

Sunrise Wind

Project Overview

New York selected Ørsted and Eversource's Sunrise Wind, an approximately 924 MW project, to help the state meet its commitments under the Climate Leadership and Community Protection Act and support New York's transition to 100% clean electricity by 2040.

Sunrise Wind is bringing unparalleled experience in developing offshore wind to New York. Ørsted is the global leader in offshore wind, while Eversource is a national energy leader with homegrown expertise in regional energy transmission, including more than 100 years of experience delivering power to the region.

Benefits to New York

As part of our commitment to supporting Governor Cuomo's goal of establishing an enduring offshore wind supply chain in New York State, Sunrise Wind will support up to 800 jobs through the project's construction.

Sunrise Wind is bringing economic development to New York State and fostering the growth of the offshore wind industry for Long Island. Specific project benefits include:

- \$10 million for a National Workforce Training Center on Long Island, creating a curriculum and developing training programs that will support the next generation of jobs in the growing offshore wind industry

→ WHO

50/50 partnership between Ørsted and Eversource, with support from Con Edison and the New York Power Authority

→ WHAT

Approximately 924 MW offshore wind farm, with the potential capacity to power nearly 600,000 homes

→ WHEN

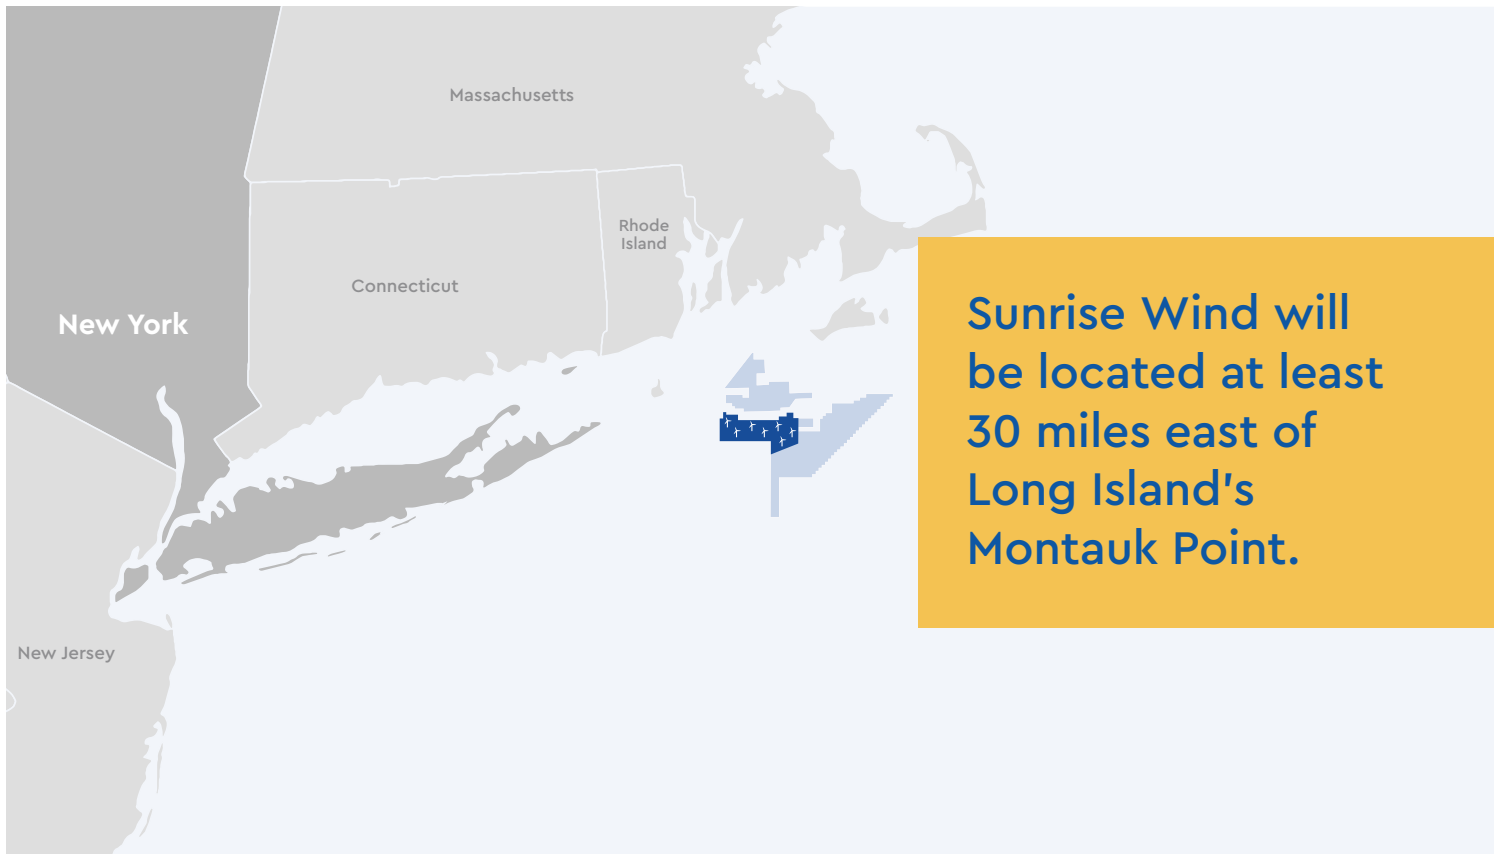

Expected to be fully operational by 2024

→ WHERE

At least 30 miles east of Montauk Point, virtually unnoticeable to Long Island residents and beachgoers; planned interconnection point is the Holbrook substation in the Town of Brookhaven within the Long Island Power Authority's (LIPA) service territory

→ WHY

100% renewable energy to help realize New York's vision of becoming a leader in clean energy

Sunrise Wind will be located at least 30 miles east of Long Island's Montauk Point.

- Building a new Operation and Maintenance Hub in Port Jefferson, creating up to 100 new and permanent full-time jobs
- Investing \$11 million for major port infrastructure upgrades as part of the New York Ports Infrastructure Development Fund and Upstate New York Workforce Development Fund
- Fabrication key components for the foundations of offshore wind turbines at facilities in the New York Capitol Region

Sunrise Wind is entering negotiations with New York State contractors and trade labor organizations on a Project Labor Agreement to cover construction activities for the project, and committing to paying prevailing wages.
