

Hornsea Project Three  
Offshore Wind Farm

## Hornsea Project Three Offshore Wind Farm

Preliminary Environmental Information Report:  
Annex 5.1 – Cumulative Effects Screening Matrix

Date: July 2017

Environmental Impact Assessment  
Preliminary Environmental Information Report

Volume 4  
Annex 5.1 – Cumulative Effects Screening Matrix

**Liability**

This report has been prepared by RPS, with all reasonable skill, care and diligence within the terms of their contracts with DONG Energy Power (UK) Ltd.

Report Number: P6.4.5.2

Version: Final

Date: July 2017

This report is also downloadable from the Hornsea Project Three offshore wind farm website at:

Table 1.2: CEA onshore (landward of MLWS) search area extents. ....	2

## 1. Introduction

### 1.1 Background

1.1.1.1 A fundamental requirement of undertaking the Cumulative Effects Assessment (CEA) is to identify those projects, plans and activities with which Hornsea Three may interact to produce a cumulative impact. These interactions may arise within the construction, operation and maintenance or decommissioning phases.

### 1.2 Cumulative Effects Assessment Long List

1.2.1.1 In order to undertake a comprehensive CEA, a long list of relevant projects, plans and activities occurring within a large study area encompassing the southern North Sea (offshore) and parts of Norfolk (onshore) was produced. The CEA long list collates the details of operational or proposed projects, plans and activities, and includes those within both the UK and adjoining international jurisdictions.

1.2.1.2 The CEA long list for Hornsea Three is included in section 2 below and all projects, plans and activities on the CEA long list are shown on figures in annex 5.2: Location of Cumulative Projects, Plans and Activities.

#### 1.2.2 Collating the offshore projects, plans and activities in the long list

1.2.2.1 The long list, seaward of Mean High Water Springs (MHWS), has been developed based on the scale of projects, plans and activities, and the potential for them to produce cumulative effects with Hornsea Three.

1.2.2.2 All projects, plans and activities were identified within search areas as defined in Table 1.1 below and through a desktop interrogation of the following data sources:

- Planning Inspectorate National Infrastructure Planning website;
- The Crown Estate website;
- European Marine Observation and Data Network (EMODnet) data;
- Oil and Gas UK website;
- Netherlands Oil and Gas (NLOG) website;
- Danish Energy Agency website;
- Norwegian Petroleum Directive website;
- Dutch Ministry of Infrastructure and the Environment – Rijkswaterstaat website; and
- Developers and project proponent websites.

1.2.2.3 The CEA search area extents identified in Table 1.1 were derived based upon the likely extent over which cumulative impacts are likely to occur.

Table 1.1: CEA offshore (seaward of MHWS) search area extents.

Project, Plan and Activity Type	CEA search area extents
Aggregate and disposal	• Up to 200 km from the Hornsea Three array area and offshore cable corridor.
Offshore energy	• Up to 500 km from the Hornsea Three array area and offshore cable corridor.
Commercial fisheries	• Up to 200 km from the Hornsea Three array area and offshore cable corridor.
Oil and gas	• Up to 200 km from the Hornsea Three array area and offshore cable corridor.
Cables and pipelines	• Up to 100 km from the Hornsea Three array area and offshore cable corridor.
Shipping	• Up to 200 km from the Hornsea Three array area and offshore cable corridor.
Military, aviation and radar	• Up to 200 km from the Hornsea Three array area and offshore cable corridor.
Coastal	• Up to 200 km from the Hornsea Three array area and offshore cable corridor.

### 1.2.3 Collating the onshore projects, plans and activities in the long list

1.2.3.1 The long list, landward of Mean Low Water Springs (MLWS), has been developed based on the scale of projects and the potential for them to have cumulative effects with Hornsea Three. Therefore only major development, as defined by the Town and Country Planning (Development Management Procedure) Order 2015. Utilisation of the definition of 'major development' under the above order was selected as the search criteria for onshore CEA, as these types of project represent those that, by virtue of their nature as defined by the below list, can reasonably be assumed to at least have the potential for a cumulative impact with a proposed project of a scale similar to Hornsea Three, and therefore are included in the CEA screening exercise. According to the order, 'major development' means development involving any one or more of the following:

- "The winning and working of minerals or the use of land for mineral-working deposits;
- Waste development;
- The provision of dwellinghouses, where:
  - The number of dwellinghouses to be provided is ten or more; or
  - The development is to be carried out on a site having an area of 0.5 hectares or more and it is not known whether the development falls within sub-paragraph (c)(i) [the above bullet point];
- The provision of a building or buildings where the floor space to be created by the development is 1,000 m<sup>2</sup> or more; or
- Development carried out on a site having an area of 1 hectare or more".

1.2.3.2 In addition, all EIA Development was also identified. The definition of 'Project' within the EIA Directive 2011/92/EU is wider than applications for Development Consent. Therefore projects, plans and activities were also identified from adopted and emerging Development Plan documents within the Local Authority administrative areas.

1.2.3.3 Onshore projects, plans and activities have been identified through a desktop interrogation of the Local Authority websites/planning portals as outlined in Table 1.2 below. The CEA search area extents identified in Table 1.2 were derived based upon the likely extent over which cumulative impacts are likely to occur.

1.2.3.4 Projects, plans and activities have also been identified from a desk based interrogation of the following websites:

- Planning Inspectorate for Development Consent Order (DCO) applications;
- Marine Management Organisation website for Marine License applications;
- Country council websites/planning portals; and
- Local Parish/community websites.

1.2.3.5 Within the Hornsea Three onshore cable corridor search area CEA search area (up to 4 km from Hornsea Three) and Hornsea Three landfall area CEA search area (up to 5 km from Hornsea Three) all projects, plans and activities were identified in the CEA long list. Within the onshore HVDC converter/HVAC substation and onshore HVAC booster station CEA search areas (up to 15 km from Hornsea Three) only projects >50 m in height were identified. Professional judgement was used to determine whether to include any projects, plans or activities that did not meet these criteria, for example, tall projects in close proximity but outside of the onshore HVDC converter/HVAC substation CEA search area.

Table 1.2: CEA onshore (landward of MLWS) search area extents.

Local Authority	CEA search area extents
Norfolk County Council	<ul style="list-style-type: none"> <li>• Hornsea Three landfall area: Up to 5 km from landfall area;</li> <li>• Hornsea Three onshore cable corridor search area: Up to 4 km from Hornsea Three;</li> <li>• Hornsea Three onshore HVAC booster station: Up to 10 km from candidate sites; and</li> <li>• Hornsea Three onshore HVDC converter/HVAC substation: Up to 15 km from candidate sites.</li> </ul>
North Norfolk District Council	<ul style="list-style-type: none"> <li>• Hornsea Three landfall area: Up to 5 km from landfall area;</li> <li>• Hornsea Three onshore cable corridor search area: Up to 4 km from Hornsea Three; and</li> <li>• Hornsea Three onshore HVAC booster station: Up to 10 km from candidate sites.</li> </ul>
Breckland District Council	<ul style="list-style-type: none"> <li>• Hornsea Three onshore cable corridor search area: Up to 4 km from Hornsea Three.</li> </ul>
Broadland District Council	<ul style="list-style-type: none"> <li>• Hornsea Three onshore cable corridor search area: Up to 4 km from Hornsea Three.</li> </ul>
South Norfolk Council	<ul style="list-style-type: none"> <li>• Hornsea Three onshore cable corridor search area: Up to 4 km from Hornsea Three; and</li> <li>• Onshore HVDC converter/HVAC substation: Up to 15 km from candidate sites.</li> </ul>
Waveney Borough Council	<ul style="list-style-type: none"> <li>• Hornsea Three onshore cable corridor search area: Up to 4 km from Hornsea Three; and</li> <li>• Onshore HVDC converter/HVAC substation: Up to 15 km from candidate sites.</li> </ul>
Norwich City Council	<ul style="list-style-type: none"> <li>• Hornsea Three onshore cable corridor search area: Up to 4 km from Hornsea Three; and</li> <li>• Onshore HVDC converter/HVAC substation: Up to 15 km from candidate sites.</li> </ul>

## 1.2.4 Screening

1.2.4.1 Once the CEA long list was collated, all projects, plans and activities were then individually screened, based on the level of detail available, as well as the potential for interactions on a conceptual, physical and temporal basis, with specific reference to each topic of the Preliminary Environmental Information Report (PEIR). Those that are 'screened in' are then carried forward into the CEA of the relevant topic chapters of the PEIR.

1.2.4.2 Specifically, projects, plans and activities were screened on a topic basis as follows:

- Screened out of the assessment because:
  - Included as part of the topic baseline and therefore not considered within the CEA;
  - No conceptual effect-receptor pathway exists;
  - Low data confidence;
  - No physical effect-receptor overlap; or
  - No temporal overlap.
- Screened into the assessment because:
  - There is a potential for a cumulative impact to exist; or
  - The project, plan or activity was considered as part of the baseline but has an ongoing impact (for example, ongoing vessel traffic associated with operations and maintenance activities at existing neighbouring wind farms; a consented marina extension with potential for increased vessel and road traffic once completed, etc.).

1.2.4.3 Further information on the screening undertaken for each project, plan and activity in the CEA long list is provided in volume 1, chapter 5: Environmental Impact Assessment Methodology.

## 2. Cumulative Effects Screening Matrix

2.1.1.1 Column of page left intentionally blank – please see next page.

Marine Aggregate and Disposal - Temporal

	Consenting/Pre-Construction
	Construction
	Operation and Maintenance
	Decommissioning

Note - where an end date is not given in the licence, then a duration of 15 years has been assumed based on previous licences.

Marine Aggregate and Disposal - Spatial and Screening

a	Included as part of the topic baseline and hence not considered within the cumulative impact assessment.
b	Part of the baseline but has an ongoing impact and is therefore considered relevant to the cumulative impact assessment: Screened in to assessment.
c	Potential cumulative impact exists: Screened in to assessment.
d	No conceptual effect-receptor pathway: Screened out of assessment.
e	Low data confidence: Screened out of assessment.
f	No physical effect-receptor overlap: Screened out of assessment.
g	No temporal overlap: Screened out of assessment.

Energy Projects - Spatial and Screening

a	Included as part of the topic baseline and hence not considered within the cumulative impact assessment.
b	Part of the baseline but has an ongoing impact and is therefore considered relevant to the cumulative impact assessment: <b>Screened in to assessment.</b>
c	Potential cumulative impact exists: <b>Screened in to assessment.</b>
d	No conceptual effect-receptor pathway: <b>Screened out of assessment.</b>
e	Low data confidence: <b>Screened out of assessment.</b>
f	No physical effect-receptor overlap: <b>Screened out of assessment.</b>
g	No temporal overlap: <b>Screened out of assessment.</b>
h	Project has been withdrawn from development

Commercial Fisheries - Temporal

Consenting/Pre-Construction
Construction
Operation and Maintenance
Decommissioning

Project	Information in the Public Domain	Data Confidence Assessment	Capacity/ scale	Status of Development	OFFSHORE Construction Period (BLUE line denotes the construction period) for Hornsea Three																																		
					2019	2020	2021	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035	2036 - 2050																	
Fishing Rights	Industry information, CEFAS <a href="https://www.gov.uk/government/statistical-data-sets/uk-sea-fisheries-annual-statistics-report-2015">https://www.gov.uk/government/statistical-data-sets/uk-sea-fisheries-annual-statistics-report-2015</a>	High - Third party project details published in the public domain and confirmed as being 'accurate' by CEFAS.	In 2015, the UK fishing industry had 6,187 fishing vessels compared with 6,716 in 2005, a reduction of 8 per cent. The fleet in 2015 comprised 4,863 10 metre and under vessels and 1,324 over 10 metre vessels.	Operational																																			
Aquaculture	Industry information, CEFAS	High - Third party project details published in the public domain and confirmed as being 'accurate' by CEFAS.	The majority of UK food finfish aquaculture is located in Scotland, but it is increasing in Wales and England. Shellfish culture is spread more evenly throughout the UK.	Operational																																			

Commercial Fisheries - Spatial and Screening

Project	Distance from the Hornsea Three Array Area (km)	Distance from the Hornsea Three Offshore Export Cable Route Corridor (km)	Status of Development	Data Confidence	Marine Processes	Benthic Ecology	Fish & Shellfish Ecology	Marine Mammals	Ornithology	Commercial Fisheries	Shipping & Navigation	Aviation, Military & Communications	Marine Archaeology	Infrastructure & Other Users
Fishing Rights	N/A	N/A	Operational	High - Third party project details published in the public domain and confirmed as being 'accurate' by CEFAS.	f	a	a	a	d	a	a	b	c	a
Aquaculture	N/A	N/A	Operational	High - Third party project details published in the public domain and confirmed as being 'accurate' by CEFAS.	f	d	d	d	d	a	a	d	g	a

a	Included as part of the topic baseline and hence not considered within the cumulative impact assessment.
b	Part of the baseline but has an ongoing impact and is therefore considered relevant to the cumulative impact assessment: Screened in to assessment.
c	Potential cumulative impact exists: Screened in to assessment.
d	No conceptual effect-receptor pathway: Screened out of assessment.
e	Low data confidence: Screened out of assessment.
f	No physical effect-receptor overlap: Screened out of assessment.
g	No temporal overlap: Screened out of assessment.

Oil and Gas - Temporal

	Consenting/Pre-Construction
	Construction
	Operation and Maintenance
	Decommissioning
	Project has been withdrawn from development or operation

Notes - Where no specific lifespan or decommissioning plan is stated for a field, 26 years production is assumed (full length of license).  
Where fields are marked 'Production ceased', a 10 year decommissioning window is assumed.  
Where fields are marked 'Production suspended', 18 years operation is assumed as production may restart following workover.  
Where fields are marked 'Discovery', no temporal information is available.

Oil and Gas - Spatial and Screening

a	Included as part of the topic baseline and hence not considered within the cumulative impact assessment.
b	Part of the baseline but has an ongoing impact and is therefore considered relevant to the cumulative impact assessment: <b>Screened in to assessment.</b>
c	Potential cumulative impact exists: <b>Screened in to assessment.</b>
d	No conceptual effect-receptor pathway: <b>Screened out of assessment.</b>
e	Low data confidence: <b>Screened out of assessment.</b>
f	No physical effect-receptor overlap: <b>Screened out of assessment.</b>
g	No temporal overlap: <b>Screened out of assessment.</b>

Cables and Pipelines - Temporal

	Consenting/Pre-Construction
	Construction
	Operation and Maintenance
	Decommissioning
	Project has been withdrawn from development or operation

Notes - Where no specific lifespan or decommissioning plan is stated for a cable, 15 years further life is assumed.

Cables and Pipelines - Spatial and Screening

a	Included as part of the topic baseline and hence not considered within the cumulative impact assessment.
b	Part of the baseline but has an ongoing impact and is therefore considered relevant to the cumulative impact assessment. Screened in to assessment.
c	Potential cumulative impact exists. Screened in to assessment.
d	No conceptual effect-receptor pathway. Screened out of assessment.
e	Low data confidence. Screened out of assessment.
f	No physical effect-receptor overlap. Screened out of assessment.
g	No temporal overlap. Screened out of assessment.
h	Project has been withdrawn from development or operation

Shipping and Navigation - Spatial and Screening

a	Included as part of the topic baseline and hence not considered within the cumulative impact assessment.
b	Part of the baseline but has an ongoing impact and is therefore considered relevant to the cumulative impact assessment: <i>Screened in to assessment.</i>
c	Potential cumulative impact exists: <i>Screened in to assessment.</i>
d	No conceptual effect-receptor pathway: <i>Screened out of assessment.</i>
e	Low data confidence: <i>Screened out of assessment.</i>
f	No physical effect-receptor overlap: <i>Screened out of assessment.</i>
g	No temporal overlap: <i>Screened out of assessment.</i>

Military, Aviation and Radar - Spatial and Screening

a	Included as part of the topic baseline and hence not considered within the cumulative impact assessment.
b	Part of the baseline but has an ongoing impact and is therefore considered relevant to the cumulative impact assessment: <b>Screened in to assessment.</b>
c	Potential cumulative impact exists: <b>Screened in to assessment.</b>
d	No conceptual effect-receptor pathway: <b>Screened out of assessment.</b>
e	Low data confidence: <b>Screened out of assessment.</b>
f	No physical effect-receptor overlap: <b>Screened out of assessment.</b>
g	No temporal overlap: <b>Screened out of assessment.</b>

11/02223/O	Barrack Street Development Site Barrack Street Norwich	Norwich City Council	Thorpe Hamlet Parish	Replaced by 15/01927/O  Design and Access Statement notes that "Outline planning permission 11/02223/O for "residential development of 200 units and associated works, including access on Zones A and E" was granted on 14 February 2013. In the intervening period Jarrold (St James) Ltd has been appraising detailed proposals for the site, however, at this time detailed proposals are not at a stage suitable for submission. For investment and funding purposes it is necessary to submit an outline planning application now to continue to secure the principle of 200 new homes on Zones A and E. Since 2013 the residential development market has improved and approval of the new outline planning application will provide Jarrold (St James) Ltd with time to ensure an appropriate scheme for this brownfield site is submitted in detail at a later stage. To allow the 11/02223/O planning permission to lapse would undermine investor confidence at a critical time in the evolution of Zones A and E."	<a href="https://planning.norwich.gov.uk/online-applications/applicationDetails.do?activeTab=summary&amp;keyVal=LWJYANLXOHZ00">https://planning.norwich.gov.uk/online-applications/applicationDetails.do?activeTab=summary&amp;keyVal=LWJYANLXOHZ00</a>	High - Third party project details published in the public domain/planning portal.
