Race Bank Offshore Wind Farm
Welcome to Race Bank

Located off the Lincolnshire and North Norfolk coast, Race Bank Offshore Wind Farm comprises of 91 turbines with a combined total capacity of 573 MW.

Ørsted is the largest offshore wind developer in both the world and the UK. Since 2004 we have been developing, constructing and operating offshore wind farms in the UK – our biggest market. Our 12 operational offshore wind farms are powering 4.4 million homes and with another one in construction this number will rise to 5.6 million homes by 2022.

In addition to our offshore wind farms, we construct battery-storage projects, innovative waste and recycling technology and provide smart energy products to our commercial and industrial customers. We currently employ 1,000 people in the UK and by the end of 2021, we will have invested over £13 billion building offshore wind farms in the UK.

We are committed for the long-term, both to leading the green transformation, and to investing in the communities where we operate.
Where is Race Bank?

The wind farm is located around 17 km (10.6 miles) off the North Norfolk and Lincolnshire coast. The export cable come onto land in the Wash. The onshore substation is located at Walpole.
Ownership

The Race Bank project is owned by Ørsted (50%), Macquarie European Infrastructure Fund 5 (25%), Sumitomo (12.5%) and funds managed by Green Investment Group (12.5%).

How big is it?

The area covered is 75 km².

This is equal to 10,500 KCOM Stadium pitches, home of Hull City A.F.C.
East Coast Community Benefit Fund

At Ørsted we are committed to continued engagement with the local communities in areas in which we work. We have committed to a Community Benefit Fund for the East Coast, which is worth approximately £465,000 (£75,000 of this is ring-fenced for a "Skills Fund") per year from 2017 to 2037, a term of 20 years. This fund recognises the long-term relationship which the Race Bank and Hornsea Offshore Wind Farms have with the local region and will support community and environmental projects in coastal areas of Yorkshire, Lincolnshire and North Norfolk (as far as Wells-next-the-Sea).

To find out more, please visit: www.orsted.co.uk/communitybenefitfunds
How much clean electricity will it produce?

The project has a capacity of 573 MW. This means it will provide enough power for over 510,000 homes.\(^1\)

What is our impact on the local economy and community?

Race Bank offshore wind farm is operated and maintained from the East Coast Hub in Grimsby which supports a workforce of more than 350 people. During the construction phase of Race Bank more than 4600 offshore roles were supported.

We are embedded in the communities and places where we operate and are proud to support business membership organisations, skills initiatives / events, the Ørsted Great Grimsby 10k, partnership projects such as the Greater Grimsby Town Deal and more to demonstrate our long-term commitment to the area.

Growing our UK supply chain is important to us and we use a number of local companies to support our operation and most recently local construction firm Hobson & Porter completed the £10m expansion to our East Coast Hub – now the largest offshore wind operations and maintenance facility in the world.

\(^1\) This based on an average household electricity consumption of 3,861 MWh and five-year average load factor for offshore wind of 39.47% (BEIS, 2019; DUKES, 2020).
Ørsted apprenticeship scheme

The East Coast Hub facility in Grimsby is currently the base for 16 offshore wind turbine technician apprentices. Our first cohort of 4 apprentices (2017) have now completed their apprenticeship and have started their career as wind turbine technicians. We’re committed to securing a workforce for the future and providing opportunities for local communities and we are looking forward to welcoming our next cohort and continuing to recruit.

Our three year apprenticeship scheme in partnership with Grimsby Institute offers our apprentices a mixture of classroom based learning and practical on site and offshore experience to gain the knowledge and skills they need for their future career as wind turbine technicians.
Project Timeline

**December 2003**
Centrica awarded a lease from the Crown Estate to develop an offshore wind farm at Race Bank under Round 2 of leasing.

**July 2012**
Development consent awarded.

**December 2013**
Race Bank Offshore Wind Farm purchased from Centrica.

**March 2015**
Onshore construction begins.

**April 2016**
Offshore construction begins.

**April 2018**
Fully commissioned and operational.
What makes the project special?

"By using our purpose built SOV we can improve accessibility and maximise the delivery of services to the wind farm helping us improve site performance. The comfort class facilities on board provides the perfect balance between work and recuperation for our teams."

Daniel Walker, Head of Race Bank Operations
