

3/13/2024

Dear Neighbor,

Construction of the Revolution Wind Project (the Project) is continuing in your area, located in the Town of North Kingstown. The Project is being constructed by Eversource & Ørsted and its contractors and subcontractors. Crews will be continuing the second phase of onshore construction for the Project. The route is roughly one mile-long and is within the Quonset Business Park. The Project will build a new substation which will interconnect to the existing Davisville substation.

Starting Saturday, March 16th, and through the remainder of the month of March, crews will be extending their work week at the new interconnection facility and substation site to include Saturdays. If work is delayed or changed, an updated notice will be provided to neighbors regarding the new schedule.

What You Can Expect

- Location of Work:
 - Construction activity will take place within the project's property at 594 Camp Avenue.
- Traffic Management:
 - You will continue to see increased construction traffic on Camp Avenue, especially near the project's property of 594 Camp Avenue. We will coordinate closely with town officials to maintain safe and effective flow of traffic around Project work areas and to provide emergency access if needed.
- Work Hours:
 - Through the month of March, the project is now permitted to work Monday through Friday, 7:00 A.M. to 6:00 P.M., and Saturday, 7:00 AM to 4:00 PM, with exceptions for specific construction activities. Continued work on weekends after the month of March will be determined on a case-by-case basis. Notice will be provided in the event of more approved Saturday work or 24-hour work
- Construction Activities:
 1. Crews will continue mobilizing equipment to the project site at 594 Camp Avenue
 2. The main work will result in more noise and vibrations as the King and Pipe Piles are driven into the ground
 3. The main piece of equipment needed for this work will be a Vibratory Hammer
 4. The hammering process will be continuous throughout the workday
 5. When possible, crews will look to expedite this process and minimize any disruption as much as possible
 6. This work will last until mid to late Summer of 2024
 7. If you are experiencing any disturbances to your property caused by the noise and vibrations of the King and Pipe Piledriving, please reach out to the Outreach Team immediately
