

# Borkum Riffgrund 2: final investment decision, June 2016

Last steps towards our 2020 target

## Exceeding our 2020 target

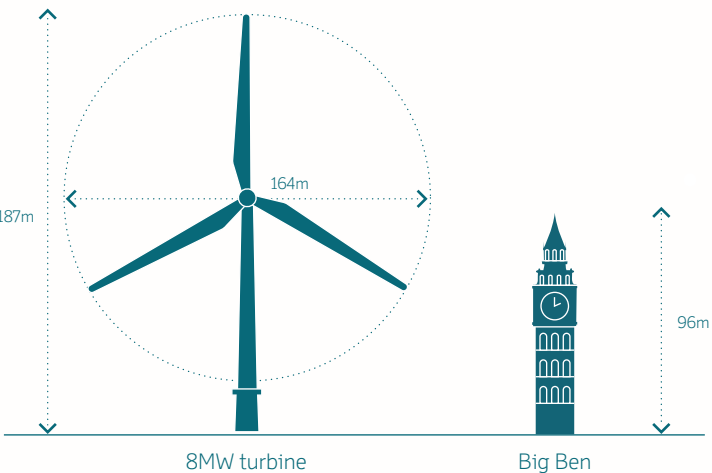

## Powering homes in Germany

Borkum Riffgrund 2 capacity: 450MW

**460,000**  
german homes powered

## Sizing up the 8MW wind turbine

## Timeline

## Less carbon emissions

Equivalent production from a coal-fired power station would emit 1,800,000 tonnes of CO<sub>2</sub> per year

**550,000**  
cars emit this annually
