#### Summary

This annex provides a screening assessment of designated heritage assets of the highest significance (Grade I and II\* listed buildings and Scheduled Monuments) within a 10 km radius of the onshore HVDC converter/HVAC substation and other heritage assets (Grade II listed buildings and Conservation Area) within a 5 km radius, to determine whether they might be potentially affected by the development. Where it is concluded there is a potential for significant effects, the potential effects on those assets has been assessed in volume 6, chapter 5: Historic Environment.

#### 1. Screening Assessment – Onshore HVDC Converter/HVAC Substation

#### 1.1 Introduction

- 1.1.1.1 The tables below provide the screening assessment based primarily on information on designated assets obtained to inform the Hornsea Three onshore baseline.
- 1.1.1.2 Potential temporary and permanent impacts on the setting of designated heritage assets of the highest significance (Grade I and II\* listed buildings and Scheduled Monuments) are assessed within a 10 km radius of the onshore HVDC converter/HVAC substation presented in section 5.3 of volume 3, chapter 5: Historic Environment. In addition, potential temporary and permanent impacts on the setting of other designated heritage assets (e.g. Grade II listed buildings and Conservation Areas) are assessed within a 5 km radius of the onshore HVDC converter/HVAC substation.
- 1.1.1.3 In the first instance this screening assessment has been undertaken in order further to understand those assets where it was unlikely that significant effects would be created by Hornsea Three. The screening assessment used a Zone of Theoretical Visibility (ZTV), similar to that generated for the Landscape and Visual Impact Assessment (LVIA). The ZTV used for this assessment models terrain and land-cover, the latter using indicative heights. These heights are 12 m for woodland and 9 m for buildings. The methodology for the ZTV process is set out in appendix B of volume 6, annex 4.1: Landscape and Visual Assessment Methodology.
- 1.1.1.4 Those assets located entirely outside the ZTV have been screened out as have those where distance, orientation (where appropriate) and the small areas of those large assets lying within the ZTV indicate that there would be no significant effects created by Hornsea Three. In addition, those designated assets located within the built development of Norwich have been screened out. Significant effects on them are unlikely on the basis that their setting is formed very largely or entirely by the landscape and built environment of Norwich.
- 1.1.1.5 Figure 1 at the end of this document shows the locations of the assets listed in Table 1.1 to Table 1.4 below.
