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the EU.

The consolidated financial statements have also been prepared in accordance with Danish disclosure requirements for annual reports of listed and state-owned public limited companies.

The financial statements are presented in million Danish kroner (DKK), unless otherwise stated.

The consolidated financial statements have been prepared on the historical cost basis except for derivative financial instruments, financial instruments in trading portfolio, financial instruments classified as available for sale and CO₂ emissions allowances in trading portfolio that are measured at fair value.

The accounting policies have been applied consistently to the financial year and the comparative figures.

The accounting policies applied to the consolidated financial statements as a whole are described below, while the remaining accounting policies are described in the notes to which they relate.

The descriptions of accounting policies in the statements and notes form part of the overall description of accounting policies:

▪ Statement of changes in equity	
▪ Statement of cash flows	
▪ Segment information	note 2.1
▪ Revenue	note 2.2
▪ Trading portfolio and hedging of EBITDA	note 2.5
▪ Share-based payment	note 2.7
▪ Intangible assets and property, plant and equipment	note 3.1
▪ Provisions and contingent assets and liabilities	note 3.2
▪ Investments in associates and joint ventures	note 3.3
▪ Divestment of enterprises	note 3.6
▪ Non-controlling interests	note 3.7
▪ Interest-bearing debt	note 4.1
▪ Financial resources	note 4.2
▪ Financial income and expenses	note 4.4
▪ Inventories	note 5.1

▪ Construction contracts	note 5.2
▪ Trade receivables	note 5.3
▪ Hedge accounting and economic hedging	note 6.1
▪ Credit risks	note 6.3
▪ Deferred tax	note 7.2
▪ Equity	note 8.1
▪ Hybrid capital	note 8.2
▪ Operating lease obligations	note 8.7

1.1 CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements include the parent company DONG Energy A/S and subsidiaries controlled by DONG Energy A/S.

Enterprises in which the Group holds or has the ability to exercise, directly or indirectly, between 20% and 50% of the voting rights, but does not exercise control, are accounted for as associates. However, this is based on a specific assessment of the possibility of exercising influence. Any such enterprises that satisfy the criteria for joint control are instead accounted for as investments in joint ventures.

The consolidated financial statements have been prepared as a consolidation of the parent company's and the individual subsidiaries' financial statements prepared in accordance with the Group's accounting policies. Intragroup income and expenses, shareholdings, balances and dividends as well as realised and unrealised gains and losses arising from intragroup transactions are eliminated on consolidation. Unrealised gains resulting from transactions with associates and joint ventures are eliminated to the extent of the Group's ownership interest in the enterprise. Unrealised losses are eliminated in the same way as unrealised gains to the extent that there has been no impairment.

The Group's share in joint operations is recognised in the consolidated balance sheet through recognition of the Group's own assets and liabilities and income and expenses. The Group's share of joint income and expenses and assets and liabilities is then recognised. The proportionate share of realised and unrealised gains and losses arising from intragroup transactions between fully consolidated enterprises and joint operations is eliminated.

1.2 FOREIGN CURRENCY TRANSLATION

For each reporting enterprise in the Group, items are determined in the currency of the primary economic environment in which the individual reporting enterprise operates (functional currency). Transactions in currencies other than the functional currency of each enterprise are accounted for as transactions in foreign currencies and translated on initial recognition at the exchange rate at the transaction date. Exchange differences

arising between the exchange rate at the transaction date and at the date of payment are recognised in profit (loss) for the year as financial income or expenses.

Receivables, payables and other monetary items in foreign currencies are translated at the exchange rates at the balance sheet date. The difference between the exchange rate at the balance sheet date and at the date at which the receivable or payable arose is recognised in profit (loss) for the year as financial income or expenses.

For foreign subsidiaries, joint operations and associates and joint ventures, the statements of comprehensive income are translated at monthly average exchange rates in so far as these do not deviate materially from the actual exchange rates at the transaction dates. Balance sheet items are translated at the exchange rates at the balance sheet date. All exchange differences are recognised in profit (loss) for the year, except for exchange differences arising on:

- translation of the opening equity of these enterprises at the exchange rates at the balance sheet date
- translation of the statements of comprehensive income of these enterprises from the exchange rates at the transaction date to the exchange rates at the balance sheet date
- translation of balances accounted for as part of the total net investment
- translation of the portion of loans and derivative financial instruments that has been entered into to hedge the net investment in these enterprises and that provides an effective hedge against corresponding foreign exchange gains (losses) on the net investment in the enterprise.

The above types of exchange differences are recognised in other comprehensive income. Such foreign exchange rate adjustments are allocated between the parent company's and the non-controlling interests' equity.

When a foreign entity is disposed of, in full or in part, and control is lost, or when balances that are considered part of the net investment are repaid, the share of the accumulated exchange rate adjustments, including any associated hedging, that is recognised directly in equity relating to that foreign entity is reclassified to profit (loss) for the year together with any gain or loss on disposal. The part of the translation reserve that relates to non-controlling interests is not transferred to profit (loss) for the year.

On partial disposal of foreign subsidiaries that does not result in a loss of control, a proportionate share of the translation reserve is transferred from the parent company shareholders' share of equity to the non-controlling interests' share of equity.

Repayment of balances that are considered part of the net investment does not constitute a partial disposal of the subsidiary.

1. BASIS OF REPORTING

CONTINUED

1.3 IMPLEMENTATION OF NEW STANDARDS AND INTERPRETATIONS

In 2014, DONG Energy implemented the following standards (IASs and IFRSs) and interpretations (IFRICs), effective for reporting periods beginning on or after 1 January 2014:

- Amendments to IFRS 10, IFRS 12 and IAS 27 relating to investment entities. The amendment exempts enterprises that meet the definition of an investment entity from the requirement for consolidation of subsidiaries.
- Amendment to IAS 32 concerning financial instruments. The amendment provides an additional guidance on the offsetting of financial assets and liabilities.
- Amendment to IAS 39 Financial Instruments: Recognition and Measurement. The amendment means that replacing a hedging instrument counterparty (novation) with a so-called clearing counterparty is not to be regarded as expiration or cancellation of the instrument if such transfer is a consequence of laws or regulations or the introduction of laws or regulations.
- IFRIC 21 Levies. The interpretation provides guidance on when to recognise a liability for levies imposed by a government, and which are accounted for in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets.
- Amendments to IAS 19 Employee Benefits. The amendments mean that contributions that are linked to service must be attributed to periods of service as a reduction of service cost if the amount of the contributions is independent of the number of years of service or pay level.
- Annual improvements 2010-2012, which concern amendments to IFRS 2, IFRS 3, IFRS 8, IFRS 13, IAS 16, IAS 38 and IAS 24.
- Annual improvements 2011-2013, which concern amendments to IFRS 1, IFRS 3, IFRS 8, IFRS 13 and IAS 40.

The implementation of the amended standards in the consolidated financial statements for 2014 has not had any impact on DONG Energy's consolidated financial statements for 2014.

1.4 NEW STANDARDS AND INTERPRETATIONS

IASB has issued a number of new or amended accounting standards and interpretations which have yet to be adopted by the EU and are consequently not relevant for 2014:

- IFRS 9 Financial instruments: Classification and measurement of financial assets and liabilities. The number of categories of financial assets is reduced to three: amortised cost, fair value or fair value through other comprehensive income. Fair value changes in financial liabilities arising from changes in own credit risk must be recognised in other comprehensive income. In addition, IFRS 9 includes simplified provisions concerning the possibility of using hedge accounting. In future, companies will only be required to perform efficiency tests and prepare a statement on the actual efficiency.
- IFRS 14 Regulatory Deferral Accounts. New standard on regulatory assets and regulatory liabilities in connection with the transition to IFRS.
- IFRS 15 Revenue: New standard on revenue recognition. In the new standard, the model for recognising revenue is changed from having been based on the transfer of the risks and rewards of ownership of a product or service to being based on the transfer of control of the goods or services transferred to the customer. The underlying principle is that recognition of revenue must reflect the transfer of goods or services from a company to a customer at the time of the sale.
- Annual improvements 2012-2014, which concern amendments to IFRS 5, IFRS 7, IAS 19 and IAS 34.

The new or amended standards and interpretations are not mandatory in connection with the financial reporting for 2014. DONG Energy expects to implement the standards and interpretations from their mandatory effective dates.

A performed analysis of the revenue streams in DONG Energy has been made with a view to assessing whether the implementation of IFRS 15 will have a significant impact on the recognition of revenue in DONG Energy. The analysis shows that the implementation of IFRS 15 will not have a significant impact on the recognition of revenue in DONG Energy.

An analysis of the effect of implementing IFRS 9 in DONG Energy has been started. This analysis has not yet been completed. The implementation of IFRS 9 is expected to have an effect on DONG Energy's consolidated financial statements.

DONG Energy has initiated assessments of the impact of the other amended standards and interpretations and expects that these will not have a significant impact on the financial reporting.

1. BASIS OF REPORTING

CONTINUED

1.5 DEFINITIONS OF PERFORMANCE HIGHLIGHTS

EBITDA adjusted for current hydrocarbon tax	Hydrocarbon tax is a result of the Group's oil and gas extraction.	Adjusted operating profit (loss)	EBIT adjusted for current hydrocarbon tax plus profit from associates and joint ventures that are not part of the Group's principal activities, less interest element of provisions.
Gross investments	Cash flows from investing activities, excluding dividends received from associates, joint ventures and equity investments, purchase and sale of securities, loans to joint ventures and joint operations, and divestment of assets and enterprises.	Capital employed (CE)	Non-interest-bearing net assets corresponding to non-interest-bearing assets less non-interest-bearing liabilities.
Net investments	Gross investments less divestment of assets and enterprises. To/from this is added/deducted acquired/transferred debt in connection with acquisitions and divestment of enterprises, and deducted non-controlling interests' share of investments in fully consolidated investment projects, and deducted the selling price of non-controlling interests.	Average capital employed	$\frac{\text{CE beginning of year} + \text{CE year-end}}{2}$
Funds from operation (FFO)	Supplementary concept for cash flows from operating activities determined as EBITDA less interest expense (net) on interest-bearing net debt and hybrid capital (50%), interest element of decommissioning obligations and current tax. In addition, operating lease obligations have been recognised as if they were finance lease obligations, where operating lease payments have been reversed, and calculated interest expense of the present value of lease payments has been deducted.	Return on capital employed (ROCE)	$\frac{\text{Adjusted operating profit (loss)}}{\text{Average capital employed}}$
		Adjusted ROCE	$\frac{\text{Adjusted operating profit (loss)} + \text{impairment losses for the year} + \text{provisions for onerous contracts}}{\text{Average capital employed} + \text{impairment losses for the year after tax}}$
		Proposed dividend per share (DPS) of DKK 10	$\frac{\text{Total proposed dividend}}{\text{Number of shares year-end}}$
		Payout ratio	$\frac{\text{Total proposed dividend}}{\text{Profit (loss) for the year attributable to shareholders}}$
Adjusted interest-bearing net debt	Interest-bearing net debt plus 50% of the hybrid capital, cash, cash equivalents and securities not available for use with the exception of repo transactions, present value of lease obligations (operating lease obligations calculated as if they were finance lease obligations), and decommissioning obligations less deferred tax.	Average number of shares	$\frac{1}{\text{Number of days}} \times \sum_{i=1}^{\text{Number of days}} X_i$
FFO to adjusted interest-bearing net debt	$\frac{\text{FFO}}{\text{Adjusted interest-bearing net debt}}$	Net working capital	Inventories, trade receivables, receivables from associates and joint ventures and other operating current assets less trade payables and liabilities to associates and joint ventures and other operating current liabilities.
Free cash flow to the company (FCF)	Cash flows from operating activities less gross investments.	Net working capital, excluding trade payables relating to capital expenditure	Net working capital excluding trade payables relating to purchases of intangible assets and property, plant and equipment.

2 RETURN ON CAPITAL EMPLOYED

DONG Energy has a strategic target of increasing the return on capital employed (ROCE) to at least 10% in 2016 and at least 12% in 2020

2.1 SEGMENT INFORMATION

Management has defined the Group's business segments based on the reporting regularly presented to the Group Executive Management, and which forms the basis for management's strategic decisions.

The primary measure of performance used by management is EBITDA, while EBIT is used as the secondary measure of performance.

Reportable segments comprise the following products and services:

Exploration & Production

Oil and gas exploration and production in Denmark, Norway, the UK, the Faroe Islands and Greenland as well as an ownership interest in the

Gassled gas pipeline network connecting the Norwegian fields with the European continent and the UK.

Wind Power

Development, construction and operation of offshore wind farms in Denmark, the UK, Germany and the Netherlands.

Thermal Power

Generation and sale of electricity and heat from thermal power stations in Denmark and a gas-fired power station in the Netherlands, and owner-

ship of a demonstration plant for production of second-generation bioethanol in Denmark.

Customers & Markets

Sale of electricity, gas, climate partnerships and related energy products in Denmark, Sweden, Germany and the UK as well as operation of the Group's electricity, gas and oil infrastructure in Denmark. The segment is also responsible for optimising the value of DONG Energy's overall energy portfolio and executing the Group's hedging strategy.

³ Return on capital employed (ROCE) is calculated as adjusted operating profit (loss)/average capital employed

Oil and gas exploration expenses of DKK 1,206 million were recognised in Exploration & Production (2013: DKK 1,823 million). At 31 December 2014, assets and liabilities relating to oil and gas exploration amounted to DKK 486 million and DKK 316 million, respectively (2013: DKK 5,743

million and DKK 597 million, respectively). Operating and investing activities related to oil and gas exploration absorbed cash of DKK 928 million and DKK 404 million, respectively (2013: DKK 3,514 million and DKK 1,082 million absorbed, respectively).

GEOGRAPHICAL INFORMATION

REVENUE, DKK million, 2014 (2013)²

² Revenue determined based on business performance.

PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS, DKK million, 2014 (2013)

A significant part of the Group's sales takes place via power exchanges and gas hubs in Europe, the physical location of which does not reflect the Group's market risks. Segment revenue is broken down, as far as possible, by the customer's geographical location based on supply point. However, when delivery is made directly from production platforms in the North Sea, the final supply point is not known to DONG Energy. In such cases, the customers' geographical location is defined on the basis of invoicing address.

Non-current assets are broken down geographically based on the physical location of the assets and comprise intangible assets and property, plant and equipment.

No single customer accounts for more than 10% of consolidated revenue.

ACCOUNTING POLICIES

Segment assets and segment liabilities are measured in accordance with the accounting policies applied in the consolidated financial statements.

The Group presents an alternative performance measure, business performance, in connection with the statement of profit (loss) for the year. The accounting policies for business performance are explained on page 50, to which reference is made.

Segment income, segment expenses, segment assets and segment liabilities are those items that, in the internal management reporting, are directly attributable to the individual segment or can be indirectly allocated to the individual segment on a reliable basis. Other activities primarily comprise income and expenses, assets and liabilities, investing activities, taxes, etc. that are not directly employed by the individual segment in its operating activities. Intersegment transactions are priced on arm's length terms.

Hedge accounting, net			(373)	(304)
Other revenue	2,703	2,740	2,703	2,740
Revenue	67,048	73,105	71,829	72,199

Of the total revenue of DKK 71,829 million (2013: DKK 72,199 million), DKK 65,136 million (2013: DKK 65,802 million) represents revenue from sale of goods, while DKK 6.693 million (2013: DKK 6.397 million) represents revenue from sale of services.

ACCOUNTING POLICIES

Revenue from sales of gas, sales and distribution of oil, distribution and storage of gas, and sales and distribution of electricity and heat is recognised in profit (loss) for the year when delivery and transfer of risk to the buyer have taken place and to the extent that the income can be measured reliably and is expected to be received. Revenue is measured at the fair

value of the agreed consideration excluding VAT and other indirect taxes collected on behalf of third parties. All forms of discounts granted are recognised as revenue.

Revenue from the Group's offshore wind farms comprises sale of electricity at market prices and regulated prices (fixed tariffs and guaranteed minimum prices for green certificates), which is recognised at the production date.

Construction contracts are recognised as revenue as the work is performed to the effect that revenue corresponds to the selling price of the work performed during the year (percentage of completion method). When the outcome of a construction contract cannot be estimated reliably, revenue is recognised to the extent of costs incurred that it is probable will be recoverable.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

In connection with the determination of revenue, the accrual of revenue relating to sales of electricity and gas to residential and business customers is subject to considerable uncertainty due to the fact that customers' realised consumption can only be verified through meter readings, which are not available at the date of presentation of the annual report. Revenue is recognised on the basis of statements that take account of relevant factors, such as for example realised temperatures of the month as well as the individual customer's historical consumption at the particular time of the year.

2.3 COST OF SALES

DKK million	Business performance		IFRS	
	2014	2013	2014	2013
Gas	17,560	26,260	18,284	26,084
Electricity	12,835	6,949	12,872	6,949
Coal	1,188	1,707	1,188	1,707
Biomass	1,231	1,270	1,231	1,270
Oil	88	209	88	209
Transportation costs etc	5,339	4,678	5,339	4,678
Economic hedging, net	234	311	310	387
Hedge accounting, net				(1)
Costs associated with construction contracts	2,650	4,189	2,650	4,189
Other cost of sales	1,101	1,651	1,101	1,651
Cost of sales	42,226	47,224	43,063	47,123

2.4 OTHER OPERATING INCOME

DKK million	2014	2013
Gain on divestment of assets	2,177	451
Adjustment of decommissioning obligations	15	64
Miscellaneous operating income	274	190
Other operating income	2,466	705

Gain on divestment of assets in 2014 consists primarily of the gain from the divestment of 50% of DONG Energy's ownership interest in the UK offshore wind farm London Array, and the gain from the divestment of 50% of the UK offshore wind farm project Westermost Rough.

Gain on divestment of assets in 2013 consists primarily of the gain from the sale of the office premises in Gentofte.

Adjustment of decommissioning obligations relates to production assets with a carrying amount of nil as a result of the assets having been fully depreciated.

2.5 TRADING PORTFOLIO AND HEDGING OF EBITDA

DONG Energy's activities in the financial markets mean that the Group is affected by changes in energy prices and related exchange rates. DONG Energy engages in hedging to reduce this risk to an acceptable level.

DONG Energy also has a trading portfolio for the purpose of generating gains from short-term fluctuations in energy prices. Trading activities are carried out within mandates approved by the Board of Directors.

DONG Energy's hedging of energy prices and the associated currency risk and trading portfolio can be broken down as follows:

ACCOUNTING POLICIES

Fair value adjustments of financial contracts offered to customers with a view to price hedging and financial instruments that have been entered into to hedge the Group's principal operating activities are recognised as revenue or cost of sales. Likewise, fair value adjustments of physical and financial contracts relating to energy that are concluded in the course of the Group's trading activities with a view to generating gains from short-term price fluctuations are recognised as revenue.

DKK million	Economic hedging ¹ and commercial contracts				2014		Economic hedging ¹ and commercial contracts				2013	
	Contractual principal amount ²	Fair value	Contractual principal amount ²	Fair value	Contractual principal amount ²	Fair value	Contractual principal amount ²	Fair value	Contractual principal amount ²	Fair value	Contractual principal amount ²	Fair value

Electricity options	580	(83)	24		604	(83)	1,627	(358)	70	5	1,697	(353)
CO ₂ emissions allowances			102	(42)	102	(42)			15	(1)	15	(1)
Coal	987	(255)	11		998	(255)	1,600	(214)	92	(52)	1,692	(266)
Currency												
Forward exchange contracts ³	20,406	(651)			20,406	(651)	5,775	(142)			5,775	(142)
Options					-	-	2,165	(121)			2,165	(121)
Total	54,785	3,768	1,765	271	56,550	4,039	47,420	30	3,883	470	51,303	500

¹ Economic hedging is accounted for in accordance with business performance as effective hedging, and the resulting market value adjustment is consequently deferred to the period in which the hedged transaction affects profit (loss).

² The contractual principal amount has been determined as the net position per derivative type.

³ In connection with the transition to business performance, cash flow hedging ceased in accordance with IFRS. The market value of hedging contracts recognised in equity was locked and transferred to the income statement during the period in which the hedged exposure occurs. Ceased cash flow hedging is expected to impact EBITDA by DKK 5 million in 2015 (EBITDA impact in 2014 totalled DKK 371 million).

2.5 TRADING PORTFOLIO AND HEDGING OF EBITDA CONTINUED

The business performance results have been adjusted for temporary fluctuations in the market value of contracts (including hedging transactions) relating to other periods and therefore represent the underlying financial performance of the Group in the reporting period.

The difference between IFRS and business performance is specified in the table. Market value adjustments in respect of a future period totalled DKK 5,662 million (2013: loss of DKK 162 million) and primarily relate to hedging of gas and electricity.

Deferred gains of DKK 1,718 million were recognised in 2014 (2013: losses of DKK 643 million) and primarily relate to gains on hedging of gas and electricity, partly offset by coal hedging. Such deferred gains were previously recognised in IFRS EBITDA.

Total difference deferred to a future period

Results deferred for recognition in the business performance results in a subsequent period are specified in the table on the right.

At 31 December 2014, a gain of DKK 3,299 million had been deferred (2013: DKK 884 million loss), which will affect business performance EBITDA in subsequent years. Of the total deferred gain, business performance EBITDA is expected to be affected by DKK 1,729 million in 2015 (2013: DKK 723 million loss in 2014).

SPECIFICATION OF THE DIFFERENCE BETWEEN EBITDA ACCORDING TO BUSINESS PERFORMANCE AND ACCORDING TO IFRS

DKK million	2014	2013
EBITDA – business performance	16,389	15,004
Market value adjustments for the year of financial and physical hedging contracts relating to a future period	5,662	(162)
Gains/losses deferred from previous years relating to contracts, where the hedged production or trade is recognised in business performance EBITDA for the period	(1,718)	(643)
Total adjustments	3,944	(805)
Amount recognised as revenue	4,781	(906)
Amount recognised as cost of sales	(837)	101
EBITDA – IFRS	20,333	14,199

EXPECTED DATE OF TRANSFER TO EBITDA

DKK million	2015	2016	after 2016	Deferred for subsequent recognition at 31 December 2014	2014	2015	after 2015	Deferred for subsequent recognition at 31 December 2013
Oil	(415)	182	39	(194)	(117)	(54)	(106)	(277)

2.6 EMPLOYEE COSTS

DKK million	2014	2013
Wages, salaries and remuneration	3,985	4,011
Share-based payment	57	
Pensions	351	343
Other social security costs	139	129
Other employee costs	49	58
Employee costs before transfers to assets	4,581	4,541
Transfers to assets	(1,245)	(1,050)
Employee costs	3,336	3,491

Pension plans and number of employees

DONG Energy's pension plans are primarily defined-contribution plans that do not commit DONG Energy beyond the amounts contributed. The defined-benefit plans relate to obligations to pay a defined benefit to a few power station employees that are no longer with the company and to public servants taken over from municipally owned regional companies. In 2014, these obligations amounted to DKK 12 million (2013: DKK 13 million).

In 2014, the average number of employees in DONG Energy was 6,416 (2013: 6,692 employees).

Remuneration of Group Executive Management

The remuneration of the Group Executive Management is based on a fixed salary, including personal benefits such as a company car, free telephone, etc., a variable salary, share-based payment and pension for the other members of the Group Executive Management.

Members of the Group Executive Management whose contracts of service are terminated by the company will be entitled to 24 months' pay, including pension, made up of salary during their notice period (12 months) and a termination payment (12 months).

In 2013, Carsten Krogsgaard Thomsen received salary during his notice period (18 months) and a termination payment (12 months). In addition, a termination payment was granted to Anders Eldrup equivalent to 21.5 months' remuneration.

¹ Martin Hintze has waived his right to receive directors' remuneration

² Benny Gøbel has received DKK 175 thousand as a member of the Board of Directors of DONG Energy A/S and DKK 14 thousand (2013: DKK 50 thousand) as a member of the Board of Directors of DONG Energy Thermal Power A/S

³ Mogens Vinther also received separate compensation of DKK 24 thousand.

No remuneration has been paid to the Board representatives (Chairman and Deputy Chairman) on the Nomination Committee.

No agreements on termination payments to Board members have been made, and no termination payments have been made to members of the Board of Directors. Remuneration of the Board of Directors comprises salaries only.

The Board of Directors' shareholdings in DONG Energy A/S

As part of the share programme, the employee representatives on the Board of Directors Hanne Sten Andersen, Benny Gøbel, Poul Dreyer and Jens Nybo Stilling Sørensen in 2014 each subscribed for 372 shares. Other Board members do not hold any shares in the company.

2.7 SHARE-BASED PAYMENT

New share programme in 2014

The Executive Board is covered by a share programme for managers in DONG Energy, which was established in 2014. Through the share programme, around 250 senior employees were invited to subscribe for shares in DONG Energy A/S for an amount equivalent to 60-100% of their annual salary, depending on their level of seniority. Other employees were invited to subscribe for shares in DONG Energy A/S for a nominal value of up to DKK 40,000 subject to a discount of 25% relative to the price paid by the new investors and the senior executives.

Either in the event of an IPO or in 2019 at the latest, managers and employees who have subscribed for shares will be entitled to a number

of free shares (restricted shares), depending on the individual manager's or employee's share purchase and DONG Energy's financial performance benchmarked against 10 comparable European energy companies during the period from November 2013 to the end of the share programme. The number of free shares cannot exceed 125% of the number of shares subscribed for by the individual manager or employee in 2014. This maximum will apply if DONG Energy's performance is rated first or second among the 11 companies included in the above benchmarking. If DONG Energy is rated number 11 in the benchmarking, no free shares will be granted.

If the IPO does not go through, managers and employees may sell

their shares, including free shares, back to the company at the fair market value determined by an independent third party. The granting of free shares is subject to the employees still being employed at the time of the IPO or up until 2019. If the contract of employment is terminated by DONG Energy or due to the employee retiring or taking early retirement, the employee will, however, retain the right to receive free shares. Managers will earn this right gradually during the 2014-2017 period.

Restricted shares

The maximum number of free shares allocated under the share programme if all associated conditions are met can be specified as follows:

	Executive Board	Other members of the Group Executive Management	Senior executives	Other employees	Total	% of total share capital
Maximum number of restricted shares ('000)						
Awarded during the year	119	80	1,356	1,370	2,925	0.7 %
Cancelled				(41)	(41)	0.0 %
Total outstanding restricted shares	119	80	1,356	1,329	2,884	0.7 %
Market value of outstanding restricted shares at the time of granting (DKKm)	8	5	87	85	185	

Valuation of restricted shares at the time of granting

The market value of restricted shares at the time of granting is calculated using a Monte Carlo simulation. The calculation of market value is based on the following assumptions:

	Time of granting 2014
Share price	DKK 107.25
Average volatility, peers	27.2%
Volatility, DONG Energy	27.2%
Estimated dividend per share	DKK 7.1
Risk-free interest rate	0.8% p.a.
Expected term	4.2 years

ACCOUNTING POLICIES

The share programme is initially classified as an equity-based programme on the assumption that an IPO is carried out for DONG Energy A/S. The fair value of the restricted shares and estimates of the number of restricted shares granted are measured at the time of granting and recognised in the income statement under employee costs over the vesting period, and in the balance sheet under equity over the vesting period.

The valuation of the restricted shares and estimates of the number of restricted shares that are expected to be granted are made using a Monte Carlo simulation based on expectations of the DONG Energy share's performance in relation to ten comparable European energy companies.

Intangible assets

Intangible assets comprise goodwill of DKK 281 million (2013: DKK 491 million), rights DKK 511 million (2013: DKK 688 million), CO₂ emissions allowances DKK 396 million (2013: DKK 747 million), completed development projects DKK 70 million (2013: DKK 137 million) and development projects in progress DKK 111 million (2013: DKK 104 million).

Impairment losses

Goodwill

Goodwill has been attributed to the following cash-generating units: Central power stations and A2SEA.

In 2014, goodwill was impaired by a total of DKK 216 million, which was attributable to the German and English sales activities in Customers & Markets.

The impairment losses were due to challenging market conditions. In the cash-generating units, the full impairment charge is allocated to goodwill. The recoverable amounts are determined as a value in use.

Oil and gas activities

In Exploration & Production, property, plant and equipment were impaired by DKK 8,108 million.

Property, plant and equipment under construction was impaired by DKK 6,307 million, of which DKK 2,500 million can be attributed to the Hejre field and DKK 3,807 million to the West of Shetland area. The impairment losses were primarily a result of lower oil and gas prices, but also partly attributable to capital expenditure overruns.

Production assets were impaired by DKK 1,801 million, of which DKK 1,279 million can be attributed to the Norwegian fields Ula, Tambar and

Oselvar, and DKK 522 million can be attributed to the Danish Siri area. The impairment losses were a result of lower oil and gas prices.

The recoverable amount of cash-generating units is determined as a value in use. The calculation of the values in use is based on discount rates before tax of between 8.5% and 16.3%. The specified range reflects differences in risk-free interest and tax rules in the countries in question.

In 2013, the fields in the Siri area were impaired by DKK 922 million, the Gyda field by DKK 476 million and the value of the Ula-Tambar-Oselvar area by DKK 1,832 million. In addition, the ownership interest in the Gassled transmission network was impaired by DKK 433 million.

ADDITIONS, 2014

ADDITIONS, 2013

Other impairment losses

In 2013, the value of the gas-fired power station Enecogen was impaired by DKK 1,000 million, and property, plant and equipment under construction was impaired by DKK 339 million. The power station is part of the Thermal Power segment, and the property, plant and equipment under construction are included in the Wind Power segment.

Capital commitments

DONG Energy has entered into agreements on investments in property, plant and equipment (primarily offshore wind farms) for DKK 42,789 million (2013: DKK 43,241 million) at 31 December 2014.

Collateral

Loans are secured on vessels with a carrying amount of DKK 675 million (2013: DKK 2,274 million, including loans secured on power stations). The outstanding balance is DKK 244 million (2013: DKK 1,744 million).

3.1 INTANGIBLE ASSETS AND PROPERTY, PLANT AND EQUIPMENT CONTINUED

ACCOUNTING POLICIES

Intangible assets

Rights are measured at cost less accumulated amortisation and impairment losses. Gas purchase rights are amortised using the unit-of-production method. Other rights are amortised on a straight-line basis over their estimated future useful lives, which are 5-20 years.

Allocated and purchased CO₂ emissions allowances, including CO₂ credits that are accounted for as rights are measured on recognition at cost. If a grant is received in connection with an allocation, the cost constitutes the actual consideration paid for the allowances, ie nil if the allowances are allocated free of charge. CO₂ emissions allowances are not amortised.

Property, plant and equipment

Property, plant and equipment is measured at cost less accumulated depreciation and impairment losses. In the case of property, plant and equipment, cost is, as a rule, depreciated on a straight-line basis over the estimated future useful lives, which are:

Buildings	20-50 years
Production assets, oil and gas ¹	20-40 years
Wind turbines	20-24 years
Production assets, electricity (thermal) and district heat	20-25 years
Gas transportation system (marine pipelines) and gas storage facilities	20-40 years
Oil transportation system (marine pipeline)	15 years
Distribution networks, gas	20-40 years
Distribution networks, electricity	20-40 years
Fixtures and fittings, tools and equipment	3-10 years

¹ Depreciation is charged using the unit-of-production method based on the ratio of current production to estimated reserves by individual field

Cost comprises purchase price and any costs directly attributable to the acquisition until the date the asset is available for use. The cost of self-constructed assets comprises direct and indirect costs of materials, components, sub-suppliers and labour. Borrowing costs relating to both specific and general borrowing directly attributable to assets under construction

with a lengthy construction period are recognised in cost during the construction period. Cost is increased by the present value of the estimated obligations for decommissioning and restoration to the extent that they are recognised as a provision.

Subsequent costs, for example in connection with replacement of parts of an item of property, plant and equipment, are recognised in the carrying amount of the asset in question when it is probable that future economic benefits will flow to the Group from the expenses incurred. Replaced parts are derecognised from the balance sheet, and their carrying amount is recognised in profit (loss) for the year. All other repair and maintenance expenses are recognised in profit (loss) for the year as incurred.

Exploration assets comprise exploration drilling expenses that relate to successful wells. Costs are recognised using the successful-efforts method. Under the successful-efforts method, exploration expenses for drilling specific exploration wells are recognised in the balance sheet if the well is successful. Recognition in the balance sheet is maintained pending determination of commercial viability. Recognised exploration expenses for commercial discoveries are transferred to property, plant and equipment under construction on commencement of the construction of a field. All exploration expenses determined as unsuccessful are recognised in profit (loss) for the year as other external expenses. Application of the successful-efforts method means that the value of the Group's exploration assets is lower than if the full-cost method had been applied. Exploration assets are not depreciated, as depreciation of such assets does not commence until the assets are available for use, on which date they are transferred to production assets.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Impairment test

Production assets are tested for impairment if there is any indication of impairment. For production assets with a limited lifetime such as oil and gas fields as well as wind turbines, cash flows are calculated based on forecasts for the entire lifetime of the asset. For other production assets, cash flows are calculated based on forecasts for the first five to fifteen years with the addition of terminal value. The determination of the recoverable amount for production assets is based on a number of assumptions where estimates are made that are material to the determination. Such assumptions include future market conditions, market prices of oil, gas, electricity, biofuel,

coal, CO₂, estimated oil and gas reserves, weighted average cost of capital (WACC), exchange rates, etc. The market prices applied are based on available forward prices in a period of up to five years and management's best estimate of a long-term price in the remaining period.

The assessment of oil and gas reserves is based on estimates of both proved and probable reserves (Proved plus Probable/2P). Proved reserves are the estimated volumes of oil and gas that, under existing economic conditions, are recoverable using known technology from reservoirs in which oil or gas has been proved. Probable reserves are those additional reserves that are less likely to be recovered than proved reserves. DONG Energy conducts an annual internal evaluation and review of the Group's reserves. An independent valuer has reviewed DONG Energy's reserves classification system and guidelines and has verified that the internal guidelines are in agreement with the SPE-PRMS guidelines.

Exploration assets are tested for impairment when sufficient data has been obtained to assess each asset's technical and commercial potential and when exploration assets are reclassified to assets under construction. Impairment testing is also carried out if there is any indication of impairment. Significant estimates made in determining the recoverable amount of exploration assets include the timing and the timing of costs in connection with the exploration wells, the results of existing exploration wells and the expectations concerning future exploration wells in the individual fields, including the probability that the exploration wells will result in commercial discoveries.

Useful lives of production assets

The expected useful lives of production assets are determined based on historical experience and expectations concerning the future use of these assets. The expected future applications may subsequently prove not to be realisable, which may require useful lives to be reassessed. Oil and gas production assets are depreciated using the unit-of-production method, which means that the useful lives of these production assets are determined based on expectations concerning annual production and estimated reserves for each field. Changed expectations concerning future annual production and/or estimated reserves for each field may therefore result in a need to reassess the useful lives of the production assets of the individual fields.

3.2 PROVISIONS, CONTINGENT ASSETS AND LIABILITIES

DKK million	2014				2013			
	De-commissioning obligations	Onerous contracts	Other liabilities	Total	De-commissioning obligations	Onerous contracts	Other liabilities	Total
Provisions at 1 January	8,821	2,811	1,978	13,610	8,415	2,911	1,649	12,975

Provisions reversed during the year	(18)	(716)	(265)	(999)			(248)	(248)
Provisions made during the year	769	1,171	1,249	3,189	377	72	1,256	1,705
Change in estimates of other factors	684			684	135			135
Addition on acquisition of enterprises	141			141				
Disposals on divestment of enterprises/transferred from assets held for sale	(62)			(62)	(71)			(71)
Interest element of provisions	416	118		534	363	124	14	501
Provisions at 31 December	10,368	3,084	2,482	15,934	8,821	2,811	1,978	13,610

Decommissioning obligations mainly comprise expected future expenses relating to demolition and decommissioning of oil and gas fields, power stations and wind farms.

Onerous contracts comprise: contract for LNG terminal capacity in the Netherlands, DKK 1,122 million (2013: DKK 475 million), contracts

for leasing of gas storage capacity in Germany, DKK 1,478 million (2013: DKK 2,264 million) and contract regarding Stenlille Gas Storage Facility, DKK 484 million (2013: DKK 0 million).

Other provisions primarily include provisions for guarantee obligations, divestments, CO₂ obligations, expected repayments to electricity

consumers, etc, relating to litigation and contractual disputes, etc. Provisions for CO₂ obligations relate to the Group's own emissions. In 2014, DKK 407 million (2013: DKK 136 million) was spent, and further provisions of DKK 235 million were made (2013: DKK 347 million).

DKK million	2014				2013

3.2 PROVISIONS, CONTINGENT ASSETS AND LIABILITIES CONTINUED

Contingent assets and liabilities

Contingent assets

DONG Energy has deferred tax assets of DKK 20.2 billion (2013: DKK 12.9 billion) that have not been recognised. Reference is made to note 7.2.

DONG Energy has advanced claims against insurance companies regarding the construction of production assets and initiated arbitration proceedings against suppliers regarding long-term, oil-indexed gas sourcing contracts. The claims have not been recognised, as the existence of these assets is subject to several uncertain future events that are outside DONG Energy's control.

Contingent liabilities

Liability to pay compensation

According to legislation, DONG Energy's gas companies, DONG Oil Pipe A/S, DONG E&P A/S and DONG E&P Grønland A/S are liable to pay compensation for damage caused by their oil and gas activities, even where there is no proof of negligence (strict liability). The usual insurance has been taken out to cover any such claims.

Guarantees

DONG Energy A/S has furnished the Danish Ministry for Economic Affairs and the Interior with guarantees for fulfilment of obligations and liability in damages towards the Danish State or third parties incurred by DONG E&P A/S in connection with the company's participation in exploration and production licences, irrespective of whether the obligations and liability rest on DONG E&P A/S alone or jointly and severally with others. The guarantees are not capped, but cannot exceed a sum corresponding to twice DONG E&P's share of each obligation or liability.

As a condition for approval of its participation in gas and oil exploration and production on the Norwegian, UK, Greenland and Faroese continental shelves, DONG Energy A/S has provided a guarantee under which it assumes primary liability as normally required by the local authorities. The guarantees cover obligations and liability incurred or assumed by the DONG E&P Group in connection with its exploration and production activities. The guarantees are not capped, and the DONG E&P Group is jointly and severally liable with the other partners for obligations and liabilities.

Indemnities

The Danish companies in the Group are jointly and severally liable for the Group's jointly taxed income, etc. The total amount of corporation tax payable is stated in the Annual Report of DONG Energy A/S, which

is the administration company for the joint taxation. The Group's Danish companies are also jointly and severally liable for Danish withholding taxes in the form of tax on dividends, on royalty payments and on interest. Any subsequent adjustments to income taxes and withholding taxes may result in the company's liability being higher.

Litigations

DONG Energy is a party to actions relating to the competition authorities' claim that Elsam A/S and Elsam Kraft A/S charged excessive prices in the Danish wholesale electricity market in some periods. Following a merger in 2008, Elsam Kraft A/S is part of DONG Energy Thermal Power A/S.

The Competition Appeals Tribunal has concluded that Elsam A/S and Elsam Kraft A/S abused their dominant position in the wholesale electricity market in Western Denmark to some extent in the periods 1 July 2003 to 31 December 2004 and 1 January 2005 to 30 June 2006 by charging excessive prices. DONG Energy disputes the rulings and has appealed them to the Copenhagen Maritime and Commercial Court.

A group of electricity consumers has filed a claim with the Copenhagen Maritime and Commercial Court for compensation of up to DKK 4.4 billion with addition of interest in connection with the above actions relating to excessive prices in Western Denmark. DONG Energy has made a provision of DKK 298 million (with addition of interest), which has been determined on the basis of the Danish Competition Council's calculation of the consumers' losses.

ACCOUNTING POLICIES

Provisions are recognised when, as a result of an event occurring before or at the balance sheet date, the Group has a legal or constructive obligation, the settlement of which is expected to result in an outflow from the Group of resources embodying economic benefits. A provision for onerous contracts is recognised when the expected benefits to be derived by the Group from a contract are lower than the unavoidable cost of meeting its obligations under the contract.

Decommissioning obligations are measured at the present value of the future liability in respect of decommissioning and restoration as expected at the balance sheet date. The value of the provision is recognised in property, plant and equipment and depreciated together with the associated asset. The increase in time of the present value of the provision is recognised in profit (loss) for the year as financial expenses.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates of the Group's provisions are updated quarterly on the basis of management's expectations.

Decommissioning obligations

Estimates of decommissioning obligations are based on management's expectations concerning timing and scope, future cost level, and adopted laws and regulations on decommissioning.

The timing of decommissioning obligations depends on the useful lives of the assets. In the case of oil and gas fields, the expected useful lives depend on the current estimates of oil and gas reserves. The determination of these reserve estimates is subject to uncertainty, see the section on impairment testing in note 3.1 on property, plant and equipment. There is a statutory requirement for the power stations to be removed no later than 12 years after decommissioning.

In measuring provisions, the costs required to settle the liability are discounted. In determining decommissioning obligations at 31 December 2014, a discount rate of 4.5% is applied, the same discount rate that the Group applied at 31 December 2013. The applied discount rate of 4.5% is still expected to be applied over a prolonged period. The rate has been estimated on the basis of expectations concerning the future, long-term interest rate level, based on the historical interest rate level.

The extent to which decommissioning and restoration will be required is estimated based on current legislation and standards in this area. Expectations concerning the future cost level are based on variables such as expectations concerning the general price trend or the oil price trend, demand conditions and the development in existing technologies.

Onerous contracts

In the course of the Group's operations, a number of commercial contracts have been entered into with fixed terms of contract that may result in the contracts becoming onerous depending on market developments etc, and the obligations incurred by the Group as a result of these contracts may also be subject to uncertainty. The judgements concerning these complex contracts and their future effects are subject to significant uncertainties.

Litigation

When exercising a judgement about a potential liability in connection with litigation, the nature of the litigation, claim or statement is assessed. Other factors taken into account are the development of the case, the judgements and recommendations of legal or other advisers, experience from similar cases, and management's decision on how the Group will react to the litigation, claim or statement.

3.3 INVESTMENTS IN ASSOCIATES AND JOINT VENTURES

Individually material associates			
Name	Ownership interest	Registered office	Activity
Etzel Kavernenbetriebs-gesellschaft mbH & Co. KG	33%	Hamburg, Germany	Gas storage facility

Individually material joint ventures			
Name	Ownership interest	Registered office	Activity
Lincs Renewable Energy Holdings Ltd.	50%	London, UK	Offshore wind farm
Barrow Offshore Wind Ltd.	100% ¹	Berkshire, UK	Offshore wind farm

¹50% in 2013. Refer to note 3.4 Acquisition of enterprises.

The table below provides financial information for the Group's individually material associates and joint ventures. The amounts stated are the overall accounting figures for the individual associates and joint ventures, determined applying the DONG Energy Group's accounting policies.

The most important associates and joint ventures in DONG Energy are Etzel Kavernenbetriebsgesellschaft mbH & Co. KG and Lincs Renewable Energy Holdings Ltd., which owns 50% of the offshore wind farm Lincs Wind Farm Ltd. The Group's share of the loss in associates and joint ventures of DKK 577 million (2013: DKK 768 million loss) has been recognised in the income statement as investments in associates and joint ventures that are deemed to be part of the Group's principal activity as a loss of DKK 93 million (2013: DKK 711 million loss) and as a loss of DKK 484 million (2013: DKK 57 million loss) for those deemed not to be part of the Group's principal activity.

In 2013, Barrow Offshore Wind Ltd. was included as a joint venture due to a 50% ownership interest. In 2014, DONG Energy acquired the remaining 50%, and the investment was therefore consolidated in full at the end of 2014.

Capital commitments

At the end of 2014, the Group had not assumed capital commitments in connection with investments in associates and joint ventures. The capital commitments of DKK 780 million in 2013 included investments in wind farm projects in joint ventures.

Other joint ventures										(326)	1
Total										(768)	2,013

ACCOUNTING POLICIES

Investments in associates and joint ventures are measured in the consolidated financial statements using the equity method.

Profit (loss) of associates and joint ventures that are deemed to be part of the Group's principal activity is presented before EBITDA, while profit (loss) of associates and joint ventures that are deemed not to be part of the Group's principal activity is presented after EBIT.

Associates and joint ventures with a negative equity value are measured at nil. If the Group has a legal or constructive obligation to cover the deficit of the associate or joint venture, the obligation is recognised as a liability. Receivables from associates and joint ventures are measured at amortised cost, and write-downs are made for bad debts.

The proportionate share of associates' and joint ventures' profit after tax and non-controlling interests and after elimination of the proportionate share of intragroup profits (losses) is recognised in profit (loss) for the year.

On acquisition of investments in associates and joint ventures, the purchase method is applied. Gains or losses on disposal of investments in associates and joint ventures are determined as the difference between the selling price and the carrying amount of net assets, including goodwill, at the date of disposal and transaction costs. Gains and losses are recognised in profit (loss) for the year as gain or loss on divestment of enterprises.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Investments in associates and joint ventures are tested for impairment if there is any indication of impairment. Such indications may include changes in regulatory, financial and technological factors and general market conditions.

On initial recognition of joint ventures and joint operations, an assessment is made of whether an investment is a joint venture or a joint operation. In both cases, joint management must be exercised. To decide whether a collaboration can be classified as a joint operation, the corporate form is assessed, and whether only DONG Energy is entitled to the net profit or income and expenses resulting from the operation. In addition, the fact that the parties buy all output, for example the power generated, will lead to the set-up being considered to be a joint operation. This is the case for several of the Group's wind farms as well as the Group's licences to extract oil and gas.

3.4 ACQUISITION OF ENTERPRISES

Acquisition of enterprises in 2014

DONG Energy has obtained control of Barrow Offshore Wind Ltd., which owns and operates an offshore wind farm in the UK. The ownership interest was previously classified as a joint venture and was recognised according to the equity method.

At the time of acquisition, the cost of acquired assets and liabilities, including transferred cash and cash equivalents of DKK 45 million, was

DKK 474 million. After fair value adjustment of net assets, goodwill has been determined at DKK 0.

The chance to acquire additional shares in the wind farm arose as a result of the partner's strategy of releasing capital from offshore wind. Through obtaining control, DONG Energy is better able to optimise its wind portfolio.

The acquisition has contributed with DKK 9 million and DKK 1 million to the Group's revenue and profit (loss) for 2014, respectively.

If DONG Energy had control of Barrow Offshore Wind Ltd. throughout 2014, the Group would have posted revenue for 2014 of DKK 72,025 million and a loss of DKK 2,306 million.

	Existing ownership interest	Ownership interest acquired	DONG Energy ownership interest, total	Acquisition date	Main activity
Barrow Offshore Wind Ltd.	50%	50%	100%	19 December 2014	Electricity generation

Acquisition of enterprises in 2013

There were no business combinations in 2013.

ACCOUNTING POLICIES

Enterprises acquired or formed are recognised in the consolidated financial statements from the date of acquisition or formation. The acquisition date is the date on which DONG Energy effectively obtains control of the acquiree. On acquisition of new enterprises whereby the parent company obtains control of the acquiree, the purchase method is applied, where by the acquiree's identifiable assets, liabilities and contingent liabilities are measured at fair value at the acquisition date.

The consideration transferred in exchange for an acquiree is measured at the fair value of the agreed consideration in the form of assets acquired, liabilities assumed and equity instruments issued. If parts of the consideration are

contingent on future events, these are recognised in the consideration at the acquisition-date fair value. Costs incurred in connection with business combinations are recognised directly in profit (loss) for the year as incurred.

The excess of the cost of the consideration transferred in exchange for the acquiree, the amount of any non-controlling interests in the acquiree and the fair value of the identifiable assets acquired and liabilities and contingent liabilities assumed (goodwill) is recognised as goodwill.

If there is any uncertainty, at the acquisition date, concerning the measurement of identifiable assets acquired and liabilities and contingent liabilities assumed, initial recognition is based on provisional fair values. Subsequent

adjustments, including goodwill, are made retrospectively within twelve months of the acquisition date, and comparative figures are restated. Changes in estimates of contingent consideration are generally recognised directly in profit (loss) for the year.

Non-controlling interests are measured on initial recognition either at fair value or at their proportionate interest in the fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. The measurement of non-controlling interests is elected on a transaction-by-transaction basis.

Comparative figures are not restated to reflect acquisitions or disposals. However, discontinued operations are presented separately.

3.5 GROSS AND NET INVESTMENTS

DKK million	2014	2013
Cash flows from investing activities	(14,796)	(6,483)
Dividends received and capital reduction, reversed	(15)	(39)
Purchase and sale of securities, reversed	10,330	1,204
Loans to associates and joint ventures, reversed	(250)	(760)
Sale of non-current assets, reversed	(10,628)	(15,156)
Gross investments	(15,359)	(21,234)
Transactions with non-controlling interests in connection with divestments	(1)	65
Interest-bearing balances on acquisition and divestment of enterprises	26	111
Sale of non-current assets	10,628	15,156
Total cash flows from divestments	10,653	15,332
Net investments	(4,706)	(5,902)

The table shows the connection between cash flows from investing activities and the adjustments made to gross investments and net investments, respectively.

In 2014, investments totalled DKK 15,359 million. Investments in Exploration & Production consisted primarily of the development of oil and gas fields in Denmark and the UK and associated infrastructure. In Wind Power, the most significant investments were the development of wind power activities. In 2013, investments totalled DKK 21,234 million.

In 2014, cash flows from the divestment of assets and enterprises totalled DKK 10,653 million (2013: DKK 15,332 million).

3.6 DIVESTMENT OF ENTERPRISES

In 2014, gain on divestment of enterprises consist primarily of the proceeds from the divestment of DONG Storage A/S (Stenlille Gas Storage Facility) (Customers & Markets).

In 2013, gain on divestment of enterprises consist primarily of Kraftgården AB (Wind Power), Polish and Danish onshore wind activities (Wind Power), Severn Power Limited (Thermal Power) and Stadtwerke Lübeck (Customers and Markets).

Assets and liabilities related to divested enterprises are shown in the table on the right.

DKK million	2014	2013
Non-current assets	1,002	7,319
Current assets	479	250
Assets classified as held for sale		556
Non-current liabilities	(163)	(430)
Current liabilities	(465)	(3,490)
Liabilities relating to assets classified as held for sale		(115)
Gain on divestment of enterprises in the income statement	1,253	2,045
Selling price on divestment of enterprises	2,106	6,135
Of which selling price receivable	340	(125)
Of which recognised as other provisions	481	57
Cash transferred	206	3,117
Cash selling price on divestment of enterprises	3,133	9,184

ACCOUNTING POLICIES

Enterprises divested are recognised in the consolidated income statement up to the date of divestment. The date of divestment is the date on which DONG Energy A/S or its subsidiaries effectively relinquish control of the enterprise divested.

Comparative figures are not restated to reflect divestments.

Gains or losses on divestment of subsidiaries and associates are determined as the difference between the selling price and the carrying amount of net assets, including goodwill, at the date of divestment and costs necessary to make the sale.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

As a part of the partnership model in Wind Power, the Group has sold ownership interests in wind farms by selling 50% of DONG Energy's ownership interests in the London Array 1 and Westermost Rough wind farms.

In the opinion of management, the divested assets do not constitute an enterprise. The reason for this is, among other things, that no processes in the form of the operation and maintenance of the wind farm are transferred, but only an undivided interest in the wind farm. The proceeds from the divestment of the ownership interests in the wind farms have therefore been recognised as other operating income in the income statement.

Prior to the divestment, the London Array 1 and Westermost Rough wind farms were recognised as joint operations. This method of recognition has been maintained following the partial divestments due to the fact that the

set-up is unchanged; the agreements concluded by the parties still support the parties' joint control and the parties are still obliged to buy all the electricity generated by the wind farm at a price which covers the production costs and administrative expenses borne by the wind farm.

In both cases, DONG Energy has entered into long-term agreements with a view to purchasing and selling the electricity generated by the parties' share of the wind farms. These agreements are deemed not to be leases as DONG Energy is obliged to purchase the electricity generated at a price that is determined on the basis of the market price of electricity. Furthermore, it has been assessed that the agreements are not covered by the provisions of IAS 39, with the exception of the built-in derivative financial instruments related to the pricing.

3.7 NON-CONTROLLING INTERESTS

The DONG Energy Group's subsidiaries with significant non-controlling interests include the following:

	Non-controlling interest	Registered office
A2SEA A/S	49%	Fredericia, DK
Gunfleet Sands Holding Ltd.	49.9%	London, UK
Walney Offshore Windfarms Ltd.	49.9%	London, UK

The figures stated are the subsidiaries'/the Group's aggregated accounting figures.

ACCOUNTING POLICIES

Transactions with non-controlling interests are accounted for as transactions with the shareholder base. Gains and losses on the disposal of equity investments to non-controlling interests are recognised in equity to the extent that the divestment does not result in a loss of control. Net assets acquired are not revalued on acquisition of non-controlling interests. Any difference between the carrying amount and the acquisition or selling price is recognised in equity.

DKK million	2014	2013
Transactions with non-controlling interests		
Dividends paid to non-controlling interests	(528)	(319)
Disposal of equity investments to non-controlling interests	(87)	(303)

4.1 INTEREST-BEARING DEBT

Financing policy

DONG Energy manages its financing activities, debt portfolio and financial resources via various policies that are designed to ensure optimum borrowing terms and at the same time minimise DONG Energy's net financial expenses and liquidity and refinancing risks. It is part of the Group's overall policy to concentrate its borrowing activities in the parent company, as far as possible, and to help to protect the Group against liquidity and refinancing risks by diversifying borrowing activities among various funding sources and maturities and securing robust financial resources in the form of cash and cash equivalents, securities and non-cancellable credit facilities.

Loan arrangements

At 31 December 2014, DONG Energy had loan obligations totalling DKK 6.9 billion (2013: 12.0 billion), primarily to the European Investment Bank and the Nordic Investment Bank. The loans are recognised in the balance sheet under bank loans. The loans offered by these multilateral financial institutions include loans to co-fund infrastructure and energy projects on favourable terms and with maturities exceeding those normally available in the commercial banking market. In connection with these loans the Group may be meet with demands for:

- collateral in the event of the Danish State holding less than 50% of the share capital or voting rights in DONG Energy A/S (change of control), or
- repayment in the event of Moody's or Standard & Poor's downgrading DONG Energy A/S's rating to Baa3 or BBB- or less, respectively.

Furthermore, at 31 December 2014, the Group had loans of DKK 0.7 billion (2013: DKK 0.7 billion) with KfW-IPEX Bank and non-cancellable credit facilities of DKK 17.3 billion (2013: 17.4 billion) with a number of Scandinavian and international banks. In connection with these credit facilities and loans, the Group may be met with demands concerning collateral in the event of other players than a group consisting of the Danish State and Danish electricity distribution companies acquiring more than 50% of the share capital or voting rights in DONG Energy A/S, or in the event of the Danish State ceasing to hold at least 20% of the share capital.

The Group's financing agreements are not subject to any other unusual terms or conditions. Further details of the Group's risk management are provided in the section on risk and risk management on pages 35-39 of the Management's review.

DKK million	2014	2013
Interest-bearing debt comprises:		
Bank loans	7,643	14,826
Issued bonds	28,414	31,330
Bank loans and issued bonds	36,057	46,156
Other interest-bearing debt	656	304
Total interest-bearing debt	36,713	46,460
Interest-bearing assets comprise:		
Securities	24,948	16,118
Cash	6,028	2,894
Receivables from associates and joint ventures	1,116	1,341
Other receivables	643	304
Total interest-bearing assets	32,735	20,657
Total interest-bearing net debt	3,978	25,803
Adjusted interest-bearing net debt is calculated by adjusting the interest-bearing net debt for the following items:

Cash and securities not available for distribution, excluding repo loans	2,519	1,678
Present value of operating lease payments	4,495	3,933
Decommissioning obligations	10,368	8,821
Deferred tax on decommissioning obligations	(4,165)	(3,471)
Adjusted interest-bearing net debt	23,813	43,382
Funds from operation (FFO) ¹	8,605	10,026
Funds from operation (FFO) / adjusted interest-bearing net debt	36.1%	23.1%

¹ See note 4.3 for further specifications.

Fair value of bank loans and issued bonds

At 31 December 2014, the fair value of issued bonds and bank loans was DKK 33.9 billion (2013: DKK 34.0 billion) and 7.9 billion (2013: DKK 15.0 billion), respectively.

The fair value of issued bonds (Level 1 – quoted prices) has been determined as the market value at 31 December.

The fair value of bank loans (Level 2 – observable inputs) has been determined as the present value of expected future instalments and interest payments using the Group's current interest rate on loans as discount rate.

Hybrid capital

At 31 December 2014, DONG Energy had issued hybrid capital with a principal amount totalling DKK 13,398 million (2013: DKK 13,428 million) due in 3005 (DKK 4,466 million) and 3013 (8,932 million). For further details on the hybrid capital, reference is made to note 8.2.

4.1 INTEREST-BEARING DEBT

CONTINUED

Hedging of future interest payments

DONG Energy's interest rate risks relate to:

- Interest-bearing liabilities
- Interest-bearing assets
- Financial price hedges

As part of its risk management, DONG Energy has hedged part of its future interest payments. The hedging is in the form of raising of fixed-interest debt and entering into interest rate swaps. The interest rate risk is managed actively through a duration of net debt target.

At the end of 2014, 88% (2013: 71%) of DONG Energy's debt was fixed-rate.

The loan portfolio had an average time to maturity of 10.5 years (2013: 10.2 years).

Interest-bearing assets predominantly consist of short-term bonds with limited risk.

The table on the right shows interest rate swaps hedging interest payments on the loan portfolio, ensuring that interest payments are fixed.

DKK million	Notional amount	Fair value	Recognition in comprehensive income	Expected date of transfer to profit (loss) for the year		
				2015	2016	After 2016
Interest rate swaps at 31 December 2014	5,761	(552)	(574)	(131)	(131)	(312)
				2014	2015	After 2015
Interest rate swaps at 31 December 2013	5,975	(431)	(495)	(125)	(93)	(277)

ACCOUNTING POLICIES

Issued bonds, bank loans and other payables are at inception recognised at fair value (typically proceeds received) net of transaction costs incurred. In subsequent periods, the liabilities are measured at amortised cost so that the difference between the cost (proceeds) and the nominal value is recognised in profit (loss) for the year as interest paid over the term of the loan, using the effective interest rate method.

Financial liabilities are classified as current unless the Group has an unconditional right to defer settlement of the liability to at least one year after the balance sheet date.

4.2 FINANCIAL RESOURCES

Cash management

The implementation of DONG Energy's strategy requires financing in the form of loans in addition to the free cash flows generated by operations and by the divestment of assets.

DONG Energy's liquidity and financing risks are managed centrally in accordance with principles and delegated authorities laid down by the Board of Directors. One of the most important financial management tasks in DONG Energy is to secure sufficient and flexible financial resources in relation to the day-to-day operations, the Group's investment programme and the debt maturity profile. For this purpose, internal management targets have been set for the required level of financial resources.

Cash and cash equivalents and securities

Cash not available for use primarily comprises cash and cash equivalents tied up for use in jointly controlled wind farm projects and operated oil and gas licences, cash and cash equivalents pledged as collateral for trading in financial instruments, cash and cash equivalents to cover insurance-related provisions, and cash and cash equivalents received from the users of the North Sea oil pipeline for use for pipeline maintenance.

Securities are a key element in the Group's financial resources, for which reason investments are primarily made in liquid AAA-rated Danish mortgage bonds that qualify for repos in Danmarks Nationalbank.

Securities not available for use comprise securities that form part of genuine sale and repurchase transactions (repo transactions), securities used to cover insurance provisions, and securities used as collateral in respect of trading in financial instruments.

Because securities are a key element of the Group's financial resources, the Group invests primarily in bonds that have a high credit rating, an insignificant price risk and are highly liquid.

At 31 December 2014, DONG Energy had received collateral from trading in financial instruments of DKK 321 million (2013: DKK 192 million).

SECURITIES – EXPIRY DATES

DKK million	2015-16	2017-19	2020-	2014	2014-15	2016-18	2019-	2013

¹ This includes expected early repayment of bank loans of DKK 4.5 billion.

The maturity analysis above does not include hybrid capital. At 31 December 2014, DONG Energy had issued hybrid capital with a principal amount totalling DKK 13,398 million due in 3005 (DKK 4,466 million) and 3013 (DKK 8,932 million).

The maturity analysis is based on undiscounted cash flows, including estimated interest payments. Interest payments are based on market conditions and interest-rate hedging entered into at 31 December.

MATURITY PROFILE, DKK billion

The above figure indicates the maturity profile of DONG Energy's loans and issued bonds. At 31 December 2014, outstanding loans and issued bonds totalled DKK 36.3 billion (2013: DKK 46.1 billion).

OUTSTANDING BONDS AT 31 DECEMBER 2014

Hybrid bonds				
EUR	600	5.500	Year 3005	Luxembourg
EUR	700	6.250	Year 3013	Luxembourg
EUR	500	4.875	Year 3013	Luxembourg

ACCOUNTING POLICIES

Securities comprise bonds that are monitored, measured and reported at fair value on an ongoing basis in conformity with the Group's investment policy. Changes in fair value are recognised in profit (loss) for the year as financial income and expenses.

For listed securities, fair value equals the market price, and for unlisted securities, fair value is estimated based on generally accepted valuation methods and market data.

Sold securities where a repurchase agreement (repo transactions) has been made at the time of sale are recognised in the balance sheet at the settlement date as if the securities were still held. The amount received is recognised as a liability, and the difference between the selling price and the purchase price is recognised in profit (loss) for the year over the term as interest. The return on the securities is recognised in profit (loss) for the year.

4.3 FUNDS FROM OPERATION (FFO), DIVIDENDS AND HYBRID CAPITAL COUPON

FUNDS FROM OPERATION (FFO)

DKK million	2014	2013
EBITDA – business performance	16,389	15,004
Interest expense, net	(1,145)	(1,661)
Reversal of interest expense transferred to assets	(339)	(282)
Interest element of decommissioning obligations	(416)	(363)
50% of hybrid capital coupon payments	(377)	(337)
Calculated interest expenses on operating lease obligations	(217)	(153)
Adjusted interest expense, net	(2,494)	(2,796)
Reversal of recognised operating lease payment in profit (loss) for the year	545	354
Total current tax	(5,835)	(2,536)
Funds from operation (FFO)	8,605	10,026

Funds from operation (FFO)

In 2014, FFO to adjusted net debt was introduced as a new capital structure target. The long-term target is for FFO to be around 30% of adjusted interest-bearing net debt.

FFO is calculated on the basis of EBITDA calculated in accordance with business performance and is adjusted for interest expenses and the interest element of decommissioning obligations as well as for 50% of the hybrid capital coupon payments as well as calculated interest expenses on the Group's operating lease obligations.

DIVIDENDS AND HYBRID CAPITAL COUPON

DKK million	2014	2013
Dividends paid to non-controlling interests	(528)	(319)
Dividends received and capital reductions	15	39
Coupon payments to hybrid capital holders	(754)	(675)
Dividends and hybrid capital coupon	(1,267)	(955)

4.4 FINANCIAL INCOME AND EXPENSES

DKK million	2014	2013
Interest income from cash etc.	173	267
Interest received from securities at fair value	499	297
Capital gains on securities at fair value	21	19
Foreign exchange gains	3,390	2,091
Value adjustments of derivative financial instruments	1,151	554
Other financial income	27	45
Financial income	5,261	3,273
Interest expense relating to loans and borrowings	(2,156)	(2,507)
Interest expense transferred to assets	339	282
Interest element of provisions	(534)	(501)
Capital losses on securities at fair value	(302)	(214)
Foreign exchange losses	(2,957)	(1,709)
Value adjustments of derivative financial instruments	(1,321)	(1,916)
Other financial expenses	(40)	(508)
Financial expenses	(6,971)	(7,073)
Financial income and expenses are presented in the internal management reporting as follows		
Interest expense, net	(1,145)	(1,661)
Interest element of provisions etc	(572)	(501)
Early redemption of loans and associated interest rate swaps ¹		(665)
Value adjustments of derivative financial instruments, net ¹	(255)	(293)
Exchange rate adjustments, net ¹	534	(210)
Divestment of assets held under finance leases		(201)
Value adjustments of securities, net	(297)	(189)
Other financial income and expenses, net	25	(80)
Net financial income and expenses	(1,710)	(3,800)

¹ Derivative financial instruments entered into to hedge currency risks are presented in the internal management reporting together with exchange rate adjustments in the line 'exchange rate adjustments, net'. Capital losses on early repayment of interest rate swaps are also presented separately, in the line 'capital losses on early repayment of loans and interest rate swaps'.

Exchange rate adjustments of currency derivatives are recognised in revenue and cost of sales with a loss of DKK 922 million (2013: DKK 656 million loss).

Borrowing costs transferred to assets under construction are calculated at the weighted average effective interest rate for general borrowing, which was 4.1% (2013: 4.0%).

In 2013, DONG Energy sold the gas-fired Mongstad power station in Norway to Statoil. The loss on the sale is recognised in financial expenses, as the lease had been recognised for accounting purposes as an asset held under a finance lease.

ACCOUNTING POLICIES

Fair value adjustments of interest rate and currency derivatives that have not been entered into to hedge revenue, cost of sales or non-current assets are presented as financial income or expenses.

5 WORKING CAPITAL

The Group continuously strives to reduce funds tied up in working capital

IN THIS SECTION

- 5.1 Inventories
- 5.2 Construction contracts
- 5.3 Trade receivables
- 5.4 Other receivables
- 5.5 Other payables
- 5.6 Change in net working capital

1,203m

The Group's funds tied up in working capital totalled DKK 1,203 million

WORKING CAPITAL

DKK million	2014	2013
Inventories	2,938	3,560
Construction contracts, net	144	1,475
Trade receivables	8,346	8,875
Other receivables	1,736	3,306
Receivables from associates and joint ventures	2	98
Trade payables, excluding capital investments	(6,616)	(5,796)
Other payables	(5,347)	(7,368)
Working capital at 31 December	1,203	4,150

2,947m

The Group reduced working capital by DKK 2,947 million in 2014

WORKING CAPITAL, DKK million

5.1 INVENTORIES

DKK million	2014	2013
Biomass	74	78
Gas	727	1,801
Coal	309	459
Oil	173	211
Green certificates	1,390	817
CO ₂ emissions allowances	179	96
Other inventories	86	98
Inventories at 31 December	2,938	3,560

ACCOUNTING POLICIES

In the case of gas, cost is determined as a weighted average of the previous month's buying prices, including transportation costs.

Allocated and purchased CO₂ emissions allowances that form part of the Group's trading activities to generate gains from short-term price fluctuations are measured at fair value.

Other inventories are measured at cost using the first-in, first-out (FIFO) principle or net realisable value. Inventories are written down to net realisable value whenever the cost exceeds the net realisable value.

5.2 CONSTRUCTION CONTRACTS

DKK million	2014	2013
Selling price of construction contracts	4,861	9,125
Progress billings	(4,717)	(7,650)
Construction contracts at 31 December	144	1,475
Construction contracts (assets)	1,811	1,890
Construction contracts (liabilities)	(1,667)	(415)
Construction contracts at 31 December	144	1,475

When it is probable that total contract costs on a construction contract will exceed total contract revenue, the expected loss on the contract is recognised as an expense and a provision.

Where the selling price of work performed on construction contracts exceeds progress billings and expected losses, the contracts are recognised as receivables. Where progress billings and expected losses exceed the selling price of construction contracts, the contracts are recognised as liabilities. Prepayments from customers are recognised as liabilities.

Construction contracts in progress relate to the construction of 50% of the offshore wind farms Borkum Riffgrund 1 and Gode Wind 2, which are owned by co-investors (expected to be handed over in 2015 and 2016, respectively) and the construction of three offshore transmission assets in the UK (expected to be handed over in 2015 and 2017). In 2013, the figure included 50% of the construction of Anholt offshore wind farm, which was handed over in 2014.

ACCOUNTING POLICIES

Construction contracts are recognised in revenue and primarily comprise the construction of assets for third parties involving a high degree of customisation in terms of design.

When the outcome of a construction contract can be estimated reliably, the contract is measured at the selling price of the work performed less progress billings, based on the completion degree of the contract at the balance sheet date and total expected income from the contract.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The determination of the expected selling price of construction contracts includes estimates of the stage of completion, the value of incentive agreements, liabilities assumed, etc., based on the individual contract. The determination of profit on payments received on account and the recognition of receivables are therefore subject to uncertainty. The determination is based on management's estimates of the most likely outcomes of future events.

5.3 TRADE RECEIVABLES

The Group's trade receivables primarily concern residential customers in Customers & Markets, where the general terms of payment vary according to customer type and product type down to payment terms of 10 days.

Write-downs for the year totalled DKK 17 million (2013: DKK 48 million). Losses for the year totalled DKK 63 million (2013: DKK 53 million). Trade receivables can be specified as follows:

DKK million	2014	2013
Trade receivables, not overdue	7,544	8,401
Trade receivables, 1-30 days overdue	676	286
Trade receivables, more than 30 days overdue	229	353
Trade receivables, write-down	(103)	(165)
Trade receivables at 31 December	8,346	8,875

ACCOUNTING POLICIES

A write-down is made for expected losses where there is an indication that a receivable or a portfolio of receivables is impaired. The write-down is calculated as the difference between the carrying amount and the net present value of expected future cash flows associated with the receivable. The discount rate used is the effective interest rate for the individual receivable or the individual portfolio.

5.4 OTHER RECEIVABLES

DKK million	2014	2013
Receivables from the divestment of equity investments to non-controlling interests	408	229
Receivables from the divestment of assets and equity investments	665	367
VAT and other indirect taxes receivable	369	623
Central clearing counterparties	546	1,656
Prepayments	892	1,009
Other receivables	990	1,323
Other receivables	3,870	5,207
Of which working capital	1,736	3,306
Of which other capital employed	1,491	1,597
Of which interest-bearing net debt	643	304

Other receivables

Trade receivables from the divestment of assets and equity investments concern primarily the divestment of 50% of the UK offshore wind farm project Westermost Rough and 50% of DONG Energy's ownership interest in the UK offshore wind farm London Array 1 (Wind Power) as well as the reduction in ownership interest from 80% to 20% of the Glenlivet licence (Exploration & Production).

The Group's central clearing counterparties comprise receivables from banks in connection with exchange trades.

Prepayments consist primarily of prepaid drilling equipment and spare parts for ongoing expansions and prepayments to partners.

The short-term portion of other receivables amounts to DKK 3,357 million) (2013: DKK 4,929 million).

5.5 OTHER PAYABLES

DKK million	2014	2013
Payables to associates and joint ventures	264	
Prepaid VAT on exports	1,357	1,359
CO ₂ rights	179	362
VAT and other indirect taxes payable	1,397	2,182
Pay-related items payable	825	888
Accrued interest	766	855
Virtual gas storage	167	593
Deferred income	3,909	3,252
Other payables	1,640	2,125
Other payables	10,504	11,616
Of which working capital	5,347	7,368
Of which other capital employed	4,501	3,944
Of which interest-bearing net debt	656	304

Other payables

Deferred income consists primarily of payments regarding connections to the electricity grid (Customers & Markets) and prepayments from heat customers (Thermal Power).

The short-term portion of other payables amounts to DKK 5,905 million (2013: DKK 7,658 million).

5.6 CHANGE IN NET WORKING CAPITAL

DKK million	2014	2013
Change in inventories	705	199
Change in construction contracts	1,435	(685)
Change in trade receivables	450	(1,305)
Change in other receivables	1,650	(195)
Change in trade payables	800	(532)
Change in other payables	(2,017)	464
Change in net working capital	3,023	(2,054)

Change in net working capital

The change in net working capital is due partly to lower receivables from contracts for the construction of offshore wind farms with co-investors and offshore transmission assets in connection with wind farms in the UK, and partly to lower trade receivables due to lower electricity and heat generation and lower gas sales.

6 RISK MANAGEMENT

DONG Energy's activities create exposures which, based on the risk management policy, are actively managed to reduce the impact of these exposures

IN THIS SECTION

- 6.1 Hedge accounting and economic hedging
- 6.2 Market risks
- 6.3 Credit risks

To reduce the fluctuations in the Group's cash flows in the short and medium term, hedging agreements are concluded within the risk management horizon (up to five years).

GROUP EXPOSURE AFTER HEDGING, DKK billion

The figure shows the Group's annual exposure from oil, gas and electricity after hedging

6.1 HEDGE ACCOUNTING AND ECONOMIC HEDGING

As an energy company, DONG Energy is very much impacted by what happens in the outside world. Material financial risks include:

- Changes in market prices, including energy prices and exchange rates
- Changes in interest rates
- The risk of losses on counterparties

The Group's most important market risks relate to the markets for oil, gas and electricity. Management of these market risks is based on the Group's desire for stable financial key figures. The positions are primarily entered into to reduce DONG Energy's risk.

The method of recognition and classification of hedging transactions depends on the purpose of the hedging:

- Economic hedging comprises hedging of energy-related risks, including related currency risks. These hedging contracts are treated as hedge accounting in accordance with business performance, whereby the value adjustment is postponed and only recognised during the period in which the hedged transaction takes place. Under IFRS, the value adjustment of this type of hedging is recognised directly in the income statement.
- Hedging of the fair value of securities or currency comprises hedging of recognised assets or liabilities.
- Hedging of cash flows concerning interest rates comprises hedging of future interest payments.
- Hedging of net investments comprises hedging of the currency risk associated with investments in assets located in foreign countries. DONG Energy's hedging of the exposure to GBP is divided into two elements. In the first five years, hedging is classified as economic hedging in connection with electricity generation in the UK, while hedging beyond this period is performed as hedging of net investments.

The aim of the trading portfolio for energy, currency and interest is to utilise short-term price fluctuations.

OVERVIEW OF THE GROUP'S POSITIONS

		31 December 2014				31 December 2013			
		Energy		Currency/interest		Energy		Currency/interest	
DKK million	Note	Contractual principal amount	Fair value	Contractual principal amount	Fair value	Contractual principal amount	Fair value	Contractual principal amount	Fair value

Total		36,144	4,690	71,129	(1,820)	43,363	763	82,120	(135)

ACCOUNTING POLICIES

DONG Energy applies the provisions on hedge accounting to derivative financial instruments and loans for hedging currency and interest rate risks. From 2011 hedging of commodities and related foreign exchange exposures is not accounted for as cash flow hedge accounting. Market value adjustments of these, which were previously recognised in comprehensive income and a special reserve in equity, are recognised in profit (loss) for the year as

the underlying transactions are realised or if the hedges are judged to no longer be effective.

Value adjustments of financial contracts that are not used as economic hedges of the Group's principal activities or are part of the Group's trading portfolio are recognised as financial income and expenses.

6.1 HEDGE ACCOUNTING AND ECONOMIC HEDGING CONTINUED

Financial income and expenses

In financial income and expenses, currency derivatives are recognised which are not related to hedging of energy and net investments. In the table, this portion of currency is presented as trading portfolio. Interest rate derivatives which are not used for cash flow hedging are presented as trading portfolio, where interest rate derivatives used for cash flow hedging are recognised in other comprehensive income and with expected transfer to financial income and expenses.

The scope of DONG Energy's hedging and trading activities that affect financial income and expenses can be seen in the table to the right.

Cash flow hedging

In connection with the transition to business performance in 2011, the effective part of cash flow hedging of currency was locked in equity. The locked values are transferred to the income statement in step with the realisation of the underlying exposure. The remaining portion of cash flow hedging of currency is expected to be transferred to financial income and expenses in 2015 in the amount of a DKK 36 million loss. (2013: transferred in 2014: DKK 38 million loss and transferred in 2015: DKK 40 million loss). The fair value of the remaining currency hedging is DKK 0 million. (2013: DKK 0 million).

In 2014, DKK 0 million were expensed (2013: DKK 478 million) concerning interest rate swaps relating to loans. In 2013, a larger portion of the hedged loan portfolio was repaid, which resulted in the recognition of the market value of the related interest rate swaps. For a further specification of interest rate hedging, reference is made to note 4.1.

TRADING PORTFOLIO, CURRENCY AND INTEREST RATE

DKK million	2014		2013	
	Contractual principal amount	Fair value	Contractual principal amount	Fair value
Currency at 31 December				
Forward exchange contracts and currency swaps	2,043	(87)	1,331	(134)
Interest at 31 December				
Interest rate swaps	2,746	50	4,952	81
Total derivative financial instruments	4,789	(37)	6,283	(53)

Ineffectiveness of currency hedging amounted to a charge of DKK 4 million (2013: DKK 85 million charge).

ACCOUNTING POLICIES

Changes to the fair value of hedging instruments that qualify for recognition as a hedge of future cash flows and that provide an effective hedge against changes in the value of the hedged item are recognised in other comprehensive income within a separate hedging reserve. On realisation of the hedged cash flow, the resulting gain or loss is transferred from equity and recognised in the same item as the hedged item. However, on hedging of

proceeds from future loans, the resulting gain or loss is transferred from equity over the term of the loan.

If the hedged cash flows are no longer expected to be realised, the accumulated value change is transferred immediately to profit (loss) for the year.

HEDGING OF FAIR VALUE, CURRENCY

DKK million	EUR	USD	GBP	NOK	Other	2014	EUR	USD	GBP	NOK	Other	2013
Assets	16,871	779	6,833	431	321	25,235	12,036	2,180	4,646	976	395	20,233
Liabilities	(31,292)	(1,516)	(16,267)	(526)	(105)	(49,706)	(34,592)	(2,911)	(15,298)	(612)	(53)	(53,466)
Hedged using hedging instruments	4,020		11,894			15,914	5,036		10,079			15,115
Net position	(10,401)	(737)	2,460	(95)	216	(8,557)	(17,520)	(731)	(573)	364	342	(18,118)
Fair value of hedging instruments	(11)		622			611	17		(144)			(127)

In the above table, the currency risk from financial assets and liabilities is presented. A portion of this currency risk is hedged, primarily through the use of forward exchange contracts and currency swaps. Hedges are recognised as fair value hedges when the hedged item is a recognised financial asset or a financial liability.

ACCOUNTING POLICIES

Changes in the fair value of derivative financial instruments that are designated as and qualify for recognition as hedges of the fair value of a recognised asset or liability are recognised in profit (loss) for the year together

with changes in the value of the hedged asset or liability to the extent of the hedged risk.

6.1 HEDGE ACCOUNTING AND ECONOMIC HEDGING CONTINUED

Hedging of net investments in foreign subsidiaries

DONG Energy's foreign activities entail a currency risk. This risk is hedged through raising of loans in foreign currencies as well as forward exchange contracts and currency swaps. The table to the right presents DONG Energy's investments in foreign currency as well as associated hedges.

In connection with its net investments, the Group has hedged future investments with a contract value of DKK 0 million (2013: DKK 5,263 million) and a market value of DKK 0 million (2013: DKK 0 million).

Ineffectiveness relating to hedging of net investments in foreign subsidiaries was DKK 24 million (2013: DKK 8 million).

ACCOUNTING POLICIES

Changes in the fair value of derivative financial instruments and loans that are used to hedge net investments in foreign subsidiaries or associates and that provide effective hedges against changes in foreign exchange rates in these enterprises are recognised in the consolidated financial statements directly in equity within a separate translation reserve.

6.2 MARKET RISKS

Market risk is the risk that changes in market prices such as commodity prices, exchange rates and interest rates will affect DONG Energy's profit and/or equity.

The market risk associated with commodities primarily relates to portfolio management and trading activities. DONG Energy is exposed to two types of energy risk: fluctuations in market prices and fluctuations in volumes due to the fluctuating needs of the underlying business.

Via its day-to-day activities, DONG Energy is exposed to fluctua-

tions in the prices of gas, oil, electricity, coal and CO₂ and, to a lesser extent, other commodities.

DONG Energy trades actively in these commodities in the relevant markets to hedge and optimise its supply requirements and secure the Group's supply chain. In this connection, DONG Energy uses derivatives to hedge its positions.

As a result of its activities, DONG Energy is primarily exposed to USD, GBP and NOK. The Group hedges currency risk to mitigate the effect of exchange rate movements.

Sensitivity analysis

The sensitivity analysis in the table shows the effect of market value changes assuming a relative price change at 31 December 2014. Effect on profit (loss) before tax comprises financial instruments that remained open at the balance sheet date and have an effect on profit (loss) in the financial year in question. Effect on profit (loss) before tax is divided into trading portfolio and economic hedging. Effect on profit of financial instruments allocated to economic hedging is offset, over time, by the opposite effect of the hedged exposure. The illustrated sensitivity is therefore only temporary, unlike the effect on profit of financial instruments allocated as trading portfolio, which is not offset by an underlying exposure. Effect on equity before tax comprises financial instruments that remained open at the balance sheet date and are value-adjusted directly in equity. Besides derivative financial instruments on commodities and currency, financial instruments in this context include receivables and payables in foreign currencies.

The illustrated sensitivities only comprise DONG Energy's financial instruments and therefore omit the effect from contracts concluded under which physical delivery of the underlying assets is made, as these are not recognised as financial instruments in accordance with IAS 39. If the underlying exposure had been included in the sensitivity analysis, the effect of a price change would have been reduced.

Net investments and associated hedging of net investments in foreign subsidiaries are not included in the table, as the effect of the sum of the investment and the hedging is considered to be neutral to price changes. A 10% increase in the currencies hedged in connection with net investments would reduce equity by DKK 2,346 million (2013: DKK 3,875 million decrease) arising from the hedging instruments. All other conditions being equal, a decrease in the exchange rate would have had a corresponding opposite effect. For further details on currency positions hedged by hedging of net investments, reference is made to note 6.1, hedging of net investments in foreign subsidiaries.

Further details of the Group's risk management are provided on pages 35-39 of the Management's review.

Effect on profit (loss) before tax is broken down by sensitivity of the portion that is recognised in:

- Trading portfolio, these contracts will affect profit.
- Economic hedging, including commercial contracts. The market value changes of contracts allocated as economic hedging will be offset, wholly or in part, by a change in the hedged risk.

SENSITIVITY ANALYSIS OF FLUCTUATIONS IN COMMODITIES AND CURRENCIES

Interest	100 basis points	(426)		222	(199)		258

¹ Economic hedging comprises derivatives entered into to hedge future financial risks. The market value changes of these contracts will be offset, wholly or in part, by a change in the hedged risk. Also included are commercial contracts recognised at fair value.

6.3 CREDIT RISKS

DONG Energy's counterparty risks are largely concentrated on large international energy companies and banks. Such trading is regulated under standard agreements, such as EFET and ISDA agreements, which feature, for instance, credit rating and netting provisions. DONG Energy seeks to limit credit risks by systematically rating its counterparties within the fields of energy trading and financial activities, by extending a credit limit or demanding that collateral be furnished. The counterparties and credit limits granted are monitored on an ongoing basis.

The monitoring of counterparties and granting of credit limits are based on the framework established by the Board of Directors and the Executive Board. For the most important counterparties, an internal credit rating is required. Information from external credit rating agencies, publicly available information and own analyses are included in the determination of an internal rating and the granting of credit limits.

DONG Energy has not suffered any losses from any single major counterparty in 2014, and despite a steadily increasing proportion of

non-performing debt in private households and only a marginal fall in bankruptcies

for business customers, the ratio of overdue balances to revenue for the residential customer remained at an unchanged level compared with 2013.

The credit quality of the Group's financial assets is primarily assessed for the items derivative financial instruments, cash and bond portfolios and receivables, and is based on the individual counterparty's ratings with Standard & Poor's and Moody's. Positions have been calculated before offsetting any collateral, and the figures therefore do not reflect the Group's actual credit risk.

The AAA/Aaa category covers DONG Energy's position in Danish AAA-rated government and mortgage bonds and the category other predominantly consists of trade receivables from customers such as end-users and PSO customers.

THE CREDIT QUALITY OF THE GROUP'S COUNTERPARTIES CAN BE SUMMARISED AS FOLLOWS:

DKK million	2014	2013
Clearing centres	1,967	2,336
AAA/Aaa	18,962	13,969
AA/Aa	6,294	2,345
A/A	8,476	7,697
BBB/Baa	4,463	3,029
Other	15,161	15,474
Total credit risk	55,323	44,850

The increased credit exposure can mainly be explained by the increase in the Group's portfolio of securities and cash and cash equivalents.

OFFSETTING OF FINANCIAL ASSETS

DKK million	Derivative financial instruments	Trade receivables	2014	Derivative financial instruments	Trade receivables	2013
Financial assets, gross	21,606	17,697	39,303	3,835	19,484	23,319

OFFSETTING OF FINANCIAL LIABILITIES

DKK million	Derivative financial instruments	Trade payables	2014	Derivative financial instruments	Trade payables	2013
Financial liabilities, gross	21,418	18,462	39,880	3,397	19,940	23,337
Financial assets, offset	(15,635)	(15,100)	(30,735)	(2,307)	(17,275)	(19,582)
Financial liabilities in the balance sheet	5,783	3,362	9,145	1,090	2,665	3,755
Amounts not offset in the balance sheet						
Assets with right of set-off	(1,052)		(1,052)	(352)		(352)
Collateral provided in the form of bonds	(823)		(823)	(283)		(283)
Net	3,908	3,362	7,270	455	2,665	3,120

Offsetting of financial assets and liabilities

The offsetting agreements with the individual counterparties are often limited to offsetting within specific products. In addition, the settlement of liabilities and the realisation of assets often do not take place simultaneously. Consequently, only some of the Group's offsetting agreements meet the IFRS offsetting rules.

The table to the left shows financial assets and liabilities that are subject to offsetting agreements, and related collaterals: The increase in the amount offset in derivative financial instruments is primarily attributable to the increase in the market value of oil-related trades.

ACCOUNTING POLICIES

Positive and negative values are only offset if the enterprise is entitled to and intends to settle several financial instruments net.

7 TAX

DONG Energy is subject to a number of complex tax regimes which affect the recognised tax in the Annual Report. Among other things, DONG Energy is subject to Danish, English and Norwegian hydrocarbon taxation and international joint taxation in Denmark

IN THIS SECTION

- 7.1 Tax on profit (loss) for the year
- 7.2 Deferred tax

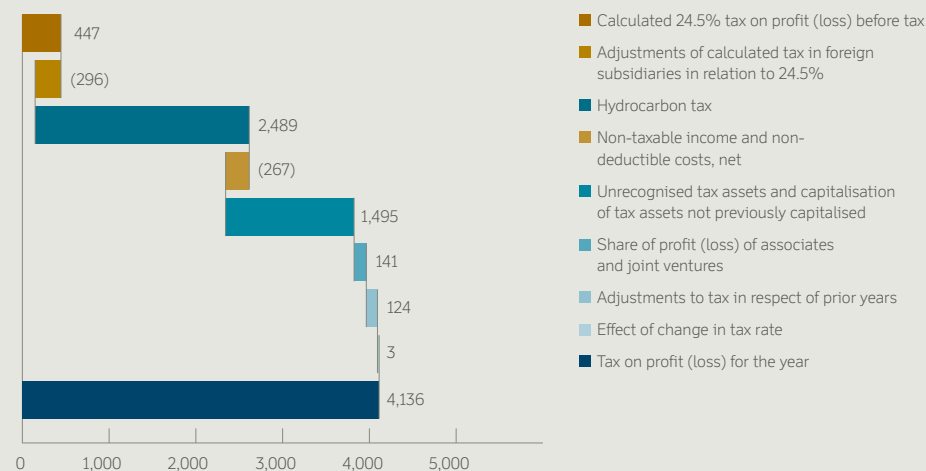

4,136m

Tax on profit (loss) for the year according to IFRS in 2014

3,835m

In 2014, the DONG Energy Group paid DKK 3,835 million in income tax and hydrocarbon tax in Denmark and Norway

EXPLANATION OF TAX FOR THE YEAR, DKK million

7.1 TAX ON PROFIT (LOSS) FOR THE YEAR

DONG Energy A/S is taxed jointly with its Danish and foreign subsidiaries (international joint taxation). DONG Energy's subsidiaries are included in the joint taxation from the date they are included in the consolidation in the consolidated financial statements and up to the date on which they are no longer included in the consolidation.

Tax on profit (loss) for the year, which consists of income tax and changes in deferred tax, is recognised in profit (loss) for the year except for the portion that relates to entries directly to other comprehensive income.

Subsidiaries that are engaged in oil and gas extraction (hydrocarbons) are subject to the hydrocarbon tax legislation in the countries in which they operate. Hydrocarbon taxes are calculated on the basis of taxable hydrocarbon income and comprise taxes calculated applying the respective country's ordinary income tax rate as well as taxes calculated applying increased tax rates. Hydrocarbon taxes are recognised under tax on profit (loss) for the year.

Tax on profit (loss) for the year amounts to DKK 4,136 million (2013: DKK 1,015 million) of a profit before tax of DKK 1,826 million. (2013: loss of DKK 576 million).

The tax rate primarily reflected positive earnings from oil and gas production in Norway, where hydrocarbon income is taxed at 78%, as well as non-deductible impairment losses in 2014.

Tax on profit (loss) for the year was also affected by non-taxable income and non-deductible expenses relating to divestment of assets and enterprises amounting to DKK 680 million (2013: DKK 416 million).

Finally, tax on profit (loss) for the year is affected by unrecognised

Other non-current liabilities	(900)	3	65	217	46	(116)	(685)
Current liabilities	(285)			(31)		8	(308)
Retaxation	2,911			(329)		181	2,763
Tax loss carryforwards	(2,787)	23	(51)	384	73	399	(1,959)
Deferred tax	6,652	(497)	149	(1,288)	202	148	5,366

Of the deferred tax of DKK 3,649 million (2013: DKK 5,366 million), DKK 548 million (2013: DKK 226 million) is expected to fall due within 12 months.

Unrecognised deferred tax assets amounted to DKK 20,160 million (2013: DKK 12,949 million) at 31 December 2014 and related primarily

to unutilised losses in hydrocarbon income in Denmark and the UK. It is considered unlikely that these losses can be utilised in the foreseeable future.

ACCOUNTING POLICIES

Deferred tax is measured using the balance sheet liability method, providing for all temporary differences between the carrying amounts and the tax base of assets and liabilities, with the exception of deferred tax on temporary differences in respect of goodwill not deductible for tax purposes, office properties and other items – apart from business combinations – where temporary differences have arisen at the acquisition date without having any effect on profit (loss) or taxable income.

Deferred tax is measured on the basis of management's planned use of the asset or settlement of the liability respectively.

Deferred tax assets are recognised at the value at which they are expected to be utilised either by elimination against tax on future earnings or by offsetting against deferred tax liabilities within the same legal tax entity and jurisdiction.

Adjustment of deferred tax is made relating to eliminations made of unrealised intragroup profits and losses.

Deferred tax is measured in accordance with the tax rules and tax rates in the respective countries that will apply under the legislation enacted at the balance sheet date when the deferred tax is expected to crystallise in the form of current tax. Changes in deferred tax as a result of changes in tax rates are recognised in profit (loss) for the year.

Deferred tax on temporary differences between the carrying amounts and the tax base of acquisitions of joint operations, including licence interests, is not provided for.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Deferred tax assets, including the tax base of tax loss carryforwards, are reassessed annually and recognised to the extent that it is probable that they will be utilised in the foreseeable future. Management's reassessment is based on whether a final investment decision has been made in companies involved in oil and gas exploration and companies with other development costs, and on the long-term outlook for the Group's development.

When a business is run across national borders, disputes may arise concerning taxation and transfer pricing with the tax authorities in the various countries. Management estimates have been applied in the assessment of the possible outcome of such disputes. DONG Energy believes that adequate provisions have been made for any such disputes which have not yet been decided by the local tax authorities. However, the actual obligation may be different as it depends on the outcome of the disputes and settlements reached with the tax authorities in question.

Capital base at 31 December	100,237	98,003

Capital structure

Management evaluates the Group's capital structure on an ongoing basis to ensure that it is aligned with the Group's and the shareholders' interests and underpins the Group's strategy. Equity, hybrid capital, non-controlling interests, issued bonds, bank loans and other interest-bearing debt are considered to be a part of the capital base.

To secure financing on attractive terms at all times, DONG Energy has set targets for its credit rating and capital structure. The credit rating target is to maintain ratings of at least BBB+, BBB+ and Baa1, respectively, with the rating agencies Standard & Poor's, Fitch and Moody's. DONG Energy has been rated BBB+ with a stable outlook by Standard & Poor's, BBB+ with a stable outlook by Fitch and Baa1 with a stable outlook by Moody's.

8.2 HYBRID CAPITAL

Hybrid capital

Hybrid capital with a total nominal value of DKK 13,398 million (EUR 1,800 million) comprises EUR hybrid bonds issued in the European capital markets. A series of special terms are attached to the hybrid bonds.

The hybrid capital is subordinate to the Group's other creditors. The purpose of issuing hybrid capital was to strengthen the Group's capital base and fund the Group's investments.

The total hybrid capital consists of hybrid bonds due in 3005 and hybrid bonds due in 3013. Further details on the three hybrid bonds are provided in the table below.

Coupon on hybrid capital is settled annually. Coupon payments and their tax effect are recognised directly in equity.

DONG Energy A/S may, at its sole discretion, omit or defer coupon payments to bond holders. However, deferred coupon payments will fall due for payment in the event of DONG Energy A/S subsequently making any distributions to its shareholders. So far, DONG Energy A/S has not used the option to defer coupon payments.

ACCOUNTING POLICIES

Hybrid capital comprises issued bonds that qualify for treatment in accordance with the rules on compound financial instruments due to the special characteristics of the loan. The principal amount, which constitutes a liability, is recognised at present value, and equity has been increased by the difference between the net proceeds received and the present value of the discounted liability. Accordingly, any coupon payments are accounted for as dividends, which are recognised directly in equity at the time the payment obligation arises. This is because the coupon payments are discretionary and relate to the part of the hybrid capital that is recognised in equity. Coupon payments consequently do not have any effect on profit (loss) for the year.

The part of the hybrid capital that is accounted for as a liability is measured at amortised cost. However, as the carrying amount of this component amounted to nil on initial recognition, and because of the 1,000-year term of the hybrid capital, amortisation charges will only impact on profit (loss) for the year towards the end of the 1,000-year term of the hybrid

capital. Coupon payments are recognised in the statement of cash flows in the same way as dividend payments within financing activities.

On redemption of the hybrid capital the payment on redemption will be distributed between the liability and equity applying the same principles as used when the hybrid capital was issued. This means that the difference between the payment on redemption and the net proceeds received on issue is recognised directly in equity as the debt portion of the existing hybrid issues will be nil during the first part of the life of the hybrid capital.

On the date on which the Board of Directors decides to exercise an option to redeem the hybrid capital, the part of the hybrid capital that will be redeemed will be reclassified to liabilities. The reclassification will be made at the fair value of the hybrid capital at the date the decision is made. Interest expense and exchange rate adjustments following the reclassification to liabilities will be recognised in profit (loss) for the year as financial income or expenses.

	Hybrid capital due in 3005 (June)	Hybrid capital due in 3013 (June)	Hybrid capital due in 3013 (July)
Carrying amount	DKK 4,411 million	DKK 5,127 million	DKK 3,698 million

Total equity and liabilities	2,884	4,978	461	8,323	2,856	4,742	921	8,519

All assets and liabilities measured at fair value are measured on a recurring basis.

Level 1 comprises quoted securities and derivative financial instruments that are traded in active markets.

Level 2 comprises derivative financial instruments, where valuation models with observable inputs are used to measure fair value, but with discounting to present value applying one of the discount rates set by the Group.

Level 3 comprises primarily long-term contracts on purchase/sale of, in

particular, electricity and gas, and oil options. The fair values are based on assumptions concerning the long-term prices of, in particular, electricity, gas, coal, USD, EUR, volatilities as well as risk premiums in respect of liquidity and market risks and are determined by discounting of expected cash flows. Level 3 also includes other financial instruments in which primarily electricity, oil and gas prices have been estimated, and where the sum of these estimated, non-observable inputs may have a significant effect on fair value.

The fair value of financial instruments based on non-observable inputs

is significantly affected by the non-observable inputs used. As a result of the long-term and illiquid nature of the contracts, the fair value may change significantly in the event of a change in the Group's reasonable expectations relating to the non-observable inputs used.

SPECIFICATION OF DERIVATIVE FINANCIAL INSTRUMENTS AT LEVEL 3

DKK million	2014		2013	
	Assets	Liabilities	Assets	Liabilities
Fair value at 1 January	765	(921)	839	(739)
Gains and losses recognised in profit (loss) for the year as revenue	(567)	717	(278)	(112)
Issues/purchases	236	(299)		(414)
Redemptions/sales	319	42	217	264
Transferred to Level 2 due to market data having become available	(80)		(13)	80
Fair value at 31 December	673	(461)	765	(921)
Gains (losses) recognised in profit (loss) for the year relating to assets/liabilities that are still recognised in the balance sheet at 31 December	(1,122)	974	(497)	38

8.3 ASSETS AND LIABILITIES MEASURED AT FAIR VALUE CONTINUED

Valuation principles and material assumptions

In order to keep modifications of parameters, calculation models or the use of subjective estimates to a minimum, it is the Group's policy

to determine fair values on the basis of external information that most accurately reflects the values of assets or liabilities.

Market values are determined by the Risk Management function,

which reports to the CFO. The development in market values is monitored on a continuous basis and reported to the Executive Board.

Valuation principles and relevant assumptions for material assets or liabilities at Level 3 can be summarised as follows:

31 DECEMBER 2014

Fair value of derivative financial instruments	Assets DKK million	Liabilities DKK million	Valuation principle	Non-observable inputs	Range
Electricity swaps	638	373	Cash flow	Electricity price in 2018-2020 Volatility from 2016	EUR 24-47/MWh 11%-16%
Electricity options	1	83	Option model	Electricity price in 2018-2020	EUR 24-47/MWh

31 DECEMBER 2013

Fair value of derivative financial instruments	Assets DKK million	Liabilities DKK million	Valuation principle	Non-observable inputs	Range
Electricity swaps	602	444	Cash flow	Electricity price in 2018-2020 Volatility from 2016	EUR 27-51/MWh 12%-16%
Electricity options	6	358	Option model	Electricity price in 2018-2020	EUR 27-51/MWh

8.4 CATEGORIES OF FINANCIAL INSTRUMENTS

DKK million	2014	2013
Financial assets measured at fair value through profit (loss) for the year (Derivative financial instruments)	10,234	7,806
Financial assets measured at fair value through profit (loss) for the year (Securities)	24,948	16,118
Financial assets used as hedging instruments	959	1,341
Loans and receivables	17,841	16,612
Available-for-sale financial assets	242	261
Financial liabilities measured at fair value through profit (loss) for the year	6,232	7,359
Financial liabilities used as hedging instruments	2,091	1,160
Financial liabilities measured at amortised cost	48,529	57,330

Financial instruments are divided into categories according to their purpose. The purpose of the financial instrument determines whether the fair value adjustments of the financial instrument should be recognised in the profit (loss) for the year or in the hedging reserve in equity.

The carrying amount of the financial instruments corresponds to the fair value, with the exception of issued bonds and bank loans, which are recognised at amortised cost. The fair value of issued bonds and bank loans is stated in note 4.1.

8.5 RELATED PARTY TRANSACTIONS

DKK million	Joint ventures		Associates		Owners	
	2014	2013	2014	2013	2014	2013
Dividends received and capital reductions	20		2	74		
Capital transactions, net	(53)	(41)	(50)	(29)	8,000	
Sales of goods and services	23	33	92	49	965	
Purchase of goods and services	(91)	(110)	(29)	(42)		
Interest, net	40	38	1	1		
Receivables	879	1,202	239	238	102	
Payables	266		3			
Guarantees	6					

Related parties that have control over the Group comprise the Danish State, represented by the Danish Ministry of Finance. Related parties with a significant influence include Goldman Sachs. Other related parties are the Group's associates and joint ventures, members of the Board of Directors, the Executive Board and other senior executives.

Reference is made to note 8.10 for an overview of the Group's joint ventures and associates.

Transactions with joint ventures and associates appear from the table above. Remuneration to the Board of Directors, the Executive Board and other senior executives is disclosed in note 2.6.

Related party transactions are made on arm's length terms. Intra-group transactions have been eliminated in the consolidated financial statements.

DONG Energy uses the exemption set out in IAS 24.25 concerning

entities in which the state is a related party, and transactions with state enterprises are therefore not disclosed. Transactions with owners consist solely of transactions with Goldman Sachs.

There were no other related party transactions during the year.

8.6 AUDITOR'S FEES

DKK million	2014	2013
Statutory audit	12	13
Other assurance engagements	2	9
Tax and VAT advice	5	16
Non-audit services	7	26
Total fees to PwC	26	64

PwC, DONG Energy's auditors appointed by the general meeting

Subject to certain rules, DONG Energy's auditors may be used for certain non-audit services, and DONG Energy's auditors will often be the obvious choice due to their knowledge about the business, confidentiality and cost considerations. Examples of assignments undertaken by DONG Energy's auditors appointed by the general meeting include other assurance engagements as well as accounting advice on matters closely related to annual reporting.

Other assurance engagements primarily include reviews of non-financial data as well as reviews of regulatory financial statements.

Tax and VAT advice primarily includes advice in connection with the divestment of non-core activities and advice in connection with the preparation of tax returns and the calculation of the income subject to international joint taxation.

Other services include other consultancy services from PwC, including financial advice in connection with the divestment of non-core assets, capital injections, etc.

8.7 OPERATING LEASE OBLIGATIONS

DKK million	2014	2013
0-1 year	1,079	698
1-5 years	1,973	1,545
More than 5 years	2,715	3,052
Minimum lease payments	5,767	5,295
Lease payments recognised in profit (loss) for the year	545	354

SUPPLEMENTARY INFORMATION TO OPERATING LEASE OBLIGATIONS

DKK million	2014	2013
Present value of lease payments	4,495	3,933
Calculated interest expense on lease obligations	217	153
Internal rate of return applied	4.5%	4.5%

Assets held under operating leases comprise land and seabed relating to wind farms in the UK until 2039, gas storage facilities in Germany until 2023, a port area in Belfast in Northern Ireland until 2017, a power station site in the Netherlands until 2039, service vessels until 2018, drilling rigs until September 2018, office premises in London and Gentofte until 2029 and other office premises etc.

In addition, the Group has entered into operating leases for drilling rigs for the period 2015-2019. The minimum lease payments are calculated at DKK 750 million.

Lease payments relating to leasing of seabed in connection with wind farms in the UK vary with the MWh generated, but with agreed minimum lease payments. Seabed leases typically have a 5-year term with an option for 5-year extensions.

ACCOUNTING POLICIES

Lease payments under operating leases are recognised on a straight-line basis in profit (loss) for the year over the term of the lease if the agreement concerns operating expenses. Lease payments in respect of construction of assets will be added to the cost in line with the construction of the asset.

8.8 EVENTS AFTER THE REPORTING PERIOD

Acquisition of ownership interests in the Hornsea Project One Wind Farm development

DONG Energy has signed an agreement to acquire 66.66% ownership interests in the UK offshore wind development Hornsea Project One. DONG Energy entered into the joint venture with SMart Wind in December 2011, with an option to acquire the remaining 66.66% ownership interest upon the development project receiving consent

from the Secretary of State for Energy and Climate Change. Consent was granted in December 2014 and on 4 February 2015 DONG Energy has exercised the option and has become the sole owner of the project. Hornsea Project One has a total capacity of up to 1.2 GW and is expected to enter into operation around 2020, provided that a final investment decision is taken.

CONSOLIDATED NON-FINANCIAL STATEMENTS

NON-FINANCIAL STATEMENTS
SUPPLEMENTARY REPORT

The way in which energy is produced is changing rapidly. DONG Energy is working to develop and enable energy systems that are green, independent and economically viable. In 2014, DONG Energy achieved a further reduction in CO₂ emissions from electricity and heat generation. This is due to a further reduction in the use of fossil fuels at the power stations in favour of sustainable biomass and increased generation of electricity from offshore wind

9.1 BASIS OF REPORTING – NON-FINANCIAL STATEMENTS

ACCOUNTING POLICIES

In the non-financial statements, DONG Energy reports its findings for the most important indicators in the areas volumes, the environment, people and business integrity as well as its progress in relation to the long-term objectives adopted by the Group.

Pursuant to section 99a of the Danish Financial Statements Act, DONG Energy is obliged to account for the company's CSR activities and report on business strategies and activities with regard to human rights, labour rights, the environment, anti-corruption and the climate. Companies that have joined the UN Global Compact and annually submit their Communication on Progress report (COP report) – a report which must be shared publicly and which details progress made in implementing the ten Global Compact principles – automatically comply with the act, provided that the annual report includes a reference to where the information is available to the public. DONG Energy's report 'DONG Energy in Society 2014' constitutes the Group's Communication on Progress and can be found at <http://www.dongenergy.com/sustainability2014> and on the UN Global Compact website at <http://unglobalcompact.org/participant/2968-DONG-Energy-A-S>.

Under section 99b, DONG Energy must account for the company's objectives and policies which over time will ensure greater diversity in relation to gender representation at management level. In addition to being described in DONG Energy's COP report, the information is included in the Management's review, see the section on corporate governance on page 43, and in the non-financial statements.

The accounting policies have been applied consistently in the financial year and for the comparative years, with the exception of the statement of the number of women at management level, as described in section 9.1.7.

9.1.1 BASIS FOR PREPARATION

The accounting policies applied to the consolidated non-financial statements for the Group as a whole are described below, while the remaining accounting policies are described in the notes to which they relate.

9.1.2 STANDARDS APPLIED

DONG Energy is a signatory to the UN Global Compact. UN Global Compact provides enterprises with a strategic framework for how they can incorporate ten principles on human rights, labour rights, the environment and anti-corruption measures in their strategy and business processes. The ten principles are the framework for DONG Energy's sustainability efforts, and the Group is consistently working to promote the principles.

DONG Energy submits an annual Communication on Progress to the UN. The report for 2014 can be seen at <http://unglobalcompact.org/participant/2968-DONG-Energy-A-S>.

9.1.3 ORGANISATION AND DATA QUALITY

The business units' reporting has been systematised and harmonised via a common reporting system that forms the basis for the consolidated reporting.

The business units are responsible for the quality of their data based on a reporting procedure designed to support a Group-wide harmonised approach to data quality. The procedure also ensures that data in the consolidated reporting can be reproduced in accordance with the stated methods for recognition and measurement of data described below. Data have been recognised in the consolidated reporting based on the data reported by the business units.

9.1.4 CONSOLIDATION OF DATA

Data are consolidated according to the same principles as in the financial statements. The consolidated non-financial statements thus include the parent company DONG Energy A/S and subsidiaries controlled by DONG Energy A/S.

Data from associates and joint ventures are not included in the consolidated non-financial statements with the exception of accident statistics data, which are included from individual joint ventures where DONG Energy is responsible for safety.

9.1.5 DEFINITION OF MATERIALITY

DONG Energy reports on the areas which are very important both to our stakeholders and to our business. The non-financial topics which are considered to be most important are included in the annual report. In deciding which areas to include in the annual report, account is taken of statutory requirements and the disclosure requirements to which DONG Energy is subject. In addition, an assessment is made of whether the information has a direct or indirect bearing on DONG Energy's ability to create value in the long and short term.

In DONG Energy's annual sustainability report <http://www.dongenergy.com/sustainability2014> and supplementary sustainability data <http://www.dongenergy.com/sustainability2014-data>, you can find further information about DONG Energy's sustainability efforts and results.

The results of DONG Energy's dialogue with stakeholders, analyses, assessments and internal discussions on selection of important topics are presented as proposals for inclusion in the annual report to DONG Energy's Audit and Risk Committee.

9.1.6 COMPARISONS WITH CONSUMPTION AND CO₂ EMISSIONS FROM CARS

In the Strategy and sustainability chapter, two comparative calculations of key figures are made in the text and infographics.

Offshore wind capacity is compared with Europeans' annual electricity consumption based on 4,000 full-load hours per year and Eurostat's data for electricity consumption per capita in the home (EU28) in 2012.

The difference between DONG Energy's CO₂ emissions from electricity and heat generation in 2014 and 2006 is compared with the annual CO₂ emissions from cars based partly on a calculation of the annual petrol consumption for transport (EU27) on the basis of data from the Odyssee database and the Danish Energy Agency's data on the calorific value of petrol (2012), and partly on the US Energy Information Administration's data on CO₂ emissions per energy unit of petrol. Data for the number of cars in London and Berlin are derived from Eurostat (2012).

9.1.7 CHANGES TO REPORTED DATA COMPARED WITH 2013

In 2014, DONG Energy has systematically assessed the content of the non-financial statements to ensure that they contain the most important focus areas.

As a result thereof, the reporting of non-financial data has been changed compared to last year.

The following focus areas were part of the Management's review in the annual report for 2013, and from 2014 they are included in the consolidated non-financial statements:

- Installed offshore wind capacity
- Oil and gas production, boe per day
- Job satisfaction and motivation
- Women in management
- Customer satisfaction, residential and business customers in Denmark
- Number of employees who have completed the course in good business conduct
- Cases of inappropriate or illegal business conduct

In 2014, DONG Energy also decided to report on the following non-financial focus areas in the consolidated non-financial statements:

- Renewable energy share of electricity and heat generation
- Wind/hydropower share of electricity generation
- Number of customers
- Customer complaints

The method for calculating the number of women at management level has been changed compared to 2013; the criteria for the three management categories have been redefined. In 2013, the reporting on women at management level was based on the women's specific job title at 31 December 2013, whereas women at management level, according to the new definition of women at management level, must have genuine staff responsibilities.

9.2 VOLUMES

This section contains information about the production and capacities of the Group's electricity and heating systems, own wind farms and installed offshore wind capacity. In addition, the section provides information about production, sales and the distribution of electricity, heating, gas and oil to DONG Energy's customers.

9.2.1 Production

	2014	2013	2012
Oil and gas production (million boe)			
- Oil production	10.6	8.2	10.0
- Gas production	31.2	23.5	18.5
- Oil and gas production, boe per day	115,000	87,000	78,000
Electricity generation (TWh)			
Thermal			
- Denmark	7.8	10.8	9.2
- Other countries	0.9 ¹	3.0	2.3
Wind			
- Denmark	2.5	2.3	1.9
- UK	2.4	2.3	1.4
- Other countries	0.1	0.2	0.4
Hydropower			
- Sweden	0	0.5	0.9
Heat generation (PJ)			
Thermal			
- Denmark	31.4	40.2	43.0

¹ Excluding electricity generation from test runs which has not been sold. Electricity generation from test runs amounts to 0.2TWh. As the test generation also affects environmental performance, it is included in the non-financial statements.

The gas production for 2014 is significantly affected by increased production at the Ormen Lange field, partly due to the higher ownership interest, and partly due to the fact that DONG Energy over a period of about two and a half years starting at 1 July 2013 will receive the historical production volumes to which it is entitled as a result of the increased ownership interest from the commissioning of the field until 30 June 2013.

In 2014, heat generation fell by 22% relative to 2013, primarily due to the warm weather in 2014.

ACCOUNTING POLICIES

Oil and gas production is determined on the basis of meter readings on delivery to shore.

Electricity generation is determined as net generation sold based on settlements from the official Danish production database. Data for generation from foreign and non-operated facilities are provided by the operators.

Heat generation is measured as net output sold to heating customers.

Bioethanol and bio natural gas production and sales are not reported as this is taking place on a trial basis only.

9.2.2 Offshore wind capacity

GW	2014	2013	2012
Installed offshore wind capacity, accumulated	2.5	2.1	1.7
Offshore wind capacity, owned by DONG Energy	1.4	1.3	1.1

Installed offshore capacity is up from 2.1 GW in 2013 to 2.5 GW in 2014. The increase is attributable to the completion and commissioning of West of Duddon Sands in 2014.

A net increase of 0.1 GW was seen in capacity owned by DONG Energy following the divestment of ownership interests in London Array, the acquisition of additional ownership interests in Barrow and the commissioning of West of Duddon Sands.

ACCOUNTING POLICIES

Installed offshore wind capacity is calculated as the cumulative offshore wind capacity installed by DONG Energy. The capacity is calculated as installed gross capacity before divestments.

Capacity is calculated and factored in from the time when the wind farm is in full production.

Offshore wind capacity owned by DONG Energy is calculated at 31 December.

9.2.3 Sales

	2014	2013	2012
Sales to gas customers			
Number of gas customers	113,099	217,283	215,083
Gas sales (TWh)	119.6	134.6	127.9
Sales to electricity customers			
Number of electricity customers	865,942	930,228	927,155
Electricity sales (TWh)	30.8	16.8	12.6

The fall in gas sales is primarily attributable to lower demand due to the warmer weather. The increase in electricity sales is due to increased sales of green certificates and increasing sales in the UK.

ACCOUNTING POLICIES

The number of customers in Denmark and Sweden is retrieved from DONG Energy's internal ERP system, while customers in other countries are retrieved from local contract and customer databases.

Electricity sales are determined as physical electricity sales to identifiable counterparties and reported on a gross basis in the financial statements. Electricity volumes and revenue are based on readings from DONG Energy's trading systems.

Gas sales consist of sales to wholesale and hubs as well as retail sales. Gas sales have been determined as the physical sales recorded in the ERP system from DONG Energy's trading systems. Wholesale sales are reported as total volume of gas sold less any possibilities for selling the gas back to DONG Energy under the supply contract in question. Gas hub sales and gas sold as part of physical swap contracts are reported on a gross basis.

9.2.4 Distribution

	2014	2013	2012
Distribution to gas customers			
Number of gas distribution customers	125,686	125,814	126,249
Gas distribution (TWh)	8.2	8.8	9.1
Distribution to electricity customers			
Electricity distribution (TWh)	8.4	8.6	8.7
Number of electricity distribution customers	986,472	991,347	997,403
Oil transportation, Denmark (million boe)	54	58	66

The fall in distributed volumes is primarily due to the mild winter, which resulted in reduced electricity and gas consumption. The fall in oil transportation from 2013 to 2014 is due to a general fall in North Sea production.

ACCOUNTING POLICIES

Gas distribution has been determined on the basis of data from the official system in Denmark that have been calculated internally based on total volumes and calorific values received from Energinet.dk.

Electricity distribution has been determined on the basis of data from the official system in Denmark, which measures and calculates total area consumption. The number of distribution customers for electricity and gas is based on readings from the trading systems and is calculated in relation to the number of consumption points. Oil transportation has been determined on the basis of flow meter readings on delivery to shore in Denmark (after deduction of water content).

9.3 ENVIRONMENT

This section contains information about strategic focus areas which are central to DONG Energy, including EU ETS CO₂ emissions and CO₂ emissions per energy unit generated. Moreover, the section contains information about the Group's progress within the conversion to biomass-based electricity and heat generation as well as the recycling of waste from the administration and from the facilities.

Collection of environmental data

Environmental data comprise resource consumption, emissions and discharges, waste and environmental accidents.

Construction projects, development projects, non-operated gas storage facilities and similar activities are not included in the reporting.

9.3.1 CO₂ emissions

	2014	2013	2012
EU ETS CO ₂ emissions (million tonnes) in total	6.2	9.3	7.8
- Of which emitted in Exploration & Production	0.1	0.1	0.1
- Of which emitted in Thermal Power	6.1	9.2	7.7
CO ₂ emissions per generated kWh (g/kWh)	374	445	443

The reduction of CO₂ emissions is due to lower generation in Thermal Power, and the resulting lower fuel consumption. The combination of a decrease in coal consumption and a relative increase in biomass consumption results in a decrease in EU ETS CO₂ emissions.

The reduction in CO₂ per kWh is attributable to a higher share of electricity generation from offshore wind and a general increase in the use of biomass by the biomass-converted power stations.

ACCOUNTING POLICIES

Calculations of EU ETS carbon dioxide (CO₂) emissions are made at facilities that are subject to the emission trading system and for which DONG Energy is responsible in its capacity as operator or its capacity as accountable for operations. Calculation of emissions is determined on the basis of fuel quantities used, in accordance with the EU ETS.

CO₂ emissions per energy unit generated (g CO₂ per kWh) have been determined as the physical CO₂ emissions relative to total physical generation of electricity, heat and steam supplied to the grid. Facilities with a total installed electricity, heat or steam capacity of less than 10 MW are omitted from the calculation.

The specific CO₂ emissions (g CO₂/kWh) are calculated by converting heat and steam to electricity equivalents. The electricity equivalents represent the amount of additional electricity that could have been supplied if the power stations had not been generating heat and/or steam.

In connection with the incineration of waste, a conversion factor is used for calculating the CO₂ emissions which is equivalent to 37 kg CO₂/GJ. In accordance with the Danish Energy Agency, biomass is considered CO₂-neutral.

9.3.2 SO₂ emissions

g/kWh	2014	2013	2012
SO ₂ emissions per generated kWh	0.05	0.07	0.07

DONG Energy's target of reducing SO₂ emissions per kWh generated by 99% in 2020 in relation to 1990 has been met. The target is therefore discontinued, although DONG Energy is continuing its efforts to reduce SO₂ emissions further.

As mentioned in 9.3.1, the fuel mix changed in 2014. Coal consumption is reduced in favour of biomass, which has a lower sulphur content than coal.

ACCOUNTING POLICIES

The specific emissions of sulphur dioxide in connection with the generation of electricity and heat are stated for the power stations. SO₂ emissions are mainly determined on the basis of continuous measurements. A few power stations use plant-specific emission factors to calculate emissions. In the calculation of generation, heat and steam are converted into electricity equivalents using the method used for calculating CO₂ per kWh.

9.3.3 NO_x emissions

g/kWh	2014	2013	2012
NO _x emissions per generated kWh	0.27	0.33	0.39

DONG Energy's target of reducing NO_x emissions per kWh generated by 90% in 2020 in relation to 1990 has been met. The target is therefore discontinued, although DONG Energy is continuing its efforts to reduce NO_x emissions further.

In 2014, the focus was on reducing NO_x emissions. Efforts involved renovating some of the power stations, as well as optimising the coal mix in 2014.

ACCOUNTING POLICIES

The specific emissions of nitrogen oxide in connection with the generation of electricity and heat are stated for the power stations. NO_x emissions are primarily determined on the basis of continuous measurements. A few power stations use plant-specific emission factors to calculate emissions. In the calculation of generation, heat and steam are converted into electricity equivalents using the method used for calculating CO₂ per kWh.

9.3.4 Renewable resources in electricity and heat generation

%	2014	2013	2012
Renewable energy share of electricity and heat generation	46	35	34
Biomass share of Danish CHP generation	28	18	21
Wind/hydropower share of electricity generation	36	28	28

The statement of biomass share has been clarified in 2014 only to include Danish CHP generation. Back-up and peak-load facilities and purely electricity-generating and heat-generating facilities are no longer included. Moreover, back-pressure equipment is included in the calculation in a more accurate manner than previously. The latter raises the biomass share by 3 percentage points relative to previous years, which means that any direct comparison of 2014 with previous years should be based on a comparable figure of 25%.

ACCOUNTING POLICIES

The renewable energy share of electricity and heat generation is calculated as the share of generation generated from renewable energy sources. In the calculation of generation, heat generation is converted into electricity equivalents using the method used for calculating g CO₂/kWh.

Renewable energy sources are: Biomass, wind power, hydropower and geothermal energy. Non-renewable energy sources are: Coal, oil, natural gas and waste.

In practice, waste consists of a mixture of biomass and a fossil part. In this calculation, waste is defined as a non-renewable energy source, as is the case in the calculation of the biomass share of Danish CHP generation.

The biomass share of Danish CHP generation is calculated as the share which is based on biomass, out of the total electricity and heat generation by the Danish power stations. The calculation includes only CHP generation. In the calculation, it is assumed that the share of biomass-based

9.3 ENVIRONMENT

CONTINUED

generation at the individual power station/unit is equal to the biomass share of the fuel which is calculated on the basis of the energy content of the fuels. The total biomass share is then calculated as a weighted share relative to the individual power station's generation. In order to be able to sum up the generation at power stations that generate both electricity and heat, heat generation is converted to equivalent electricity generation using the same method as for calculating g CO₂/kWh.

The wind/hydropower production of electricity is calculated as the total generation of electricity from Danish and international offshore and on-shore wind turbines as well as from hydro based electricity generation. The total electricity generation from wind and hydro is seen in relation to the DONG Energy Group's total generation of electricity from all Danish and foreign sources of generation.

9.3.5 Recycling of waste

%	2014	2013	2012
Recycling of waste from administration	52	61	44
Recycling of waste from facilities	45	76	63

Waste volumes from the facilities vary a lot due to ongoing changes within the project portfolio, which in 2014 resulted in a decrease in the recycling rate for both administration and facilities. DONG Energy has therefore decided to discontinue the target for 2015 of 70% recycling from the facilities. The 2015 target for recycling of waste from the administration has been met, and has been replaced by a target of 70% by 2020.

ACCOUNTING POLICIES

Waste and recycling of same are measured on the basis of invoices received from waste recipients and/or using plant-specific measuring methods for commercial facilities, including construction activities.

Waste from administration buildings that accommodate 1% or less of DONG Energy's total number of employees is not reported.

Waste data are not received from activities and oil fields where DONG Energy is not the operator.

9.3.6 Gas flaring

million Nm ³ gas	2014	2013	2012
Gas flaring on offshore production platforms	7.6	6.1	7.8
Gas flaring at gas treatment and storage facilities	1.0	1.0	1.1

Increased production levels under several licences, inclusion of the Trym licence in 2014, as well as the resumption of production at Siri resulted in increased flaring. Ula reduced its flaring.

ACCOUNTING POLICIES

For offshore installations, the calculation of natural gas flaring is based on continuous measurements. From gas treatment and gas storage facilities, the amounts are calculated on the basis of pressure and the dimensions of the process equipment that is emptied as well as by means of accredited measuring of the constant safety flaring.

9.3.7 Oil discharged to sea

tonnes	2014	2013	2012
Oil discharged to sea	37	19	16

Increased production levels and unstable operations resulted in the discharge of more oil to the sea. The increase is primarily due to an increase in oil discharge from the Ula platform.

ACCOUNTING POLICIES

Oil discharged to the sea from production platforms is determined on the basis of the oil concentration in the discharged production water. The volume of discharged production water is measured directly in m³. The oil concentration and volume are calculated on the basis of three daily samples, as well as one monthly sample of ballast water, which are analysed for oil content.

9.3.8 Reinjection of produced water on production platforms

%	2014	2013	2012
Reinjection of produced water on production platforms	65	79	83

Increased production levels and unstable operations resulted in the reinjection of less production water and thus to the discharge of more production water to the sea. The Siri platform discharged markedly less production water in 2014 as the platform was out of operation for some time in 2014.

The increased discharge of production water to the sea, unstable operations and less reinjection led to an increase in the oil content in the production water discharged to the sea.

ACCOUNTING POLICIES

Reinjection of produced water is measured directly in m³.

9.3.9 Significant environmental incidents

	2014	2013	2012
Significant environmental incidents	7	8	3
- Exploration & Production	0	1	0
- Thermal Power	0	4	0
- Wind Power	1	1	0
- Customers & Markets	6	2	3

The seven environmental incidents was one discharge of the sea, four to the soil, and two to the air. A vessel was damaged and leaked approximately 7 tonnes of fuel oil into the sea. The four instances of soil contamination comprised spillages of up to five hundred litres of oil; all four spillages have been cleared up completely through the removal of the contaminated soil. The two discharges to the air were due to leaky gaskets, which resulted in the discharge of approximately 2 tonnes of natural gas.

ACCOUNTING POLICIES

Environmental incidents for which DONG Energy is responsible in its capacity as operator or its capacity as accountable for operations are assessed and classified applying the Group's procedure for impact assessment of environmental incidents. An environmental incident is defined as an unintentional event that has a negative environmental impact. The impact assessment looks at five categories of environmental incidents: C1-C5, C4 and C5 being environmental incidents with significant and massive consequences respectively. Only incidents in categories C4 and C5 are reported.

9.4 PEOPLE

The section on People in DONG Energy covers employee data and safety data in the form of occupational injuries. Safety is an important and central area in DONG Energy. In recent years, DONG Energy has significantly reduced the number of lost-time injuries, and it is DONG Energy's stated aim to achieve further improvements.

9.4.1 Employees

	2014	2013	2012
Denmark	5,433	5,454	5,943
UK	630	527	492
Germany	146	121	120
Norway	105	107	141
Other	186	287	304
Total number of employees at 31 December	6,500	6,496	7,000
- Of which full-time employees	6,259	6,218	6,587
Average number of employees for the year	6,416	6,692	6,735
Employee turnover rate (%)	12	17	10
Average age	42	42	42

In 2014, the employee turnover rate was reduced to 12%. The high employee turnover rate in 2013 was due to the implementation at the end of 2012 of an efficiency plan which involved the abolition of a large number of positions.

ACCOUNTING POLICIES

The reporting covers contractually employed employees in Danish and foreign DONG Energy companies in which an ownership interest of more than 50% is held, but not employees of associates. Employee data are recognised based on records from the Group's ordinary registration systems. The number of employees is determined as the number of employees at the end of the financial year converted to full-time employees. Employees that have been made redundant are recognised until the expiry of their notice period, regardless of whether they have been released from all or part of their duties during the notice period.

The employee turnover rate is calculated as the number of permanent employees that have left the company relative to the average number of permanent employees in the financial year. The average number of employees is determined as a weighted average of recorded permanent employees during the year.

Average age has been measured as the average age of employees at the end of the financial year.

9.4.2 Occupational injuries

	2014	2013	2012
Fatalities	0	0	1
Lost time injuries	51	64	71
- Of which contractors	33	38	40
Lost time injuries per one million hours worked (LTIF)	2.4	3.2	3.6
- Of which Exploration & Production	1.2	0.5	0.4
- Of which Wind Power	2.1	3.9	3.7
- Of which Thermal Power	3.8	4.1	5.8
- Of which Customers & Markets	2.3	3.7	3.4 ¹

¹The comparative figures for 2012 have been restated to reflect a consolidation of the business segments Energy Markets and Sales & Distribution at 1 May 2013 under the name of Customers & Markets."

In 2014, the lost time injury frequency (LTIF) was reduced to 2.4 from 3.2 in 2013. Thus, the target of reducing LTIF to a maximum of 2.9 was achieved. In 2015, LTIF must be reduced further, to a maximum of 2.2. In 2020, the LTIF target is a maximum of 1.5 occupational injuries per one million hours worked.

ACCOUNTING POLICIES

Occupational injuries and lost time injuries for own employees and contractors are included for companies that are wholly or partly owned by DONG Energy and where DONG Energy is responsible for safety.

Data are recognised for own employees and for contractors working in or providing services in areas in which DONG Energy is responsible for safety in its capacity as owner or because of the operating assignment or construction/design assignment. Data from Danish and foreign sites are recognised.

A lost time injury is defined as an injury that results in incapacity for work of one or more calendar days in addition to the day of the incident.

The lost time injury frequency is calculated as the number of lost time injuries per one million hours worked. The number of hours worked is based on 1,667 working hours annually per full-time employee and monthly records of the number of employees converted to full-time employees. For contractors, the actual number of hours worked is recognised on the basis of data provided by the contractor, access control systems at locations or estimates.

9.4.3 Job satisfaction and motivation

scale 0-100	2014	2013	2012
Employees' evaluation of their own job satisfaction and motivation	72	Not measured	74

The survey of the employees' job satisfaction and motivation was conducted in the first quarter of 2014, at a time when DONG Energy attracted extensive media coverage. The decline in job satisfaction and motivation can be ascribed to a fall in the perception of DONG Energy's image.

ACCOUNTING POLICIES

DONG Energy conducts a comprehensive employee satisfaction survey once a year. All DONG Energy employees are invited to participate in the survey, and in 2014, 94% of all employees did.

In the survey, the employees are, for example, asked a number of questions about their job satisfaction and motivation. The answers are given on a scale from 1-10 and are subsequently converted to index figures on a scale from 0 to 100.

9.4.4 Women at management level

%	2014	2013	2012
Women on the BoD of DONG Energy A/S	14	14	13
Women on the BoD of Danish subsidiaries	31	26	25
Women in Top Management	14	14	10
Women in Leadership Forum	20	17	17
Other female managers	24	27	26

Reference is made to the Corporate Governance section on page 43 for a description of action plans and targets for women in management in the DONG Energy Group. At the end of 2014, the share of women in the total labour force was 30% (2013: 30%).

ACCOUNTING POLICIES

The employee representatives on the Board of Directors are not included in the data and the targets for women on the Board of Directors.

The Top Management consists of the CEO and the CFO and Executive Vice Presidents, Senior Vice Presidents and Vice Presidents in the Group. The Leadership Forum consists of Senior Directors, Directors and Senior Managers. Other female managers include Managers and team leaders.

9.5 BUSINESS INTEGRITY

This section contains information about customer satisfaction, complaints and business conduct.

9.5.1 Customer satisfaction, residential customers in Denmark

	2014	2013	2012
Number of electricity customers	750,388	753,032	760,645
Number of gas customers	95,489	97,688	103,945
Customer satisfaction among Danish residential customers (scale 1-100)	67	64	64

ACCOUNTING POLICIES

Customer satisfaction for residential customers is determined on the basis of monthly interviews with 300 electricity customers and 100 gas customers, randomly selected from all residential customers.

The customer segments included in the survey are subject to change so as to reflect the customer portfolio. Any changes will be made only at the beginning of the financial year.

The interviews are carried out by an external provider. Results are weighted based on the ratio of electricity customers to gas customers and combined into a single figure for satisfaction among residential customers.

The satisfaction surveys will be carried out in the period from 1 October to 31 December.

9.5.2 Customer satisfaction, business customers in Denmark

	2014	2013	2012
Number of electricity customers	115,383	116,698	115,146
Number of gas customers	12,902	13,928	11,559
Customer satisfaction among Danish business customers (scale 1-100)	76	75	72

ACCOUNTING POLICIES

Customer satisfaction for business customers is determined on the basis of customer satisfaction surveys among DONG Energy's business customers in Denmark. The method follows the ACSI model based on the EPSI scale.

Customer satisfaction for Denmark is determined on the basis of quarterly interviews about customers' satisfaction with DONG Energy. For the

largest business customer segments, all customers are interviewed once a year in so far as this is possible. The customer segments included in the survey are subject to change so as to reflect the customer portfolio. Any changes will be made only at the beginning of the financial year.

An external agency conducts the interviews and reports absolute and weighted results via a web-based dashboard.

9.5.3 Customer complaints

	2014	2013	2012
Number of customer complaints	3,054	3,185	2,612

ACCOUNTING POLICIES

The number of customer complaints received is calculated each month by a direct count from DONG Energy's case handling system. The complainants represent all customer groups in Denmark (residential, business and distribution customers).

Monthly follow-up reports are prepared which show the number of complaints received, compliance with service targets, as well as any trends in the complaints. Complaints received are reported monthly to management.

9.5.4 Share of employees who have completed a course in good business conduct

%	2014	2013	2012
Employees who have completed e-learning in good business conduct	97	96	95

ACCOUNTING POLICIES

The number of employees who have completed the course in good business conduct is calculated as the proportion of active employees at 31 December who have completed the course.

9.5.5 Cases of inappropriate or illegal business conduct

	2014	2013	2012
Number of reported cases of inappropriate or illegal business conduct	6	0	2
Cases transferred to the police	1	0	0

DONG Energy changed its whistleblower scheme in January 2014. The changes were made to strengthen the scheme and were communicated in an extensive internal information campaign. The development from 0 cases in 2013 to 6 cases in 2014 should be seen in that light.

ACCOUNTING POLICIES

DONG Energy's Whistleblower Hotline is available for internal and external reporting of suspected cases of inappropriate or illegal behaviour. Whistleblower reports are received and handled by the Internal Audit function, which also receives similar reports through the management system and from Compliance Officers. All reports are handled in accordance with the guidelines for the handling of the whistleblower reports approved by the Audit and Risk Committee, which is ultimately responsible for the whistleblower scheme. Only reports (cases) which are closed during the financial year, and which have been reported to the Audit and Risk Committee as fully or partially substantiated, are reported in the annual report.

1. BASIS OF REPORTING

ACCOUNTING POLICIES

The parent company financial statements are prepared pursuant to the requirements of the Danish Financial Statements Act concerning preparation of separate parent company financial statements for companies reporting under IFRS.

The parent company financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU.

The financial statements have been prepared in accordance with Danish disclosure requirements for annual reports of listed and state-owned public limited companies.

The annual report is presented in million Danish kroner (DKK), unless otherwise stated.

Parent company financial statements

The parent company accounting policies are consistent with the accounting policies described for the consolidated financial statements, with the following exceptions:

Foreign currency translation

Exchange rate adjustments of balances accounted for as part of the total net investment in enterprises that have a functional currency other than DKK are recognised in profit (loss) for the year as financial income and expenses in the parent company financial statements. Likewise, foreign exchange gains and losses on the portion of loans and derivative financial

instruments that has been entered into to hedge the net investment in these enterprises are recognised directly in profit (loss) for the year as financial income and expenses.

Revenue

Rental income comprises income from commercial leases and is recognised over the term of the lease. Income from services is recognised when delivery has taken place.

Dividends from investments in subsidiaries

Dividends from investments in subsidiaries are credited to profit (loss) for the year in the financial year in which they are declared. If distributions exceed the subsidiary's comprehensive income for the period, an impairment test is carried out.

Property, plant and equipment

Investment property is property that is held to earn rental income and is used for own purposes to an insignificant extent only.

Investment property is measured at cost less accumulated depreciation and impairment losses. Investment property is depreciated over 20 years.

Fixtures and fittings, tools and equipment are depreciated over 3-5 years.

Investments in subsidiaries

Investments in subsidiaries are measured at cost in the parent company financial statements. Impairment testing is carried out if there is any indication of impairment, as described in the consolidated financial statements.

The carrying amount is written down to the recoverable amount whenever the carrying amount exceeds the recoverable amount. The impairment loss is recognised as a financial expense in profit (loss) for the year.

If the parent company has a legal or constructive obligation to cover a deficit in subsidiaries, a provision for this is recognised.

New standards and interpretations

Reference is made to the description in note 1 to the consolidated financial statements.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

In the process of preparing the parent company financial statements, a number of accounting estimates and judgements have been made that affect assets and liabilities at the balance sheet date and income and expenses for the reporting period. Management regularly reassesses these estimates and judgements, partly on the basis of historical experience and a number of other factors in the given circumstances.

Management is of the opinion that no accounting estimates or judgements are made in connection with the presentation of the parent company financial statements applying the parent company accounting policies that are material to the financial reporting, other than those disclosed in note 3.1 to the consolidated financial statements concerning impairment testing.

2. REVENUE

NOTES

Revenue comprises rental income and sales of services.

Cash, available	2,286	301
Bank overdrafts that are part of the ongoing cash management, see note 7		(12,963)
Cash and cash equivalents at 31 December, see statement of cash flows	2,286	(12,662)
Securities can be specified as follows:		
Securities, available	23,680	15,425
Securities, not available for use	823	283
Securities at 31 December	24,503	15,708

Securities are primarily highly liquid AAA-rated Danish mortgage bonds that qualify for repos in Danmarks Nationalbank.

The securities are part of the ongoing cash management. In accordance with IAS 7, cash flows from securities are recognised in cash flows from investing activities.

Securities not available for use comprise securities that form part of genuine sale and repurchase transactions (repo transactions), and securities used as collateral for trading in financial instruments.

7. LOANS AND BORROWINGS

NOTES

DKK million	2014	2013
Bank loans and issued bonds:		
Issued bonds	28,414	31,330
Bank loans	7,568	12,689
Bank overdrafts		12,963
Carrying amount	35,982	56,982
Bank loans and issued bonds are recognised in the balance sheet as follows:		
Non-current liabilities	35,835	35,185
Current liabilities	147	21,797
Carrying amount	35,982	56,982

MATURITY ANALYSIS OF LOANS AND BORROWINGS

The parent company's financial payment obligations fall due as follows:

DKK million	2015	2016	2017-2018	After 2018	2014	2014	2015	2016-2017	After 2017	2013
Bank loans and issued bonds										
- Principal amount	147	4,765	2,485	28,813	36,210	9,289 ¹	405	6,667	28,448	44,809
- Interest payments	1,413	1,404	2,500	12,479	17,796	1,585	1,394	2,704	13,247	18,930
Trade payables	41				41	80				80
Payables to subsidiary	37,299				37,299	17,586				17,586
Other payables	795			1,357	2,152	909			1,357	2,266
Derivative financial instruments	5,455	5,493	8,481	833	20,262	2,903	1,426	1,931	878	7,138
Total payment obligations	45,150	11,662	13,466	43,482	113,760	32,352	3,225	11,302	43,930	90,809

¹ This includes expected early repayment of bank loans of DKK 4.5 billion.

At 31 December 2014, DONG Energy had issued hybrid capital with a principal amount totalling DKK 13,428 million due in 3005 (DKK 4,476 million) and 3013 (DKK 8,952 million).

The maturity analysis is based on undiscounted cash flows, including estimated interest payments. Interest payments are based on market conditions and interest-rate hedging entered into at 31 December.

The company's financing agreements are not subject to any unusual terms or conditions, apart from those disclosed in note 4.1 to the consolidated financial statements.

8. ASSETS AND LIABILITIES MEASURED AT FAIR VALUE

NOTES

FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

The table below shows fair value of assets and liabilities distributed at fair value level:

DKK million	Quoted prices (level 1)	Observable inputs (level 2)	Non-observ- able inputs (level 3)	2014	Quoted prices (level 1)	Observable inputs (level 2)	Non-observ- able inputs (level 3)	2013
Securities	23,931	572		24,503	15,708			15,708
Total securities	23,931	572	-	24,503	15,708	-	-	15,708
Commodities		15,187		15,187	28	1,703	240	1,971
Currency		6,049		6,049		2,913		2,913
Interest		165		165		175		173
Total derivative financial instruments	-	21,401	-	21,401	28	4,791	240	5,059
Total assets	23,931	21,973	-	45,904	15,736	4,791	240	20,767
Commodities		10,961		10,961	28	2,774	750	3,552
Currency		6,554		6,554		2,466		2,466
Interest		661		661		499		499
Total derivative financial instruments	-	18,176	-	18,176	28	5,739	750	6,517
Total equity and liabilities	-	18,176	-	18,176	28	5,739	750	6,517

All assets and liabilities measured at fair value are measured on a recurring basis.

Level 1 comprises quoted securities and derivative financial instruments that are traded in active markets.

Level 2 comprises derivative financial instruments, where valuation models with observable inputs are used to measure fair value, but with

discounting to present value applying one of the discount rates set by the Group.

Level 3 also includes financial instruments in which primarily oil prices have been estimated, and where the sum of these estimated, non-observable inputs may have a significant effect on fair value.

9. CATEGORIES OF FINANCIAL INSTRUMENTS

NOTES

DKK million	2014	2013
	Carrying amount	Carrying amount
Financial assets measured at fair value through profit (loss) for the year (Derivative financial instruments)	21,365	4,827
Financial assets measured at fair value through profit (loss) for the year (Securities)	24,503	15,708
Financial assets used as hedging instruments	36	232
Loans and receivables	73,931	66,594
Financial liabilities measured at fair value through profit (loss) for the year	17,567	5,761
Financial liabilities used as hedging instruments	609	756
Financial liabilities measured at amortised cost	74,134	75,594

The carrying amount of the financial instruments corresponds to the fair value, with the exception of issued bonds and bank loans. The fair value of issued bonds and credit institutions was DKK 33,868 million (2013: DKK 34,018 million) and DKK 7,851 million (2013: DKK 12,910 million).

10. MARKET RISKS

Risk management policy

DONG Energy A/S acts as the Group's internal banker in relation to funding, currency, interest rate and cash management and the conclusion of some commodity-related contracts.

As part of its financial management, DONG Energy A/S hedges currency risks and interest rate risks. Full or partial hedging of recognised assets and liabilities (hedging of fair value) and of future transactions (hedging of cash flows) is carried out in accordance with the framework laid down in the financial risk management policy imple-

mented by DONG Energy. Both primary hedging instruments, primarily loans (only currency risks) and derivative financial instruments such as forwards, swaps and options, are used as hedging instruments. In some cases, the company has also entered into contracts to hedge risks in subsidiaries.

The financial risks to which DONG Energy A/S is exposed are described in the following. Reference is also made to the Risk and risk management section on pages 35-39 of the Management's review.

Currency risks

A substantial proportion of DONG Energy A/S's activities and investments is conducted in currencies other than Danish kroner. The company's net position in individual currencies at 31 December is shown below.

As part of its financial management, DONG Energy A/S enters into a number of hedging instruments to hedge currency risks. At 31 December 2014, unrealised value adjustments of derivative financial instruments for currency hedging of recognised assets and liabilities amounted to a loss of DKK 87 million (2013: A gain of DKK 1,079 million).

HEDGING OF FAIR VALUES

DKK million						2014						2013
	EUR	USD	GBP	NOK	Other	EUR	USD	GBP	NOK	Other		
Assets	14,988	10,165	30,318	3,205		58,676	5,744	235	26,187	6,474	4	38,644
Liabilities	(26,408)	(7,423)	(18,295)	(1,207)	(51)	(53,384)	(34,401)	(1,939)	(13,892)	(300)	(404)	(50,936)
Hedged using hedging instruments	29,581	(148)	(12,044)	(2,968)	9	14,430	21,828	4,672	(25,094)	(6,122)	(188)	(4,904)
Net position	18,161	2,594	(21)	(970)	(42)	19,722	(6,829)	2,968	(12,799)	52	(588)	(17,196)

10. MARKET RISKS

CONTINUED

Interest rate risks

The parent company is exposed to interest rate changes in connection with its liquid portfolio, primarily floating-rate bank balances. For an analysis of the company's interest rate sensitivity, reference is made to note 6.2 to the consolidated financial statements.

As part of its financial management, DONG Energy A/S swaps the interest basis on loans from a floating rate to a fixed rate or vice versa using interest rate swaps. For interest rate swaps converting floating-rate loans to fixed-rate loans, value adjustments recognised directly in equity amounted to a loss of DKK 450 million (2013: A loss of DKK 431 million).

Liquidity risks

DONG Energy A/S endeavours to mitigate its liquidity risk via a diversified loan portfolio and maturity profile and by making sure it has available committed loans and facilities.

Credit risks

DONG Energy A/S's credit risk relates to loans to subsidiaries, placing of surplus liquidity in securities and positive market value of derivative financial instruments. Credit risk related to securities is reduced by in-

vesting in securities with high credit ratings, primarily Danish mortgage bonds.

In the company's opinion, there are no special concentrations of counterparty risks. The company's counterparty risk in connection with derivative financial instruments entered into is limited as such instruments have primarily been entered into with major international banks or other counterparties with high credit ratings.

OFFSETTING OF FINANCIAL ASSETS

DKK million	Derivative financial instruments	2014	Derivative financial instruments	2013
Financial assets, gross	49,727	49,727	19,656	19,656
Financial liabilities, offset	(46,642)	(46,642)	(17,989)	(17,989)
Financial assets in the balance sheet	3,085	3,085	1,667	1,667
Amounts not offset in the balance sheet				
Liabilities with right of set-off	(868)	(868)	(115)	(115)
Collateral received in the form of bonds	(321)	(321)	(192)	(192)
Net	1,896	1,896	1,360	1,360

Offsetting of financial assets and liabilities

DONG Energy's counterparty risks are largely concentrated on large international energy companies and banks. Such trading is regulated under standard agreements, such as EFET and ISDA agreements, which feature credit rating and netting provisions.

The table to the left shows financial assets and liabilities that are subject to offsetting agreements, and related collaterals:

OFFSETTING OF FINANCIAL LIABILITIES

DKK million	Derivative financial instruments	2014	Derivative financial instruments	2013
Financial liabilities, gross	49,533	49,533	18,789	18,789
Financial assets, offset	(46,642)	(46,642)	(17,989)	(17,989)
Financial liabilities in the balance sheet	2,891	2,891	800	800
Amounts not offset in the balance sheet				
Assets with right of set-off	(868)	(868)	(115)	(115)
Collateral provided in the form of bonds	(823)	(823)	(283)	(283)
Net	1,200	1,200	402	402

10. MARKET RISKS

SENSITIVITY ANALYSIS OF FLUCTUATIONS IN CURRENCIES IN THE TRADING PORTFOLIO:

Risk		Effect on profit (loss) before tax	
		31 December 2014	31 December 2013
USD	10%	259	96
	-10%	(259)	(64)
GBP	10%	(2)	(1,280)
	-10%	2	1,280
NOK	10%	(97)	5
	-10%	97	(5)

Sensitivity analysis for currency risks

DONG Energy A/S's principal currency risks relate to USD, GBP and NOK. The company also determines and manages the currency risk in respect of EUR, but as price fluctuations between DKK and EUR are small, the risk is considered to be insignificant.

11. CONTINGENT LIABILITIES

Contingent liabilities

Guarantees

DONG Energy A/S has furnished the Danish Ministry for Economic Affairs and the Interior with a guarantee for fulfilment of obligations and liability in damages towards the Danish State or third parties incurred by DONG E&P A/S in connection with the company's participation in exploration and production licences, irrespective of whether the obligations and liability rest on DONG E&P A/S alone or jointly and severally with others. The guarantees are not capped, but cannot exceed a sum corresponding to twice DONG E&P's share of each obligation or liability.

As a condition for approval of its participation in gas and oil exploration and production on the Norwegian, UK, Greenland and Faroese continental shelves, DONG Energy A/S has provided a guarantee under which it assumes primary liability as normally required by the local authorities.

The guarantee covers obligations and liability incurred or assumed by the DONG E&P Group in connection with its exploration and production activities. The guarantees are not capped and the DONG E&P Group is jointly and severally liable with the other partners for obligations and liability.

DONG Energy A/S has also provided guarantees in connection with participation by subsidiaries and subsidiaries' joint operations and joint ventures in natural gas and oil exploration and production, construction and operation of wind farms, and geothermal plants and natural gas installations, and has provided guarantees in respect of leases, decommissioning obligations, and purchase, sale and supply agreements, etc.

DONG Energy A/S also acts as guarantor with primary liability for bank balances in certain subsidiaries.

Indemnities

DONG Energy is a member of the reinsurance company Oil Insurance Ltd. In the event of a member's exit, an exit premium will be payable, which has been calculated at USD 19.3 million at 31 December 2014 (2013: USD 25.6 million).

DONG Energy A/S is taxed jointly with other companies in the DONG Energy Group. As management company, the company has unlimited and joint and several liability together with the other jointly taxed companies for Danish income taxes and withholding taxes on dividends, interest and royalties within the jointly taxed companies.

Litigation

DONG Energy A/S is not a party to any litigation proceedings or legal disputes that could have an effect on the company's financial position, either individually or collectively.

12. RELATED PARTY TRANSACTIONS

NOTES

TRADING WITH SUBSIDIARIES

DKK million	2014	2013
Rental income and services to subsidiaries	176	131
Purchases of goods and services from subsidiaries	(43)	(110)
Interest, subsidiaries (net income)	1,687	1,594

For a description of related parties, reference is made to note 8.5 to the consolidated financial statements.

Remuneration of the Board of Directors and the Executive Board is disclosed in note 3.

Related party transactions are made on arm's length terms.

There were no other related party transactions during the year.

CAPITAL TRANSACTIONS AND BALANCES WITH SUBSIDIARIES AND JOINT VENTURES AT 31 DECEMBER

DKK million	2014	2013
Receivables from subsidiaries	67,950	66,060
Payables to subsidiaries	(37,299)	(17,586)
Dividends received from subsidiaries	1,070	200

13. SUBSIDIARIES

DKK million	Investments in subsidiaries	
	2014	2013
Cost at 1 January	42,152	35,725
Additions	3,386	8,355
Disposals	(431)	(1,928)
Cost at 31 December	45,107	42,152
Value adjustments at 1 January	(19)	(19)
Value adjustments at 31 December	(19)	(19)
Carrying amount at 31 December	45,088	42,133

An overview of subsidiaries, joint ventures and associates is set out in note 8.10 to the consolidated financial statements.

Investments in subsidiaries were tested for impairment in 2014. No impairment losses were recognised as the recoverable amount exceeded the cost.

In 2014, debt of DKK 386 million in DONG Storage A/S was converted to share capital. A capital increase was made in DONG E&P A/S of DKK 3,000 million. Furthermore, DONG Storage A/S was sold in 2014.

In 2013, debt of DKK 1,128 million in DONG Energy Vangede A/S was converted to share capital. A capital increase was made in DONG Naturgas A/S of DKK 7,000 million, in DONG E&P DK A/S of DKK 30 million and in DONG Oil Pipe A/S of DKK 197 million. Moreover, DONG Energy Ayrshire Holding Ltd. and DONG Sverige Distribution AB were liquidated and DONG Energy Vangede A/S was sold.

14. OPERATING LEASE OBLIGATIONS

NOTES

DKK million	2014			2013		
	Minimum lease payments	Subleasing	Net	Minimum lease payments	Subleasing	Net
0-1 year	(180)	158	(22)	(174)	155	(19)
1-5 years	(662)	644	(18)	(616)	613	(3)
More than 5 years	(1,280)	1,280	-	(1,564)	1,564	-
Minimum lease payments	(2,122)	2,082	(40)	(2,354)	2,332	(22)

DONG Energy A/S has entered into operating leases that include leasing of office premises until 2035. There are no significant restrictions in the leases. In 2014, an amount of DKK 159 million was recognised (2013:

DKK 109 million) in profit (loss) for the year in respect of operating lease payments.

DONG Energy A/S has entered into operating leases with subsidiaries

for subleasing of office premises and leasing of investment property. There are no significant restrictions in the leases. In 2014, an amount of DKK 165 million was recognised (2013: DKK 118 million) in profit (loss) for the year in respect of rental income.

STATEMENT BY THE EXECUTIVE BOARD AND THE BOARD OF DIRECTORS

MANAGEMENT STATEMENT AND AUDITOR'S REPORTS

The Board of Directors and the Executive Board have today considered and approved the annual report of DONG Energy A/S for the financial year 1 January – 31 December 2014.

The consolidated financial statements and the parent company financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU and Danish disclosure requirements for listed companies and state-owned public limited companies.

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair presen-

tation of the Group's and the parent company's assets, liabilities and financial position at 31 December 2014 and of the results of the Group's and the company's operations and cash flows for the financial year 1 January – 31 December 2014.

In our opinion, the Management's review provides a true and fair presentation of the development in the Group's and the parent company's operations and financial position, of the results for the year and of the overall financial position of the Group and the company as well as a description of the most significant risks and elements of uncertainty facing the Group and the parent company.

DONG Energy's non-financial reporting is presented in accordance with the disclosure requirements for presenting a social responsibility statement as set out in Section 99(a)-(b) of the Danish Financial Statements Act. In our opinion, the non-financial statements represent a reasonable and balanced representation of the Group's social responsibility and sustainability performance.

We recommend that the annual report be adopted at the annual general meeting.

INDEPENDENT AUDITOR'S REPORT

MANAGEMENT STATEMENT AND AUDITOR'S REPORTS

To the shareholders of DONG Energy A/S

REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS AND THE PARENT COMPANY FINANCIAL STATEMENTS

We have audited the Consolidated Financial Statements and the Parent Company Financial Statements of DONG Energy A/S for the financial year 1 January – 31 December 2014, pages 48-113 and 123-138, comprising the income statement, statement of comprehensive income, balance sheet, statement of changes in equity, statement of cash flows and notes, including the accounting policies of the Group as well as the Parent Company. The Consolidated Financial Statements and Financial Statements are prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU and Danish disclosure requirements for listed companies and state-owned public limited companies.

Management's responsibility for the Consolidated Financial Statements and Financial Statements

Management is responsible for the preparation of Consolidated Financial Statements and Financial Statements that provide a fair presentation in accordance with International Financial Reporting Standards as adopted by the EU and Danish disclosure requirements for listed companies and state-owned public limited companies. Management is also responsible for such internal control as

management determines is necessary to enable the preparation of Consolidated Financial Statements and Financial Statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on the Consolidated Financial Statements and Financial Statements based on our audit. We conducted our audit in accordance with International Standards on Auditing and additional requirements under Danish audit legislation. This requires that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the Consolidated Financial Statements and Financial Statements are free from material misstatement.

An audit involves procedures to obtain audit evidence of the amounts and disclosures in the Consolidated Financial Statements and Financial Statements. The procedures selected depend on the auditor's judgement, including the assessment of the risk of material misstatement in the Consolidated Financial Statements and Financial Statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation of Consolidated Financial Statements and Financial Statements that provide a fair presentation in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting

policies applied and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the Consolidated Financial Statements and Financial Statements.

We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our opinion.

Our audit has not resulted in any qualification.

Opinion

In our opinion, the Consolidated Financial Statements and Parent Company Financial Statements provide a fair presentation of the Group's and the company's assets, liabilities and financial position at 31 December 2014 and of the results of the Group's and the company's operations and cash flows for the financial year 1 January – 31 December 2014 in accordance with International Financial Reporting Standards as adopted by the EU and Danish disclosure requirements for listed companies and state-owned public limited companies.

STATEMENT ON THE MANAGEMENT'S REVIEW

We have read the Management's review, pages 1-47, as required by the Danish Financial Statements Act. We have not performed any procedures additional to the audit of the Consolidated Financial Statements and Financial Statements.

On this basis, it is our opinion that the information provided in the Management's review is in accordance with the Consolidated Financial Statements and Financial Statements.

INDEPENDENT AUDITOR'S ASSURANCE REPORT

MANAGEMENT STATEMENT AND AUDITOR'S REPORTS

To the stakeholders of DONG Energy

ASSURANCE REPORT ON THE NON-FINANCIAL STATEMENTS

We have reviewed DONG Energy's non-financial statements for 2014 for the purpose of expressing an opinion on CSR data.

Criteria for the preparation of the non-financial statements

The criteria for the preparation of the non-financial statements are set out in the description of accounting policies on pages 114-122 of the annual report. The description contains information on which of the Group's business units and activities are comprised by the reporting and Management's reasons for choosing the data included. Data are recognised in accordance with the described accounting policies for non-financial data.

Responsibilities

The company management is responsible for preparing the non-financial statements, including establishing registration and internal control systems to ensure a reliable reporting basis, specifying acceptable reporting criteria and choosing the data to be collected. Based on our review, it is our responsibility to express an opinion on the CSR data in the non-financial statements.

Scope

We have planned and performed our work in accordance with the international standard on assurance engagements ISAE 3000 ("Assurance Engagements Other than Audits or Reviews of Historical Financial Information") for the purpose of obtaining limited assurance that the CSR data presented on pages 114-122 have been recognised in accordance with the criteria used to prepare the non-financial statements. The obtained assurance is limited as our engagement has been limited compared to an audit engagement.

Based on an assessment of materiality and risk, our work has first and foremost comprised enquiries regarding applied instructions, registration and reporting systems, procedures with focus on internal controls, auditing analyses of the data used to prepare the non-financial statements, sample tests of data and underlying documentation, including visits at selected local entities, and control of whether the described non-financial data comply with DONG Energy's described accounting policies.

We believe that the evidence obtained by us is sufficient and appropriate to provide a basis for our opinion.

Opinion

Based on our work, nothing has come to our attention causing us to believe that the CSR data presented on pages 114-122 of the 2014 Annual Report have not been recognised in accordance with the criteria for the preparation of the non-financial statements.

2P reserves: Sum of proved reserves plus probable reserves (Society of Petroleum Engineers and World Petroleum Congress (SPE/WPC) reserve classification standards).

Biomass: Also known as biomass fuel. A term for all combustible organic materials, including straw, wood chips and wood pellets. CO₂ emissions produced by the combustion of biomass are not covered by EU ETS. Biomass can be used in both central power stations and small-scale CHP plants

CHP plant: A Combined Heat and Power (CHP) plant generates both heat and electricity in the same process. The heat generated may be used for industrial purposes and/or district heating.

Carbon emission allowances : Carbon dioxide emissions allowances subject to the European Union Emissions Trading Scheme (EU ETS).

Climate partnership: A climate partnership helps the company to reduce energy consumption, use renewable energy and ensure a transparent climate profile.

Cost of electricity: Average cost measured as present value per megawatt hour (MWh) generated from offshore wind power covering costs for development and construction as well as subsequent operation and maintenance of the wind farm.

DK 1 and DK2: Area prices for electricity in West Denmark (DK1) and East Denmark (DK2).

EEX: European Energy Exchange, German power exchange.

Exploration and appraisal wells: Wells drilled to discover and evaluate natural gas or oil in an unproved area to find new reserves in an area in which hydrocarbon discoveries have previously been made or to delineate a known accumulation.

Fossil fuels: Fuel resources such as coal, coal products, natural gas, crude oil and other hydrocarbon products.

FTE: Employees (Full Time Equivalent). The number of full-time employees during a fixed time period.

Green certificates: Certificate awarded to generators of environment-friendly electricity as a supplement to the market price of electricity in the given price area.

Green dark spread (GDS): Green dark spread represents the contribution margin per MWh of electricity generated at a coal-fired power station of a given efficiency. It is determined as the difference between the market price of electricity and the cost of the coal (including associated freight costs) and CO₂ allowances used to generate the electricity.

Green spark spread (GSS): Green spark spread represents the contribution margin per MWh generated at a gas-fired power station of a given efficiency. It is determined as the difference between the market price of electricity and the costs of the gas and CO₂ allowances used to generate the electricity.

Hedging instruments: Financial and physical instruments that can be used to guarantee a specific price for the purchase or sale of, for example, commodities and currency.

Hydrological balance: Most of the electricity generated in the Nordic countries comes from hydro electric stations, and their output depends on their water reservoir levels. The hydrological balance reflects whether the levels in the Norwegian and Swedish water and snow reservoirs are above or below normal.

LNG: Liquefied Natural Gas. Gas that has been liquefied by cooling to minus 161 degrees Celsius. LNG takes up 600 times less space than conventional gas. LNG can be transported in customised tankers to receiving terminals, where the LNG is vaporised and pressurised before being routed into the transmission system for onwards distribution and sale.

LTIF: Lost Time Injury Frequency. DONG Energy defines lost time injuries as occupational injuries resulting in at least one day's absence from work in addition to the day of the injury.

Million boe: Million barrels of oil equivalent.

NBP: National Balancing Points, UK gas hub.

Nord Pool: The Norwegian-based Nordic power exchange, which facilitates electricity trading in Norway, Sweden, Finland and Denmark.

Oil/gas spread: The difference in price between a TWh of gas traded on a gas hub and a TWh of gas bought or sold under an oil price-indexed contract.

PJ: Petajoule, a unit of energy. 1 PJ is equivalent to 1,000 TJ or 1,000,000 GJ or 1,000,000,000 MJ.

Power station: A power station generates electricity only. A large (central) power station typically has a net installed capacity of more than 100 MW. A small-scale power station typically has a net installed capacity of less than 100 MW.

Supply obligation: A company with a supply obligation is bound by law to deliver electricity or natural gas to a certain geographic area at prices approved by the Danish Energy Regulatory Authority.

Thermal generation: Electricity and heat generated through the combustion of fossil fuels, biomass or waste.

TTF: Title Transfer Facility, Dutch gas hub.

TWh: Terawatt hour. The amount of energy generated in one hour with the effect of 1 TW. 1 TWh is equivalent to 1,000 GWh or 1,000,000 MWh.
