

Notice to Mariners

Metocean Buoy Re-deployment

Location: Ocean Wind lease area

Re-deployment Date: June 29th, 2019

Duration: One day

AXYS Technologies, through Ørsted U.S. Offshore Wind, will perform a buoy re-deployment operation of the pre-existing F230 Floating Lidar (FLiDAR) buoy and pendant buoy. Coordinates of the buoy are 39° 04' 13.50" N 074° 26' 40.74" W long.

Communication:

During the buoy re-deployment, vessels will broadcast their position via VHF radio on Channel 16 to notify mariners of current activities. All mariners are requested to note the buoy location and to maintain a safe distance during fishing and marine activities.

Vessel:

Northstar Commander

Vessel will transit from Avalon, NJ to buoy site to re-deploy the buoys.
