

Archaeological Survey & Site Evaluation

Purpose

Sunrise Wind will be performing archaeological surveys to inform the detailed design of the onshore cable route.

This work is important to ensure the project's activities do not disturb any important, undiscovered cultural or historical resources.

The surveys will consist of a series of hand-dug holes, roughly one and a half feet wide and up to four feet deep. No machinery will be used in the completion of this work.

The holes will be backfilled once completed with the same soil and the original sod to leave behind a minimal footprint.

Timeline & Location

→ Town of Brookhaven

All survey activities will occur in the Town of Brookhaven, NY and will be conducted on town own-owned property or road rights of way along the shoulders. No work will be done on private property.

Work will take place along portions of the following roads: William Floyd Parkway, Surrey Circle, Mastic Blvd, Francine Place, Victory Ave, Horseblock Rd, Expressway Drive South, Waverly Ave, Long Island Ave and Union Ave.

Timeline: Beginning in early July into August. Work is anticipated to last approximately 5-weeks.
