

## FACT SHEET

# Revolution Wind

### Project Overview

**Revolution Wind is a 704 MW offshore wind farm that will provide clean, affordable power to Connecticut and Rhode Island.**

The site is located more than 15 miles south of the Rhode Island coast, 32 miles southeast of the Connecticut coast and 12 miles southwest of Martha's Vineyard.

Onshore construction began in 2023, followed by offshore construction in spring 2024.

### Local Investment

As part of a public-private partnership with the State of Connecticut and Connecticut Port Authority, we've invested more than \$100 million to redevelop New London State Pier into a heavy-lift cargo and deep-water port with easy access to offshore wind lease areas, creating hundreds of jobs. State Pier will be used for wind turbine staging and construction activities for Revolution Wind, Sunrise Wind, and potentially other future projects.

In addition, Ørsted and Eversource will invest \$40 million in improvements to Rhode Island's port infrastructure. The use of State Pier, ProvPort, and Quonset to support the offshore wind industry will bring jobs to each port and boost local economic activity in the region.

#### → WHO

50/50 partnership between Ørsted and Eversource

#### → WHAT

704 MW offshore wind farm – 304 MW to Connecticut and 400 MW to Rhode Island

#### → WHEN

Estimated to be fully operational in 2025

#### → WHERE

More than 15 miles south of the Rhode Island coast and 32 miles southeast of the Connecticut coast

#### → WHY

Deliver renewable offshore wind power to Connecticut and Rhode Island, creating local jobs and helping meet state clean energy goals

Ørsted and Eversource are committed to supporting offshore wind education and supply chain and workforce development for the growing offshore wind industry in Connecticut and Rhode Island – positioning both states as offshore wind leaders and launching the region's next great maritime industry.

**Revolution Wind  
will help both  
Connecticut and  
Rhode Island meet  
their ambitious clean  
energy goals.**

### **Cost-effective renewable energy**

Revolution Wind will help both Connecticut and Rhode Island meet their ambitious clean energy goals in an affordable way by providing 400 MW of offshore wind power to Rhode Island and 304 MW to Connecticut.

Rhode Island is notable with the most ambitious clean energy goal in the nation: 100 percent renewables by 2030. Connecticut will source 100 percent of its electricity from zero carbon resources by 2040.

Revolution Wind will generate enough clean energy to power more than 350,000 CT and RI homes and displace nearly one million metric tons of carbon pollution each year, the equivalent of taking more than 200,000 cars off the road.

Offshore wind offers clean renewable energy at stable, predictable prices. When energy usage is highest, Revolution Wind will complement existing power generation resources to ensure the states have enough electricity to meet demand.

### **About Ørsted and Eversource**

Revolution Wind brings unparalleled experience in developing offshore wind to Connecticut and Rhode Island, as a 50/50 partnership between Ørsted, the global leader in offshore wind and a global leader in climate action, and Eversource, a national energy leader with homegrown expertise in regional energy transmission, including more than 100 years of experience delivering power to the region. Ørsted was the first energy company in the world to have its science-based net-zero emissions target validated by the Science Based Targets initiative (SBTi) and is recognized as the world's most sustainable energy developer in the Corporate Knights Global 100 index. Eversource is one of the nation's most responsible companies, as ranked by Newsweek, Forbes and JUST Capital and has committed to becoming carbon neutral by 2030, faster than any other utility in the U.S.
