

# Field Surveys & Site Evaluation

## Purpose

South Fork Wind is performing archaeological surveys to inform micro-siting for the project's cable route.

The surveys will consist of a series of hand-dug holes, roughly one and a half feet wide and up to four feet deep. The holes will be backfilled once completed with the same soil and the original sod to leave behind a minimal footprint.

## Timeline & Location

### → EAST HAMPTON

All survey activities will occur in the Town of East Hampton, NY and will be conducted on town owned grassy shoulders of paved roadways, no work will be done on private property. Work will take place along portions:

- Beach Lane
- Wainscott Main Street
- Sayres Path
- Wainscott Stone Road
- Wainscott Northwest Road
- Daniels Hole Road
- Stephen Hands Path
- Buckskill Road

**Timeline:** Beginning in September and lasting 15–30 days.
