

# South Fork Wind

## Project Overview

**South Fork Wind will be New York's first offshore wind farm – a centerpiece of New York's ambitious offshore wind energy goals.**

Its 15 turbines will produce enough clean, renewable energy every year to power 70,000 homes.

From stronger coastal storms to sea level rise, the harmful effects of climate change are a stark reality on Long Island and South Fork Wind will make a real difference in combatting climate change and meeting East Hampton's clean energy goals.

## Benefits to Long Island

We are fully committed to supporting Governor Cuomo's vision of not only a New York powered with 100 percent renewable energy but creating an enduring offshore wind supply chain centered around New York communities and workers.

- South Fork Wind will help the Town of East Hampton meet its 100 percent renewable energy goals.
- The wind farm will displace millions of tons of carbon emissions, the equivalent of taking 60,000 cars off the road.
- We have also proposed locating a facility in Montauk to support the long-term operations and maintenance of South Fork Wind, where we'll base crew transfer vessels that will transport maintenance team members to and from the wind farm.

### → WHO

50/50 partnership between Ørsted and Eversource

### → WHAT

132 MW offshore wind farm

### → WHEN

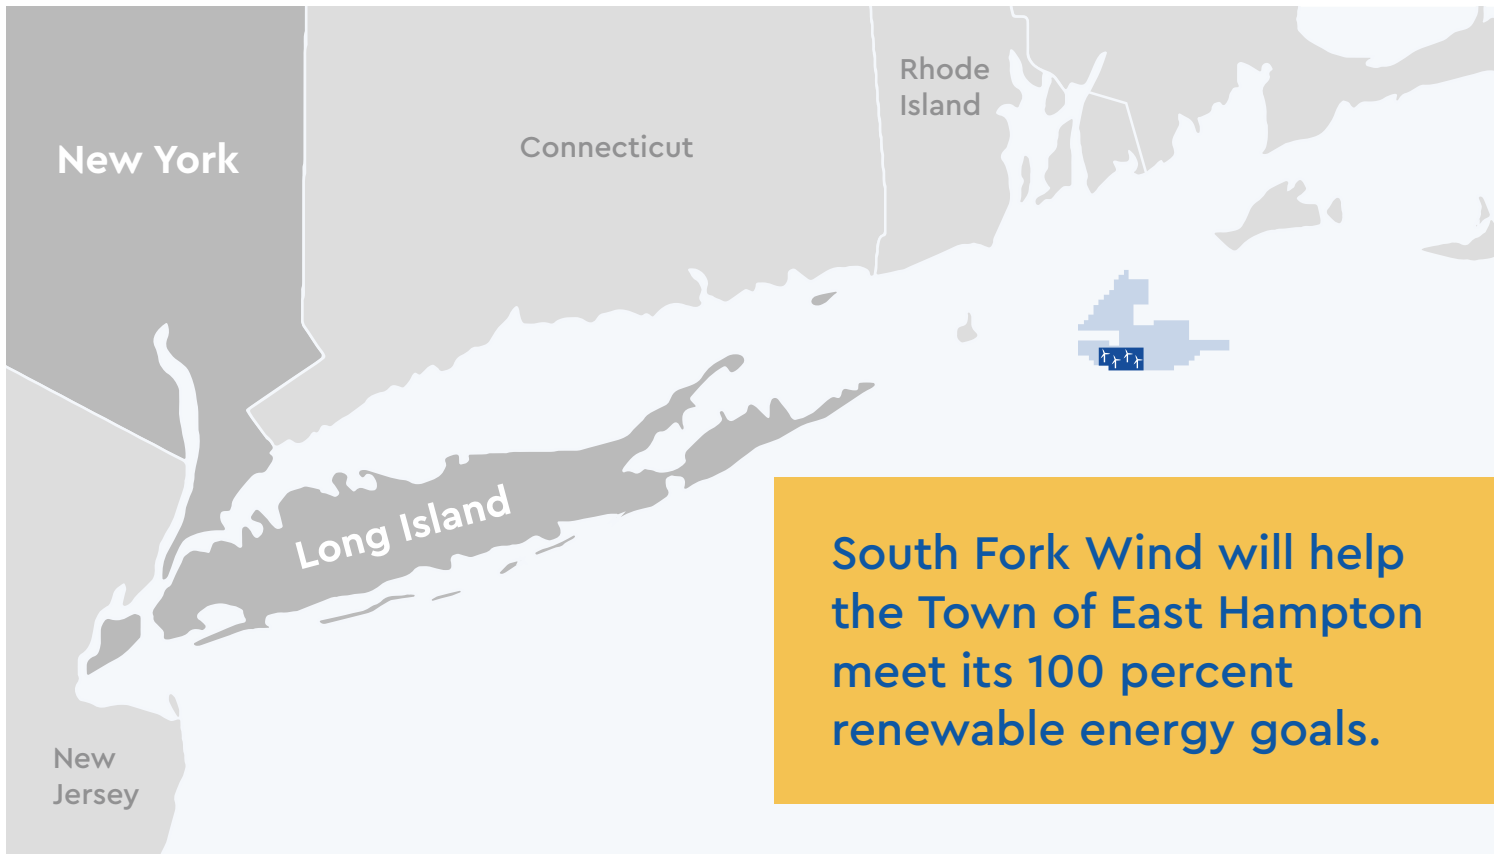

Onshore and offshore construction is planned to begin in 2021 and expected to be fully operational in 2022

### → WHERE

35 miles east of Montauk Point, out of sight from Long Island beaches

### → WHY

Helping the Town of East Hampton meet its 100 percent renewable energy goals, and New York realize its vision of becoming a leader in clean energy

## About Ørsted and Eversource

South Fork Wind brings unparalleled experience in developing offshore wind to New Yorkers, as a 50/50 partnership between Ørsted, the global leader in offshore wind and a global leader in climate action, and Eversource, New England's largest energy company and premier electric transmission builder. Ørsted – which was recently ranked the most sustainable company in the world and will become the world's first major energy company to become carbon-neutral by 2025 – envisions a world run entirely on green energy while Eversource is one of the nation's most responsible companies, as ranked by Newsweek, Forbes and JUST Capital.
