Interconnect Cable Supply & Termination New York Business Opportunities

Scope Description

LS Cable and Sunrise Wind are collaborating for the supply of onshore and offshore 138 kV HVAC interconnect cables incl. associated accessories, works and services for Sunrise Wind.

In addition to manufacturing and supply of the onshore HVAC interconnect cables the contract is planned to cover:

- supply of associated accessories (splices/joints, terminations, fiber optic cables, earthing cables, fiber optic splice boxes, clamps/cleats, DTS etc.)
- delivery of onshore HVAC Cables and accessories to NY
- Cable pulling, onshore splicing/jointing and termination works
- test on completion

The onshore 138 kV HVAC cables will be manufactured in LS Cable factory in Gumi, South Korea.

LS Cable is looking for local companies to provide associated goods, works and services where possible.

Supply of goods will take place from June 2022 to August 2022. The works and services will take place from September 2022 to the late of 2022.

Supplier Requirements

LS Cable is collaborating with subcontractors with the following qualifications:

- Supply of onshore fiber optic cables, earthing cables, fiber optic splice boxes, clamps/cleats etc.
- Transport and offloading of 138 kV HVAC cable reels and accessories within US (from New York port to delivery site in NY).
- Logistics for underground cabling and accessories.
- Supporting services and related equipment for jointing and termination of onshore 138kV HVAC cables according to requirements.
- Splicing and testing of onshore fiber optic cables according to requirements.
- Logistics services to support LS during testing of 138kV HVAC cables on completion according to applicable standards and recommendations

Procurement Process & Engagement Plan

LS Cable plans to assess local capabilities as per opportunities listed prior.

The scope will be presented at the Albany Supplier Forum event by Sunrise Wind and LS Cable.

The scope will have an exhibition stand with posters and representatives to discuss the scope and requirements more in detail.
